Certifications: Not Available

Background Notes:
BBA, fresher , 9/9/9, 2 panelists , Duration- 20 minutes

Experience Notes:
Overall it was conversational, one panelist seemed sweet, the other grilled me a bit

Q&A;:
P2- You are from XX city
M- yes sir
P2- okay and you are enrolled at an integrated course?
Bit of cross questioning on that, is it similar to IIM I's IPM
why leave integrated course?
P1- favourite subject
M- marketing
P1- why
M- gave quite a weak response tbh, about customers having an impact on decision making
Then the grilling began
P1- okay how do you calculate the impact advertising and sales (was vague about it)
Tried to mention by maybe comparing before and after, and how much impact it created, and conducting surveys maybe to find out how the customers came to know about the brand and yada yada
P1- still not convinced and tried to cross question on that
Then he asked me questions on demand and supply and exceptions to that
M- answered
P2- gave a situational question about how if he were a marketing manager of an automobile sector and the sales went from 65% to 10% what would I do
M- answered (he did not seem much convinced)
Talked about celebrities endorsing brands and whether they'd be liable or not
M- answered , no cross questioning
Then went on GK and asked me about national languages and how many total languages are there
Then went on the currency notes and how many languages are there on the note
Then for CA asked me related to the prices of gold and silver and as an economist what would be the reasons
And that was pretty much it, and all i remember

Experience Notes:
Conversational, Looking for opinions and analysis on the spot. Everything picked from my profile.

Q&A;:
Q1) What's you work and role? (Explained with example of a project)
Q2) Cross questioning on my project, its results.
Q3) How many projects have you done at your company? Basic details.
Q4) How many people on your team and how work is divided?
Q5) What is Green Hydrogen?
Q6) Green vs normal what is the difference?
Q7) Why should one buy green h2 if its more costly than normal (brown) one.
Q8) Who is the customer for your company?
Q9) India vs EU market comparison for your product.
Q10) Asked me about my college project.
Q11) Cross-questioning on methodology.
Q12) When was telangana formed? What were the reasons.(I am from telangana)
Q13) How many states are there and name some states that have been carved out (Gave Chattisgarh, Jharkhand, Uttarakhand)
Q14) What are the problems faced by new states?
Q15) My analysis on whether it was a good decision to carve out telangana.

Background Notes:
Panel: P1 - Male, P2 - Male, Both 45-50 Y

Experience Notes:
Conversational Interview 85%. NO (TMAY, Why MBA, Work Ex, Acads, GK, Budget, FTA). Had a strong feeling the panel was interested in discussing spinoff topics and seeing the chain of reasoning. They were quite peaceful during this discussion and would occasionally counter question. Many of these even assisted my explanations. Interview was a bit long as compared to other panels on the floor (30+ min).

Q&A;:
(Adding only top-level Questions. Will be way too much content if I add the detailed conversation.)

P2: Where are you travelling from?
P2: Why didn't you get down at this metro station instead of walking from previous one?

--P1 goes aggressive--
P1: You are a graduate who started hating his degree (showed mark sheet on tab)?
P1: Explain CG drops.
P1: What were your responsibilities as a PlaceRep?
P1: Do you think it was a lot of work?
--P1 cools down--

P1: How much statistics do you know?
P1: Our course is mathematically rigorous in 1st year? Can you cope?
P1: Explain SD and solve this question(6 numbers, easy SD calculation).

--Random discussion begins (Fully Initiated by P2)
P2: There has been a lot of talk of climate change. What is it being called nowadays?
P1: We are not referring to Donald Trump's views. What do you think the climate crisis is being called by the scientists?
P2: What is an emergency?
P2: Who can best solve the climate emergency?
P2: Why are governments not solving it?
P2: Is there a point to economic growth if climate kills people in the next 50 years?
P2: Why does short-termism exist?
P2: Should governments run for 30 years instead of 5?
P2: What news sources do you follow?
P2: How does ET compare to others on the spectrum of economic reporting?
P1: You follow Dot Media. Where do they get their sources?
P2: How would you define left-centre-right in a economic sense?

#THEOM

P2: You read The Economist. Where would you place their reporting stance on this spectrum?
P1: Anything you would like to ask?

Q&A;:
15 minutes
Two professors
P1 - A Male in 40s or so
P2 - A female in her 30s

P2 - Where are you coming from?
P2 - Which part of Delhi
P2 - currently we are in which part
P2 - When did you leave
P2 - What all subjects have you studied in engineering?
Told 5-6 subjects
P2 - how are you using digital marketing in your workex
P2 - Explain how an ad works
P2 - Explain ad working in computer science terms
P2 - want you to go in technical depth
A lot of cross questioning and discussion around the same
P2 - What are logic gates
P2 - Why and gate output is 1
Tried explaining but she wanted to get really deep into the same. Couldn't convince
P1 - Current role and promotion
P1 - MBA coaching industry size
P1 - Discussion about company's founder
P2 - Asked about startups and funding
Didn't know a few things so admitted there
P2 - Hobbies
Told
P2 - Any other hobby
Told
P2 - Any famous poets
Said 2 names, I was so stressed, couldn't even recall Robert Frost
P2 - Do you have any inspiration to write poetries
I said no and mentioned how and when I started
P2 - pick any geo political issue and write poetry about the same
I picked up the greenland issue and was writing
P2 - just write 2 lines
While writing, I clarified only 2 or long works

#THEOMI

P2 - just 2
Recited and both seemed satisfied
P1 - Which states does Yamuna flow from and where it starts and originates
Couldn't answer properly
P2 offered a toffee

Background Notes:
9/9/7 Electrical engineer(18 months work experience in sofware company) | Cat Percentile: 99.90 | 2 Panel members(both male)

Experience Notes:
It was very stressful. Overall, not a very good experience.

Q&A;:
AWT: Something along the lines of that the recent benefit of AI is limited to upper management and roles and lower roles face layoffs because of it

P1: So you are a software engineer, but you have a bachelor's in electrical engineering. Why?
P1: So what is your role? (AI application engineer)
P1: Tell me how you use AI in your work. (explained we work on application layer and use other LLM's api)
P1: Using other LLMs doesn't seem a very good business. Your thoughts?
P1: So how exactly does your company ensure accuracy? (I told you we first prepare ground truth with the help of manual intervention and do iterations based on that to improve accuracy.)
P1: But you are trying to remove manual evaluation, yet you are relying on that? (tried to explain but didn't find them very convinced.)
P1: Okay, tell me there is a fear of AI replacing entry-level jobs. How do you feel about that?

P2: Do you remember electrical engineering?
P2: Tell me about transformers
P2: Why is high voltage used in transmission lines? (Told about I^2R losses)
P2: But isn't loss also equals to V^2/R? (Explained it, but again they were not very convinced)
P2: Tell me about your final year project (the biggest blunder was not being prepared for it). Still tried to explain a bit).
P2: Do you know probability?
P2: Define it; don't use terms like "chance," "likeliness," etc.
P2: What is a random variable? Why is it called random?
P2: How do you calculate probability (I told favourable outcomes/total outcomes)
P2: You have a smoke alarm above your head. The probability of it falling on you is half, by the formula you gave to me. But you're still sitting under it?

P1: Do you follow news?
P1: Tell me about one of the recent news stories. (I talked about US slashing reciprocal tariffs on Bangladesh.)
P1: What implications for India?
P1: The recent tariffs reduced from 50%; is it just reciprocal or something else too?
P1: Why did the US invade Venezuela? What other reasons besides oil?

#THEOMI

P1: That is it. Any questions for us?

Q&A;:
M-1
What have you been doing these days?
What subject did you like studying during UPSC preparation?
Any other societies with matrilineality?
What is the difference between matriarchy and matrilineality?
What are the reasons for matrilineality?
Any other topic from sociology you like?
What is class according to Marx? Is it social or economic?
What are the means of production?
What is the endgame for Marxism?
Does Marx explicitly claim that it is communist?
What important events took place in my state during modern history?
What was the first mass movement that Gandhiji led in India?
Who started the Khilafat movement?
What other movements got co-opted into the freedom movement?
Who were the caste reformers from Maharashtra?
Who were the leaders of the farmers movement in my state?

F-1
What is the paper that you have worked on about?
What is a GAN?
What properties of the model did you discover?
Can GANs hallucinate like LLMs?

M-1
Is MBA just a backup for you?
Thank you.

Whole interview felt like normal conversation, it was fun talking to them.

Q&A;:
IIMA, 07 Mar, 8.15 am
2nd last in my Panel
2 Profs(one from Public Systems other from Operation and Decision Sciences)

S: You stay in a different place, but home is in other state right? Tell me how you can reach to home from nearest big city in the best way, dont tell me cab
S: How many stations in between by going by train
S: How much time it takes
N: What do you think of public consensus in the upcoming homestate election?
N: What party is going to increase vote share?
N: How is cpm doing?
N: Nice to hear the new generation thoughts, my generation thought still cpm has chance
S: Well cpm has youth leaders no, then why they have not much chance?
N: Have you heard about Epstein files? What indians are there in the list?
N: What are the consequences of being in the list?
S: So you are data scientist, what data science you work in your job?(Then asked more about how I use kmeans, how clusters decided, which features etc)
S: So tell me what is ML?
S: What is difference between supervised and unsupervised learning?
S: So kmeans is supervised or unsupervised?
N: Anything you create? Like music, sketch
N: What you use for sketching, what tools
N: Which character you drew
N: What was your motivation to draw
N: Oh you took from a story, which one?
N: What will you suggest among the three in news medium:
1) Crowd funded free media
2) Private funded corporate supported media
3) Govt subsidised media
N: Do you follow any sports?(No)
N: Tell me detrimental effect of Sports, here I mean it as team sports on the society

(Am not remembering more, I guess this was it)

Do you have questions?
1) Everyone tells 1st year is very rigorous, how much actually it is rigorous?
2) Do people lose sleep really in 1st year?

Got an eclair at the end

#THEOMI

PG: Not Available
Work Ex (months): 25.0
Certifications: Not Available

Background Notes:
B.Tech, Industrial Engineering (IIT Kharagpur), 2.5 years work-ex, 3 members in the panel - 2 middle-aged men & 1 woman

Experience Notes:
It was very difficult to understand if they liked me or not. Had a very neutral feeling during and after the interview about my performance. There weren't many noticeable expressions on their faces.

Q&A;:
1. So, these institutes of national importance, does it make sense to open them in small cities? Shouldn't these institutes only be opened in big cities? What is the benefit of opening them in small towns?

2. What metrics would you track to see whether this is actually helping or not?

3. How do you think IIMB has helped improve Bangalore? What metrics would you see to quantify the impact?

4. IIMB is planning to launch an undergrad program. If you are an investor in IIMB, will you be happy or sad about this decision? Why? What do you think will happen?

5. What is binomial distribution?

6. What is the Poisson distribution?

7. When does a binomial distribution become a Poisson distribution? (said I don’t know)

8. Is Zomato being fair to its merchants (restaurant partners)?

9. Don't you think it is unfair to charge such higher commissions?

10. Let's say you work in a microfinance company, and a farmer has come to you for a loan, but he does not have any land. On what basis will you give him a loan?

11. You have switched very frequently, 3 companies in 3 years. Why have you done that?

12. If you are now content with your 3rd job, why do you then want to do an MBA?

13. You are already at a high salary; you would be getting lower than that here. Why would you then want to do an MBA? Won’t you feel bad when you land a lower package than you currently have?

14. Key takeaways of the budget?

15. What is the tax evolution? (said I don’t know, since I misheard it as tax revolution)

Experience Notes:
Not Available

Q&A;:
1. Why MBA
2. Was talking to executive students and they mentioned that they've Copilot in their companies and they're not allowed to use Gemini. What advice would you give Sundar Pichai to capture the Indian market?
3. 5 layers of AI and who's making the most money
4. How would you calculate the size of the AI bubble, back and forth on that
5. Had a quote mentioned in my SoP, question about that
6. Why go for an MBA, AI is so fast moving and you're already in it
7. Social challenges for AI
8. If you're the chairperson of Niti Aayog, and wanted to design a 5 member committee to lead AI/Responsible AI who would you choose, cross questions on that

Background Notes:
Panel: 3 M (1 alumnus, 1 finance prof, 1 decision sciences prof)

Experience Notes:
They seemed pretty nice, lots of ‘are you sure?’s and looking at one another. Interview lasted approx 20 mins.

Q&A;:
M1: So you’re also a computer science engineer? Do you know computer science engineers are the mode of all the backgrounds we have received this year?
M1: What is mode?
M1: Okay and what is median? How will I identify the median of all the backgrounds?
M1: What do you do at work?
M1: You’ve written here that you have led out of X number of teams…. *paused for too long so I answered*. Yes you’ve written that. How many people work in your team? Based on what you’ve said it seems to be an equal split of projects between you and your colleagues.
M1: You’ve mentioned Y hours saved, why exactly Y and not say…Y+7?
M1: What do you do apart from this? I mean outside of work.

#THEOMI

M1: So you play chess… how many squares are there on a chessboard? What is the probability of me picking 2 black squares?

M2: So you've used AI in your NGO…not sure if you've used it at work. How much energy does one query require? Yes quantify it.
M2: So in terms of costs this is all OpenAI would have to bear? *lots of cross questioning about resources, costs and services*
M2: How much did you pay for your project per million tokens?
M2: Is Sam Altman still at OpenAi…I'm not sure? Do you pay his salary?
M2: *after some cross questioning* so you are saying you do pay his salary or no?

M3: Tell me the biggest decision you've had to make in your life.
M3: Why did you study at XYZ college?
M3: Tell me about a time where you have failed, and because of that you dropped what you were doing.

M1: Thank you, do you have any questions for us?

Q&A;:
P2 : Can you explain what work do you do
P1 : do you think ai and smart phones are making us dumb... I believe it is, disagree with the statement
P1 : Earlier I used to remember 1000 numbers, now due to phone I can't remember daughter's number.. its making me dumb isn't it.
P3 : Are you easily replaceable at your work.
P3 : Is your client product easily replaceable by new company.
P2 : What do you want to do in next 5-6 years
P1 : Is it really what you want? Whats immediate goal
P3 : Hobbies .. told few... Any other...
(Told mentoring)..
P2 : if student is in pressure of placement, losing confidence, and technical subjects prepration, we quantify these three parameters and we want to find out what is the major reason for his stress how would you do it
(I asked if he wants me to do feature selection)
He told exactly
(Gave couple of methods and explained in detail)
P1 : Ok any questions for us
You may go now, was last in the pannel, they told me sorry to keep you waiting
(Told totally worth it)
As I was about to open the door
P2 : before you leave just 1 more question, why didn't you apply for pgpba, isn't it very much align?

4THEOMI

15-20 mins, there was lot of discussion around work ex... overall good experience

Background Notes:
98.46% ile, 9/9/9, Banking Operations

Experience Notes:
Very conversational and a super engaged panel. They gave you the control to drive the conversation, and most importantly let you speak thoroughly. P2 was very inquisitive, P1 quietly listened except chiming in clarifications in between the PI. A was also listening for the most part, she asked some questions in between. Fun addition - the alum asked me to sing ■

Q&A;:
Panel: 2M 1F - P1 (M - Prof), P2 (M - Prof), A (F - Alum)

P2 - (opens the door and mispronounces my name)
P2 - so how exactly do we pronounce your name? (Banter) - this seems like a really good conversation starter. What's the most interesting conversation you've had around your name?
P2 - so what makes you THE candidate that we want to recruit desperately?
(Mentioned scaling a club - got cross questioned on this)
P2 - so what does a day in the life of a payments processor look like?
P2 - have you made any errors in your process? (Took the cue and plugged my project here)
A - so you're saying that the director chose you for the project only because you're young?
P1 - how many people were involved in this project?
P2 - okay, has there been an instance at work where there was an error, how did you go about to solve it? (I don't remember the question verbatim. Some banter and cross questioning)
P2 - so suppose you write a software and that doesn't work well, causes an error, how would you remediate, your supervisor is clearly not happy.
(I clarified that I don’t write code but I can place myself in the shoes of the 'error' bit)
P1 - Yes. Please think of it as an error committed, how would you justify to your angry boss?
P1 - okay that's a good answer. I have no more questions.

A - you've written that you enjoy jamming with your friends. Do you sing? (Me: yes). Do you mind singing for us?
(Me: 1000000%)
P1, P2, A - all smiling
A - so you seem very articulate, you're doing well in banking operations, don't you think you'll get a good career growth there? Why masters now?
(Some cross questioning here on how I can grow in the workplace itself, didn't get into any grilling tho)

P1, P2, A - do you have any questions for us? (No.) We had a great time talking to you.

Have a good day!

Q&A;:
IIM B (Mumbai - 19th Feb)

Profile - GEM Mechanical Engineer 9/9/9, 2.5 years work ex in consulting

Panel - 2 members M and F

20-25 minutes interview - Overall conversational and listening to you, but couldn't read them much

Questions:
M: What does GEP do?
M: What have you done in the company so far? (Gave few hooks picked up on the last hook in the next question)
M: So, if your clients are indecisive on whether to go buy using CAPEX or EAAS or Lease model, what factors would you be considering to come to a decision? (few back and forth on this)
F: Can you guesstimate the number of kg of coffee sold in a year in India?
F: So you have mentioned you help your sister with her instagram ran business, what do you actually do in that
F: What kind of clients do you handle
F: Suppose, you want to collaborate with an influencer for marketing your sister's business what factors would you take into consideration (few back and forth on this)
M: You have lived in Assam, Kerala, Mumbai - what are the cultural differences you have found how is one different and similar to others
M: Ok you have mentioned differences in food, people etc. But if an established business is settled in all

#THEOMI

three regions, how will they differ operationally in all the three regions (few back and forth on this)

Experience Notes:
I got fumbled and messed up such basic questions. I should have done better

Q&A;:
Iim Bangalore interview transcript
Panel members referred as M1, M2, F
Candidate referred as C
F: I read your SOp I found it interesting, there is a sentence that you.wrote : Perseverance is important and not when you start, what do you mean by that
C: explained
F: explain it by examples: explained by giving own example of how I faced issues in my childhood and later realised that I have to work on my academic
M1: give example in business context
C: told about the story of KFC founder
M1: tell me an example when opposite is true
C: told about the instance that I got to know later about jee in my 12th standard if I had known earlier I would have done better
M1: tell about a business situation
C : talked about the brand minimalist
M1: if you are entering a market with your product what will you do to make sure that you don't succumb to competition
C: told about creating a usp, brand recall value brand loyalty like louis Vuitton
And explained how nvidia had the first mover advantage and they capitalised on it and now they are the market leaders
M2: how much tax did you pay to the government last year
C : fumbled told 12%
M2: but there is no such slab
C: recalled that the tax has been exempted till 12lpa
Told that didn't pay direct tax payed indirect tax via gst
M2(visibly frustrated) : what are the tax slabs
C : explained -0%, 5%, 12%, 18%
M2: on which services can you pay 0tax
C: mentioned community service/ngo
M2: higher education?
C : recalled and said yes also no tax on education
M2: if I give you 2lakhs and ask you to spend in 2hrs how will you spend
C: fumbled big time - told how I would invest one lakh in sisters fee and 30k on community service and rest on household expenses
M2: asked won't you invest it
C: told yes could do that as well preferably in fd because I am a conservative investor
M2(visibly frustrated): why not in market

#THEOMI

C: I am a conservative investor I have some responsibilities to fulfil and hence less investment in market, prefer fd
M1: so you lived in Bengaluru and pune
What are the key differences
C: explained how Bangalore is hyper competitive and pune is more balanced
M1: a gcc wants to open their centre in india how will you convince them to open it in pune instead of Bengaluru or Hyderabad
C: explained how Pune is called the Oxford of East and availability of talent pool from top universities,. comparatively less industries so lesser competition and employee satisfaction even with comparatively lesser salary
M1: is employee satisfaction important tell me an instance were employee satisfaction can backfire
C: employee can get complacent and ignore upskilling
M1: is the goal of life to be happy
C: yes sir that is what I believe goal of life is to be happy until my actions are not harming anyone
M1: do you think mba from IIM Bangalore will make you happy
C: yes sir
M1: I don't think so

Q&A;:
Experience notes: panel was nice to me, *plenty* of chances to grill but jisko 100%5 karne mei 5 mins lage usko kya hi grill karenge. 2nd one on panel, people before and after got grilled. Overall felt that they were trying to see how I think. No why MBA no acads at all

3M - one old two young

P1: Do you work in Bangalore?
No I am from x, I came here for the interview. I am staying with my brother
P1: so you're not working
P1: For what CAT?
No, civil services prep, wrote 2025 mains (1.5 y gap)
P1: optional?
English literature
P1. Fantastic. Copyright valid till?
Indefinitely at least till the author's death
P1. Both are different things
Afaik death + some years
P1. Dead poets society do you know?
Haven't, talked about how literary works exist till eternity.
P1. How many I phones were sold in India last year.
Me: about 5% of the population given the ages, consumption pattern etc
Long back and forth P2 also jumped in trying to help.
P1. What is 5% of 1.4 billion?
Told 7,00,000 ■ (kya bolu aab I was so off)
Sir, actually I can't remember how many zeros are in a billion, he told me. Then the conversation shifted to crores etc etc. P2 tried to help me but I couldn't count the zeroes
P1: you can just use the scale you're comfortable with. You don't have to switch. The answer is 14 million.
Me: I was thinking along the lines of 7 million
P1: why do you think my estimate is higher? Did you not consider competition etc?
Me: internally: (mujhse toh zero hi count nai ho raha hai ■.) Sir I consider competition + age + that an average phone lasts 2-3 years before people usually switch + consumption pattern + income (internally bass maths nai aata)

At one point P2 literally made me solve 100%5 and then 700000*20 to help and I still was beyond help ■

P1: What is the custom duty on I phones?
Me: not sure but I think 26%
P1: why 26%? Between 0-100 is it your favorite number 26% ■
Me: no sir, its a luxury good so I was thinking along the lines of luxury goods (GST mei bhi slab 28 hai 26 nai ■■■■■■)
P1: is custom duty different from GST?
Me: i took some time to think but couldn't recall exactly
P1: no problem leave that. I phone consumption has increased, why?
Me: rise of middle class
P1: that is demand what about supply? Where does Apple manufacture its i phones?
Me: Tamil nadu so prices have gone down

THEOMI

Okay I am done.

P2 starts

So Upsc prep? Do you think its an efficient way of recruiting?
Talked about how its practical because of the number of applicants but 1st stage emphasises rote learning

P2: i meant what is the opportunity cost for the economy? Do you know what opp cost it?

Me: answered.
P2: good. Student sit ideal for so many years wouldn't it be more productive for them to get jobs?

Me: upsc coaching industry is itself huge + a lot of students who prepare do it because the job market offers no opportunity or under employment.

P2: what about recuruting like JEE? Aftee 12th have a year course

Me: wouldn't solve the problem because vacancies are limited so there would be a surplus.

This conversation went on. I said for his model to be successful there needs to be a cultural shift because UPSC is associated with social mobility (he countered with so is JEE) I said not as much because people go down the UPSC route also for power + prestige hence the surplus problem would persist unless like its done in foreign counties that civil services comes at par with any job + the UPSC prep itself could be structured and formalized for example interview candidates now are registered on Pratibha Setu portal

P3: Questions about my work ex (25 months at 2 places)
(Part 2/2)
About AI and content writing - plugged in my project and talked about how AI hallucination has created a new job profile for checkung content authenticity

About social sector - major challenge (working with people on ground something like that) how would you improve?
Infrastructure + mobility recruit co ordinators on field + internet connectivity + laptops so that a lot of the meetings etc can happen online

P3 : So this in on the Resource side.

I think he wanted to probe more but time was up

P1: so do you have any questions for us
It looked like he wanted me to ask one ■ but I said no sir and left
---

Grades- 9/8/7;

Experience Notes:
The interview was conversational, no grilling as such. Panel was helpful and listening to very carefully.

Q&A;:
P1 - So you have mentioned your dad owns a business (1 line in SOP in first passage).
What kind of business is this? How much is employee strength
P1 - What are the challenges and opportunities in it?
P1 - Why don't you want to continue with that , why MBA?
P1 - Suppose there is a cement company, and I place an order of 100 cement bags, what would be the logistics cost for the order to the company?
P1 - Asked about my current company, revenue, ebitda margin and growth.
(So the division where I work in my current company was acquired in 2019 from a different company)
P1 - asked about the details of the merger.
P1 - Do you think the merger was a good move by the company ?
P1 - Long term plans ?
P1 - You have mentioned three granted patents at work, explain about that ?
P1 - difference between patent and granted patent
P2 - What is vector and Matrix ?
P2 - What is calculus ? where is it used ?
P2 - What is differentiation ? what is integration? What is the use of it ?
P2 - Real life use case of mode
P2 - Which field of study in MBA ?
The third panelist was standing at the corner of the room till now, asked me to come near the window (the interview was at trident hotel in south mumbai, the view was good, buildings and sea)
P3 - Called my name and asked me to come near the window. Asked me what all companies do you see from here and their domain. Any company which is in recent news ?
The end

Q&A;:
Three professors (20-22 minutes)
P1 - A Male 30 or so
P2 - A Female 50 or so
P3 - A Male 40 or so

P2 - How are you doing
Told and asked her
P2 - You left your first job early
Answered to get into a managerial role and explained my current working

#THEOMI

P2 - Was it some issue at the organization
I said no and explained
P2 - What is your current role
Explained it well
P2 - How can AI impact your industry
I said it can't and give my reasoning
P2 - Has 2-3 counter questions on the same
I was able to answer those

P3 - Talked about my maths Olympiad and rank
I said it was in school
P3 - Will you be able to solve a probability question
I said I can try sir
P3 - Gave a puzzle - 50 red 50 black, probability maximise
I knew the answer but interview pressure again, did the first part right but missed out on the exact probability
P3 - Took college pors and asked why from tech to mba
I explained that I was handling the management and non technical aspects
P3 - A bit cross questioning
And I was able to answer

P1 - You have also applied for BA
I admitted yes
P1 - Do you follow current affairs
I said yes sir
P1 - Explained any impacts of any recent happening don't pick any geopolitical issue
I talked about the AI submit
P1 - some cross questioning and what was the mission and all
I wasn't able to fully answer
P1 - Just say you don't know
I smiled
P1 - Then chip manufacturing
Talked about semiconductor industry and how it can impact.
P1 - Wanted me to get specific
I explained the impacts of imports
P1 - Any mission
Talked about Indian Semiconductor mission and explained what it is
P1 - Do government really allocate this much amount
I say it will be done in parts sir
P1 - How well are you with stats
I said I am decent
P1 - Do you want to do BA
I said yes
P1 - Do you know coding
I said I have done coding in the past
P1 - explained where you have used stats in your coding
I told about my research paper and final year project
P1 - Had some cross questioning on the same
Answered
P1 - What is the difference between pgp and pgpba
Told the difference
P1 - What is the difference in the courses we teach in 1st year
I said I am not sure about this sir
P2 - You are interested in BA right and haven't applied just for the sake of it
I said yes, and haven't applied just for it
P2 - The interview is over

#THEOMI

I said thank you

Experience Notes:
Quite conversational PI. Didn't grill at all.

Q&A;:
Personal Background:
What is the meaning of your name?
What is the difference between your name and Samarth?

Work Experience:
What do you do?
What are your key responsibilities in your current role?

Industry Understanding:
Why are CCTVs used by people?
Why is there a rapid increase in CCTV adoption in recent years?
Apart from security, what are the other key reasons for using CCTVs?
What are the top global players in the CCTV industry and where are they based?

Manufacturing and Policy:
What percentage of CCTVs are assembled in India versus fully manufactured in India?
Under Make in India, what steps can be taken to develop a complete CCTV manufacturing ecosystem in India?

Strategy and Marketing:
What marketing strategies would you use to promote Indian-made CCTV products globally?
How can the global image of Indian CCTV products be improved?

Q&A;:
Q1. TMAY. Cut me off when I said assisting in website development in my workex
Q2. Female Prof started asking questions. Why do you do this as a CA, not the work of a CA
Q3. What different features are you providing as compared to screener
Q4. How can someone do analysis at your website
Q5. Prof 2 took up questioning. You are from non engg background, C is a quants heavy campus. I don't think you will be able to cope up (all nodding their heads with serious expressions)
Q6. Do you know calculus?
Q7. Do you know correlation and causality. Asked a real life example for correlation
Q8. What is regression. How is it different from correlation. Give real life example of regression
Q9. What is multiple regressions. How do you solve that
Q10. CAT %ile? Quants %ile? (Started nodding their heads while looking at each other)
Q11. CM of Maharashtra? When was he elected?

Overall was very conversational, they were more interested in hearing about my opinions on matters than just textbook questions

Q&A;:
P1:
Asked about Placements at my college
Replied it's an integrated BBA
Cross questioning on that
Mentioned POM was in my 1st sem, what did i learn
Questions on staffing
Then questions on AI and what is my opinion on the impact on the jobs
Cross questioning on that

P2:
More about principles of management and who is Henry fayol
And his any 3 principles
Demographic dividend of India and my opinion on that
What will be the challenges and solutions according to me
More discussion on that

P3:
Asked me about devi ahilya and questions related to history
Then asked me about MBO and bhagwat geeta's "karma karo phal ki chinta mat kro" and how they are interconnected

Q&A;:
IIM C (Mumbai - 9th Feb)

Profile - GEM Mechanical Engineer 9/9/9, 2.5 work ex in consulting

WAT- Bollywood movies are finding it difficult and there is no guarantee of success. Has the audience perception changed? What should the folks in bollywood do to address this?

Panelists - 3 male panelists

Overall 25-30 minutes very chill, very conversational helpful panel. They were taking time to listen and understand me.

Questions:
TMAY in brief
Are you good with maths?
Draw a 4*4 matrix with rank 2
Now I want you to find a 4*1 which when multiplied with the above matrix will give be a column matrix (he provided the column matrix). How many such 4*1 matrix will be there (Ans- infinitely many)
He changed one of the numbers in the matrix, now how many solutions (Ans - not defined)
For the function 4x^4-8x^2+8 =0 find the maxima. (I tried to the first derivative to find the zeros and then trying to find a maxima, he helped me and we came to a conclusion that the function will not have a maxima, as it is concave up - he told good and moved on)
You are a mechanical engineer? Do you remember?
What were your favorite subjects?
What is a Free body diagram?
What do you do in your job?
Who are your clients?
Why do they need you?
Take us through how you shortlist suppliers, what you take into considerations
In risk assessment, what do you do? (I mentioned we are not incharge of financial risk assessment but we mainly rely on client side and the D&B; data for it - he moved on)
Take us through your deep freezer projects
What do you want to do after MBA?
So you want to join one of MBB? (Sir I have not yet chosen my dream company, but those would be good environment to work to)
Do you want to do consultants in MBB typically do, and how is different from GEP consultants (Answered with an example)
What kind of clients typically come to GEP? (mentioned about for services, strategy, and software)
Mention about your efficiency improvement project you worked on (mentioned it and told we used RPA bot)
What is the difference between RPA bot and AI agents (explained)

Do you know ML? (Sir I just a very surface level understanding but never worked on it - then the other panelists interrupted saying in RPA there is not robots its just in the name, and no link to robot so don't grill him on robots and ML and laughed)
Do you read any newspaper? (Sir I don't read any particular newspaper but I stay up to date using the Inshorts app, and other online articles)
Who is the founder of Inshorts? (Sir Azhar Iqbal is one of the co-founders, he also appeared in shark tank, but I am not sure about the other one)
What current affairs have you recently followed?
What were some of the key themes in this year's budget? (mentioned semiconductor, agriculture, and orange economy?
Do you have any understanding on how youtube and youtubers earn money?
What is CPC, and CTR?
What after MBA? (asked again by another panelists)
Thank you have a nice day

Experience Notes:
Very Conversational Interview. Panel seemed to be interested in the depth of my work ex. Was interested in knowing my opinion on recent developments related to my sectors. They went into the details of work ex to the point one might see in a corporate job interview for analytics, minus the technical part.

Q&A;:
(I am going to hide company names and actual metric values. Also, adding only question sequence.)

P2: You have worked at Company Y. Tell us about the business model.
P1: What is the most important metric for such a business.
P1: What is the GPPO value of company Y?
P1: Gross profit is broadly the sales margin. Are you sure it is this high? Your sector should not be in the red if that is the case.
P1: You are including Brand Monetisation and Ad Income in GPPO? Why?
P1: What is AOV value of the three major players in this sector? What are the breakeven points.
P2: Tell us about recent developments in regulatory and political sentiment around your sector.
P3: Your opinion on Gig workers strike.
P2: What do you think about removal of "10 min delivery" tagline from platforms.
P2: You have also worked at Company X. Tell us about it.
P2: Who owns the loan evaluation decision in your lending flow?
P2: Tell me about the concerns RBI is having with regards to NBFC lending.
P2: What might be conflicts of interest a LOS platform could have with partner NBFCs?
P2: What concerns might a daily UPI user have with the revenue strategy of your company?
P3: Do you know about DPDP act?
P3: DPDP will affect Company X. I want you to think about how it will affect Company Y.
P3: How are delivery riders incentivised to work harder?
P3: Tell me a bit more about the specific teams and the nature of data you worked on at Company Y.
P1: What are your future plans?

#THEOMI

P1: Do you think of yourself as a disruptor or incremental thinker?
P1: You said incremental thinker. Do you think you can develop a disruptive mindset?

Background Notes:
9/9/9 BE CSE Percentile- 99.7. Work ex- 6 months as a data analyst and 1 year as a product owner at amex.

Experience Notes:
Some questions seemed tricky, and one of the panelists was frowning at almost every answer i gave, that is a strategy to simply test you ig. I gave my answers with confidence and backed them up with proper reasoning in this case.

Q&A;:
College- IIM C
Date- 17th Feb
Slot- Morning
Place- Delhi
WAT Topic- with the growing technology, data privacy and collective public safety are a regular concern. Present your views on this.

interview lasted around 20-25 minutes afair.
1. What brings you here
2. ■who is your role model in leadership
3. ■has she (my role model) done an mba?- i suggest to say someone who is at a leadership position with an mba.
3. ■name one challenge that you faced.
4. ■they drew a graph of log x to the base a and log x to the base b and asked me to identify which is greater, a or b
5. ■you have to fill a car with as many table tennis balls as possible. To solve this problem ask me (the panel) 3 questions that'll help you reach the answer.
6. ■how do you use AI in your current job
7. ■why did you leave your first job.
8. ■if a very talented player freezes before a match, what would you say to him so that he gets motivated?
9. ■since i play lawn tennis, they asked me the weight and the string tension in the racket.
10. ■suppose you increase the credit limit of a customer, what would be the plausible risks that could arise? Ans- risk of increased defaults
11. ■so what would you do to bring down the chances of this risk?
12. ■suppose there is a decrease in click through rate (CTR) in a home page, how would you know that this decrease is because of the existing users who stopped showing interest, or there has been surge of new users but they are not actively clicking. Basically, how do you distinguish between the new users and the old ones.
13. ■what could be the reason of decreased CTR?

Question 6,10,11,12,13 are related to my work experience

9/9/8; GEM; CAT 99.87

Experience Notes:
Was grilled a bit on business aspects of workex. The interview had lots of math questions. Felt like an engineering interview considering guesstimates also.

Q&A;:
1) TMAY
2) What is the difference between effectiveness and efficiency?
3) Amazon recently announced the unbundling of its subscription services (Prime subscription was 1500 which included Prime Video, 1 day delivery, etc. Now these are also sold separately at reduced subscription prices and with/without ads). How will this impact the revenue? Was asked a few follow-up questions on this.
4) You have two jars of 5L and 3L filled with water and an empty jar. How will you get exactly 4L of water in the empty jar?
5) What is logarithm? Draw the graph of logx.
6) What are the application of logarithms?
7) Guesstimate: Estimate the number of UPI transactions in a day.
A - Asked a few clarifying questions. Explained a top-down approach.
8) Follow-up: Can you give a bottom-up approach as well? Gave a few hints.
They were not looking for numbers as such, just all the variables that you are considering.
9) (Mentioned chess as hobby) Who got the first Grandmaster Norm from India? (not Grandmaster title)
10) Asked to draw a 4x4 grid. Count the number of squares in this grid. Answered. What if this grid was 50x50, no of squares? Answered. Was asked to give a general formula for nxn grid.
11) What other calls do you have?
Gave a chocolate.

9/7/8 GEM Fresher (2026 Passout) CAT 99.99 %tile. 3 Panelists (2F - P1 and P2, 1M - P3). ~20 minutes interview.

Experience Notes:
It was a conversational interview. No grilling as such.

Q&A;:
P1:
You've been waiting for a long time. What time did you come?
When did you come to Mumbai? Where are you staying?
Are you missing college classes for the interview?
How do you generally travel to college location?

P3:
What subjects did you study?
What is DSA?
What is complexity? Types of complexities?
What are sorting algorithms? Their time and space complexity.
What is paging and its techniques?
What is a tuple in DBMS?

P2:
Why do an MBA now?
Will you stop learning after MBA?
Did you sit for campus placement?
Is this just a trial run for you?
What happens if you don't join a college this year?

P1:
You studied Probability and Statistics. What are they?
What is conditional probability?

#THEOMI

What is Bayes Theorem?

P2:
I'm still not convinced about you doing an MBA at this stage. Keep in mind, this is an IIM faculty telling you that.

P3:
Have you been following happenings around AI?
Should a nation with population of 1.4 Billion focus on AI or jobs?
How will AI be able to create jobs?

What did you learn in Cloud and Microservices?
What are microservices?
How is a cloud different from Mainframe?

P2:
Which sectors will be impacted by the situation in Iran?

P1:
What are your hobbies?
What did you learn when you played state level basketball?

M1: TMAY
F: Explain your work at Amazon
F: Mention 3 problems you faced at Amazon

M2: Why did you resign last year?
M2: Asked about other calls and which interview was better. I misheard it as “bitter” and asked him again if he meant “bitter.” They all laughed and corrected it to "better.” I said B was better as it was more conversational.
M2: Rank ABC and don’t simply say C. I said I would choose B as I am interested in PM roles.
M2: Rate this panel. The female panelist said it was a tricky question. While answering they were all laughing.
M2: Asked me to comment on "DMK is emotive in TN elections" (Background: I am from TN)

#THEOMI

M1: Lignite vs coal (my dad works in a thermal power plant)
M1: Why are you using lignite then? I said that's what is available in our place. They laughed again.
M1: What are the alternatives your dad's company is planning?
M1: Asked me to defend lignite and coal as a lawyer. I answered.

Overall, they seemed satisfied and at the end they said they were done and didn't want to prolong the interview since I prefer short and conversational interviews (laughing here too). They wished me all the best for the future.

Background Notes:
Bsc HHA. Workex as a chef. 3 panelists. (p1 p2 prof and p3 alum)

Experience Notes:
Felt like a kindaaaa rejection and then consolation at end. Baaki toh it was grilling thoda bahut. No sophistry was allowed. Very honest (?) conversation.

Q&A;:
P2: Tell us about yourself quickly.

Candidate: Introduced using "Dum Biryani metaphor"

Got cut in between.

P3: huh? What do you mean by a biryani? Where did you get this "biryani recipe" from?

Candidate: Said it is self-created, because I am chef.

P2: exclaimed and said I remember reading your form right please continue.

Candidate: continued, layered personality, chef background, hobbies (reading, writing, ghazals).

P2: What have you been reading recently?

Candidate: Web novels.

P2: Is it like manga?

Candidate: explained the webnovel concept and the IP chain (web novel → manga → anime → live action).

P2: Favorite ghazal?

Candidate: Mentioned "Kal Chaudhvin ki Raat Thi" and "Ab Kya Ghazal Sunaoon".

Now P1 enters the room. They were about to ask why mba? But then they explained to P1 that we were asking him why MBA? Because he is a chef and very passionate about it. Told himself as a biryani.
Then

#THEOMI

P2: You said you were aloo in the biryani?
Candidate: No sir, the whole biryani

P3: Do you know na there are aloos in biryani?

Candidate: Explained Wajid Ali Shah exile (1856);

P3:Is this true?

Candidate:- Yes sir many historic records state so.

P3: Is this authenticated?

Candidate: Yes sir (it was infact not ■■■■)

P3: ok by whom?
(Faaaaahhhhhh.)

Candidate:- accepted it's not fully authenticated, more belief-based.

P3: exactly it is a belief not history. So say so.

P2 said to P3 that sir you would to definitely know you have published a paper on biryani's history.

P3: If you want I will share it with you

P1: Okay okay. Aloo se yaad aaya tell me which port was the one responsible for introducing Aloo throughout India?

P3: And also answer who brought it to India? I hope you know its not native right.

Candidate: Portuguese via Goa; also mentioned chillies from South America replacing long pepper.

P2 gave a remark to others that "Atleast someone who knows his stuff unlike others today"

P2: You are doing well — why MBA?

Candidate: started saying my prepared answer——

Cut me off in between and said do not tell of this (■■■)
P2: what is your vision?

Candidate: Work in strategic roles in hospitality or build own chain in India.

P2/P3: Do you know people from hospitality → MBA?

Candidate: Gave example (senior → McKinsey), admitted limited knowledge.

Panel: Mentioned examples (e.g., Lemon Tree founder), said expected you to do a little more homework.

P2: What was your percentile in cat?

P2: Then toh you will be able to do maths na?

#THEOMI

Candidate: Sir I have done maths till 10th and have——-

P2: Ye sab nhi jaan na mujhe. Seedhe seedhe btao maths kroge ki nhi? Else it is a zero and you may leave right now. (Khel khtm.■■■■■■)

Candidate: Said yes, willing to handle.

P1: How many varieties of chilli are there?
Candidate: Sir exact number is not known.
P1: no no just name few varieties.
Candidate:- Bhoot jalokia, guntur, kashmiri laal mirch ine from rajasthan.

P1: Good very good now tell me How do you measure hotness of chillies across groups? Suppose you have 5 people foreigner in a group how would you measure which chilli biryani is hotter?

P2: Have you understood the qs?
Candidate: said have understood the data portion not what is being asked? Do I have to tell which chilli is hotter at the end?

P1: No No how will you tell is what I am asking, suppose you have a mean of all 4 chillies then.
(Part 2/3)
P2: I suppose sir you have given the answer yourself

Candidate: Told yes sir it has to be done via average.

P1: Which average?

Candidate: Arithmetic mean.

P1: Now okay okay suppose you have a ■5000 biryani there would be n number of people willing to spend on it and if you have ■500 there would be n. Tell me how will you decide how to price your biryani? Which measure?

Candidate: Median, due to skewness/outliers.

P2: What is skewness?

Candidate: Variation of data from central tendency.

P2: Draw normal distribution curve.

Candidate: Drew bell curve.

P2: Draw skewed distributions.

Candidate: Drew negative and positive skew; initially struggled but completed.(kya gandi drawing hai bhai meri chiii same graph bnara dono baar explain krdia lekin eww■■)

P2: What kind of customers you get at Diablo high end low end etc?

Candidates: High end huge spenders due to alcohol.

P2: Where would you place Diablo in distribution compared to other restaurants who serve alcohol as in in-terms of how good?

Candidate: Said high-end, ~95th percentile; hesitated on side (right/left). Said right but eventually not very convincing they left. Told me to consider my answer post interview.

#THEOMI

Now P2 had started giving me marks, and asked
Panel: Do you have any questions?

Candidate: said yes and Asked P3 for best Kolkata biryani places aa he had published a paper on biryani.

P3: said wow and was pleasantly surprised, little excited and Suggested places.

Took out my handwritten list from pocket to add those names

P1: You are super focused man
P2: Ye industry wale hote he aise hai inme apne kaam ko leke keeda hota hai (still giving me marks btw)

P2: Wherever you go be focused ekdum like you are, you do not really need an MBA to be honest, you will do well without it, and wherever you go I mean that's your choice, Do not fret over where you do an MBA from you have gotten a very special talent not many have it. Although I should not be telling you all of this.

P3: Which restaurant is doing well in dehradun?
Candidate: Karigari
P2: Oooh yeah thats nice. Plus there are lot of sampling restaurants also opening have you heard of naar in kasol?

Candidate: Yes sir
P3: Kuch waisa kholo yaar phir mba wagera kuch nhi rkha

P3 was about to about to continue the discussion when P2 reminded interview is over.
(Part 3/3)
Laughed thanked and left.

Background Notes:
998, 99.93, Panel 2M 1F

Experience Notes:
Totally conversational, no grilling, no acads, no workex nothing

Q&A;:
IIMC
30.03.26 2M 1F
F: What is the meaning of your name?(Told, mentioned a song)
F: So for what thing you have dedicated life for?
(I said sleep for better grades, they laughed)
F: What are you going to sacrifice for in MBA?(I said building friendships, connections, learning in between)
F: So you said building friendships, do you know what capital is? Like capital market?
(I said no clue, she said try, I said any market which is capital intensive, I didnt know I was saying wrong lol)

#THEOMI

F: Any field you know which is like that? (I said semiconductor industries, told a bit about it somehow)
F: Are you dedicating your life for this industry?(Meaning of name still going on)
(I said no and was about to tell something then other prof came in)
M1: What managerial lesson you can find from Chander Pahar?
(Told about moving ahead without having clear path)
M: Lets say the protagonist was risk averse, what should he had done?(I said he would have ensured his survival first and wont take risky steps, took an example here from book where he did risky things)
M2: So you are interested in consumer facing industries, what kind of industry you want to go?(Told about hul, itc who produce daily commodities which impact our lives etc I want to be part in creating strategies etc)

isme bichme puchha tha iss field me kyu aana chahte ho, prof khudse boli money right? I said nahi not money, to dusra prof bolta kyu money bura hai kya, I said kaam me interest ho to money aa hi jata hai, sirf money ke liye kaam karna devoid of interest is not good

M2: So if you are interested in that, then why MBA, you can go to research and do a PhD where all the strategies are made?
(I said I took up job after UG and got interested during my job as it was similar to this, MBA i feel would be the bridge for the roles I want)
M2: Ok so you read books, how you see storytelling as a medium for managerial lessons?(Told that it is one of the most effective ways, one point we get to learn it in easy way also the retention is easier since we see ourselves in protagonists shoes many times etc)
M2: Do you follow stories of inventors?(I said not much but have read about apj abdul kalam's biography, isro etc)
M2: Ok so tell me was Thomas Alva Edison an inventor or entrepreneur?(I said a mix of both because he did so many patents then in later part of his career focussed on building business of his product like lightbulbs)
M2: Ok so this is why I asked you about storytelling, you should have paused a bit and thought about it. It is easy to say Edison was a mix of both but for us(he meant profs maybe or bschool as a whole) he will remain an entrepreneur because for any invention to see the light of day one needs a good distribution channel, entrepreneural mindset(he repeated entrepreneur quite a few times while he was explaining to me.
(I said then Nikola Tesla lacked in this aspect and he would have been more successful if he had focussed on this)

IIM Lucknow Interview Transcript

(20 minutes)
Two professors
P1 - A Male in 40s or so
P2 - A female in her 30s

#THEOMI

P1 - Does anyone tells you to wear coat and tie for the interview
P1 - Then why do people wear
P1 - Your collar button is open
I asked to close, he said no it's fine
P1 - TMAY, I start getting nervous don't know why
P2 - How you as a computer Science engineer can add value to an MBA classroom
P2 - Difference between AI and ML
P2 - Which is the subset of which
P2 - what is deep learning
P2 - Structure of AI, ML and DL
P2 - Application of DL in business
I asked specific domain or industry
P2 - Which domain are you interested in?
I said product marketing
P2 - Tell in marketing
I told about using celebrity videos
P2 - Is it legal or ethical, tell something else
I told about segmentation and explained to understand consumer data
P2 - What is STP
I answered
P2 - Tell with an example
Biscuits were on the table, use the biscuit example to explain the concept
Both seems satisfied
P1 - Experience with chatbot
I said I have a good experience
P1 - But, generally people have negative experience
I was explaining then got that he meant in customer service
P1 - Clarified the question
I explained and a long discussion with possible solution
Both the professors seem satisfied
P1 - what's your biggest regret?
I asked a clarifying question
P1 - What all calls you have this time?
I said I have all the calls
P2 - Anything
P1 had some cross questions on the same
P1 - India is a direct democracy
I agreed
P1 - Do you know the difference between direct and indirect democracy
I wasn't able to recall so, I admitted
P2 - A question related to economics, I haven't heard of the term
P2 - What is GDP?
Told
P2 - It is calculated on Market value or factor cost
Answered and then clarification on that
I explained real and nominal GDP, she seemed satisfied
P1 - Discussions about workex
P2 - That's why you are well prepared
P1 - What are your hobbies
I answered poetry writing
P2 - What genre do you write in
Told
P1 - Which language do you write in
I said English
P1 - Do you know anything about Hindi poetry

#THEOMI

I said I have written few in the past
P1 - Difference between a doha and a chaupai
I told with the best of my knowledge
P1 - Can you tell a doha and a chaupai
I said I know doha but not chaupai
P1 - Okay, what is the use of grammar in poetry, is it compulsory
I talked about the poetry license and how poets use it, both seems satisfied
P1 - Discussion about rhymes
I told no, rhyming is not compulsory and there are many poetry forms which don't want you to rhyme
Both the professors were satisfied

P2 offered a toffee
I said thank you

No grilling, just conversation

Q&A;:
Wat topic : Vitality over veracity: is social media damaging the societal relationship with truth?

Duration: 10-15 min
Noida Campus
IIML , slot : 12:30

Profile: 9/9/9 BBA, fresher
2 male panelist
P1: in his 50s
P2: in his 30s

P1: Saw the personal data form
Said you are from this college

#THEOMI

P1: Are you from this city (where college is)?

P1: Which school?
P1: How far is (my school) from xyz Road
P1:And where do you live in the city?
P1:You know about Rau, where is it located , well leave it

P1:Tell me something special about your city
P1:Any other thing
(I took 2 famous food names)
P1:Where can I find them?
Me: famous locations (1&2)
P1:Yes that is what you should have told us at first (laughing)

P1: so there is this famous mithayi in your city, kajuu...
Me:kaju katli
P1: no
Me: took other names
P1: no no
Me: sorry I don't have a sweet tooth so I don't know much
P1: it's alright
P2: ghar par mehman aate hai to unhe mithayi nhi khilate (laughingly)
Me: We do, these mithayi are fav of our relatives (took some name also told the name of the shop)

P1: you have consistent score (92,92,92) it is difficult to maintain
I smiled

P2: fav subjects from UG
P2: define marketing
P2: Have you learned about Ansoff grid, draw it
P2: where is it used?

P2: have you heard about gig workers' strike, what was it about?
P2: your opinions
P2: if zomato offers you a job as a manager will you accept it and why?

P2: do you think 10min delivery is justified

P1: are you comfortable with maths
P1: what is x^0
P1: derive it (I said I don't know the derivation)
P2: how to inverse a matrix
P2: solve it on paper
P2: you can go
Did you get ABC calls?

Background Notes:
GEM Fresher 9/9/7 , BTech Mechanical, 99.95%

Experience Notes:
Really short and conversational interview.

Q&A;:
WAT Topic : Virality over veracity: Is social media damaging our relationship with truth?

Duration: 5-7 mins
Noida Campus
IIML , Slot : 12:30

Two male panelists (P1 in mid 50s and P2 in mid 30s)

P1: TMAY and Why MBA
P1: Interrupted me to ask about my internship I did at an NGO.
Had some discussion around that, my roles and responsibilities over there.

P1: Heard your college placements are good. Why MBA as a fresher then?
Told about job offer but want to expedite career growth, etc. Seemed satisfied.

P2: You said you are good at maths. So tell me what is 1.5 factorial.
Tried guiding me by making me graph the factorial function but I couldn't really understand how to reach a conclusion and finally said I'm not sure.

And then they were done. Asked about other calls and priority order of them.

P1: Ok you can go. Thank you.

Background Notes:
Grades: 9/9/7 | Percentile: 99.90 | members of the panel: 2 | UG: B.tech in Electrical Engineering

Experience Notes:
Overall, a pretty decent interview. P1 startled me a bit but it was managed somehow

Q&A;:
Two professors:
P1: Male professor, Economics background most probably
P2: Female Alumni
Duration: 15 minutes

P1: TMAY
P1: Do you think AI will make software development jobs obsolete?
P1: You had economics in your 1st semester. What books did you refer to? (I didn't know this.)

#THEOMI

P1: You don't know about one subject that connects you to MBA. Convince me why we should select you. Sell yourself in 40-45 seconds.
P1: What is the demand supply curve? Draw it
P1: What are 4 Ps of marketing
P1: What is repo rate? How does it affect the economy?

P2: Do you follow international news?
P2: What is BRICS? Why is it recently in the news?
P2: You like anime. What's your favorite anime (I mentioned it in my TMAY)?
P2: Who is the creator of it?
P2: What leadership skills did you learn from it?
P2: How does it represent Japan?
P2: There are many shows like Shark Tank promoting startup culture. How is it beneficial?
P2: How is it negative?
P2: Give us feedback about yourself. Your personality, strengths, and weaknesses.
P2: What if you wake up tomorrow and get to know you're not selected? What will be your reaction?
P2: Okay, that's it. Here, have a dry fruit. (They didn't have toffee.)

Acads: 9/10/9, UG: BTech CSE - Tier 2, Work Ex: 48 months as SDE, 2 panelistis both male

Experience Notes:
The interview was very conversational in nature

Q&A;:
P2: What does your name mean? Asked 2 more questions related to the context I provided
P1: what exactly do you do in your current role, asked about the tech stack
P1: Tell me about your hometown. Why do you think the outskirts aren't explored much? What kind of tourism opportunities are there?
P2: What exactly does your company do, and what are its main products?
P2: what are the general security and privacy concerns regarding client data?
P1: tell us about your current hobbies?
P2: How much do you understand about equity and financial instruments? Can you tell us a bit about that?
P2: Since you have work experience that's greater than the average for your batch, how are you planning to approach placements?
P1: Companies often prefer students from IITs or NITs as well. You'll have to compete with almost everyone, wouldn't that put you in a tough position? Few more questions on that.
P1: What kind of roles are you open to?
P2: Do you have any particular company in mind? P2: Any other companies you're interested in?
P1: Is there any other domain you'd want to switch to?
P2: Would you consider finance consulting?
P1: What about companies like (mentioned some company names) are you interested in any of these?

Conversational Interview. Basic discussion on Work Ex and impact of AI on jobs. Very slight probing on why fluctuations in acads (mine are a bit shaky in UG).

Q&A;:
P2: Tell us something not shown in your form.
P2: Explain fluctuations in your UG scores.
P2: How long before AI eats up all the software jobs?
P2: What are the limitations of AI?
P1: What calls do you have?
P2: What is your order of preference among BLACKI?
P1: How should AI job displacement be handled by government/society?
P2: What kinds of analysis have you worked on at your company?
P2: You have done quite good in your jobs. Why MBA?

Background Notes:
Engg Fresher (CSE) 9/7/8. 2 Panelists, both Male (~35, ~55).

Experience Notes:
Conversational, 10-12 minute interview. One panelist was an Econ proff, the other was Marketing (Which is why they probably didn't go into deep CS)

Q&A;:
TMAY
(Had mentioned a fantasy football activity in TMAY)
What is happening in the Indian gaming ecosystem?
What is your opinion about the ban on real money gaming?
Why is gambling banned in India?
Which items are most taxed?
Some more discussion on do taxes work etc.
4 Pillars of OOPS
How do you measure the complexity of algorithms?
Types of Time Complexity?
Did you study any management concepts?
What is the MBA curriculum?
Textbooks of Fundamentals of Management and Behavioral Economics?
Which calls do you have?

Work Ex (months): 17.0
Certifications: US CMA

Background Notes:
98.46%ile, 9/9/9, GNEF

Experience Notes:
Not very happy with the academics based line of questioning - got grilled and sort of mocked on a statement for 10mins. They were mocking and laughing a lot of the time. M was constantly on his phone or chewing gum, looking out of the window. I tried to keep my composure as much as I could, held a smile mostly.
GK, work experience related questions were okay. Felt nervous at a point and this was noted by the interviewer.

Q&A;:
2 Profs - 1M, 1F (Both Economics/Finance I presume)

F: How do you pronounce your name?
M: what does it mean?
M: TMAY
M: So are you good at Management accounting?
M: what is overheads? (Back and forth on this.)
M: "Products consume activities, activities consume resources and resources consume costs" do you agree?
(Around 5-6 minutes of grilling in this regard: I said yes, and defended, but he wasn't convinced. Lot of

#THEOMI

mockery and jibes thrown at me in this segment. This is the portion where he noticed I was nervous, asked and I said I was a little nervous - replied with "yes that's our job")
M: So assume there's a production capacity of 10000 units and as per budget you have produced only 9500, what do you do? (Another 5mins of back and forth - eventually answered Fixed costs being with a hint)
(Apologized that I wasn't able to defend my stance well but still do stick to it)
M: how many years of work ex?
M: what other calls do you have?
M: what is balance of trade? Balance of payments?
M: current GDP, GDP % growth

F: Why MBA now?
M: (mocking comment)
F: what is the level of UPI penetration in rural areas? How can we increase it? (Picked on "payments" from my work)
F: but first you need to have people with bank accounts right?
F: what is inflation?
F: how does RBI control inflation?
F: how does blockchain and AI help in payments today?

M&F;: no more questions, have a good day.

Experience Notes:
Felt good. It lasted around 30 mins.

Q&A;:
No TMAY
P2 Youve scored 100 in maths in 10th are you good at it? I said yes, she seemed satisfied.
P1: Why have your grades dipped in graduation? I mentioned some extracurriculars and acknowledged not being able to balance it properly but have learned from it now, she seemed satisfied with the answer.
P1: why mba why not a job first? Gave answer, no cross questioning.
What have you studied in graduation? I said finance.
Asked NPV IRR GDP GNP. Answered
P1: What mathematical subject have you studied? I said statistics. He asked what in statistics? I mentioned correlation regression skewness etc. And continued about how i applied these in my research papers in college.
A bit of discussion about the paper and some questioning on stats concepts like hypothesis, anova etc.
P1: What is the impact of middle east war on india? (Oil, stock market, fii, gold silver impact)
Will it have a long term or short term impact on india? (I said short term and gave some reasons)
Who is affected by the lpg crisis the most? (Mentioned the percent of domestic vs export supply of lpg and then told about the restaurants)
How is the budget different from last year? (Said i wasnt aware about last years budget but continued to give all the main points of this years budget)
Have tax slabs changed? How much will a person have to pay in tax if their income is 11L? What is the threshold for tax rebate?

#THEOMI

Youve pitched yourself, now tell us a weakness.
What are your hobbies?
What other calls do you have? Why lucknow?

2 yrs work experience as territory service manager at Hero MotoCorp, b.tech (mechanical eng.), 2 male panelists P1 (Possibly from engg. background), P2

Experience Notes:
Chill interview. P1 was very jolly and chill. P2 was calm and relaxed

Q&A;:
P1. So, who is (my name) ? (Based on the form essay question "who am I ?")
P1. So u mentioned u have been to different places. Mention any 3 differences between Odia community and

#THEOMI

Marathi community
P2. Since u worked at Hero, tell me the impact of EU-India FTA deal on automotive sector.
P2. What will be the impact of US takeover on Venezuela on automobile sector?
A : Faltered, couldn't answer correctly
P1. Explain the mechanism of bicycle chain with diagram.
A : Drew the diagram
P1. (Follow-up question on the same) Explain why the 2 sprockets have different diameters.
A : Tried explaining the link between velocity ratio with diameter ratio using formula, couldn't remember the concepts correctly, ended up confessing that I couldn't recall
P1. Explain about ur work experience. What did u do ?
P1. Explain the 3 main challenges u faced.
P2. U spoke about customer satisfaction. What was ur approach for evaluating this?
P2. Who were detractors? (Related to the previous q)
P2. U mentioned CEI. Some organizations use NPS. What is the difference between the two, and why they prefer one over the other?
A : Told the difference as per formula. Explained as per my guess which is better, though not sure if it was correct.

9/9/9, 98.46%ile, PGP & PGP LSM interview

Experience Notes:
Both the profs seemed sweet and were pleasant throughout. No exaggerated expressions or comments. It was about 20mins long, was able to answer 80% of the questions in a calm and composed manner. Not sure what it'll translate to.

Q&A;:

#THEOMI

2 Profs - M - Finance (P1) and OBHR (P2)

Interview
P1&P2;: Initial ice breaking banter. Exchange pleasantries
P1: So you work with Deustche Bank?
P2: How do you pronounce it and what does it mean?

P1: What do you do at Deutsche?
P1: What is the relevance of SWIFT in today's world, given the situation of sanctions?
P1: Who is the new FED chief? What do you think is happening to interest rates and your opinion on Trump appointing?
P1: Is inflation a good thing for an economy?
P1: Who regulates UPI in India?
P1: What is the difference between expenses and expenditure?
P1: What is the difference between cash and money? What is the color of money in India?
P1: Where are you from? Do your parents work in Karnataka?

P2: Okay since you grew up in Karnataka, do you know Kannada?
P2: Which minister represents Karnataka in the Union Cabinet?
P2: Why did you apply for Liberal studies? What do you know about it? Did you apply only because it was on the form?
P2: What comes to your mind when I say CRISIL and CIBIL?
P2: What aspects are taken into consideration for a CIBIL score?
P2: If you were to be the PM of the country, is there a way you could become one without contesting any election? There is one btw.
(I asked a follow up question)
Not during an emergency either, there was one PM who served full term.
P2: Under whose prime minister-ship did we see an emergency?

P2: What other top 6 calls do you have?

P1&P2;: Have a good day, you may leave now. Thank you.

(Did not offer a toffee TT)

Background Notes:
2 profs - M (Finance prof), F (Econ prof)

Experience Notes:
Overall: The interview lasted for around 15 minutes. They seemed sweet, heard they had asked more complex questions to the candidates who went in before me, not sure what to make of this though.

Q&A;:
F: TMAY
F: What are your strengths and how did your extra-curriculars help in developing them.

#THEOMI

M: (mentioned the project I'd developed for an NGO – he seemed interested). Tell me more.
M: How did you develop this? Wouldn't you have to train this model on existing data? How did you calculate the accuracy?
(I continued talking about my strengths after this)
M: Do you know about the recent Anthropic news?
M: How will this impact the industries you've mentioned, don't the models have to be trained…won't that take time?
M: Are you comfortable with maths? In a bell curve, where do the mean, median and mode lie. Draw it for me.
M: (mentioned skewness) Draw that for me as well and how that impacts the central tendencies. (some more cross questioning).
M: What is SD? What central tendency is it calculated on? How is it calculated? How is it different from variance?

F: Tell me about the digital revolution.
F: Tell me about the IT revolution then.
F: (mentioned demand) All industries are in demand, that's why they make an entry into our country. That way the energy sector is also in demand. What is different about the IT revolution then according to you?
F: Thank you, you may leave.

(didn't offer me a toffee :( )

up or was great.

hope they pick me ■

Q&A;:
The panel were 2 women, One of them is a Professor, not sure of the 2nd one.

The 2nd Lady was very sweet, smiling al through the interview, the 1st one also was smiling of most of the time , unless when she asked questions.

P1 :. Where you are from?

P1: So your college is from Tirupati, you must have been there often, so what are some management systems they follow and how donyou think they could improve upon that?

Me: Told some stuff

P1: what are some major businesses that thrive due to Tirupati ?

Me: Told about some major supliers to Tirupati and their dependence.

P1: They are this major exporter for hair right!

Me: realised I forgot it , and told yes Indian hair has a heavy international market and it's pretty expensive in places

P1: What happened in your College, why the sudden dip in your 3rd year?

Me : told my stuff

P1: Ok Tell us what kind of industries or entities have you read and researched about recently,

Me : Told abt Indigo, and why is it a interesting case study even prior to the recent controversy.

P1: Do you think what Indigo did is right in the recent controversy?

Me : told my opinions on it and said it's a bit of a controversial statement to make from my side.

Now The 2nd person started

P2: So you have been living in Hyderabad, so what are some policiesimplemented by the govt that have grabbed your attention in Telangana.

Me: kinda didn't expect this domain, I took a minute and then came up with some recent plans in Hyd Metro abt connectivity and stuff.

P2: So patancheru is a major growing Industrial Hub in hyderabad right, but it causes a lot of pollutions and many ppl of the lower tier background are the worst hit, how do you as a policy maker would handle this. ?

#THEOMI

Me : Told abt how we can incentivise the the industries to pick up sustainabile practices, stuff like CBAM like taxes and things.

P1: * Interrupted me in between when im kinda contradicting my own points in some places. *

P1: ok that great so far, Tell us some places where we can find the best Hyderabadi Biryani

Me : Gave some options like if you want Aroma theres this, if spice if the priority then this etc.

P1: That's okay, but where would eat?

Me : ok then, theres this place which i feel like they hit the sweet spot between the spice and Aroma, I would suggest that

P1 to P2: great then we are going there tonight.

P1 and P2: Ok , we are good with the interview. You can leave .

Me: thanked them and left.

I remained positive throughtout the interview, one of the interviewer was very warm and smiling throughout the interview plus i got to talk about all topics i wanted to highlight. But the interview felt short.

Q&A;:
Q1) we see that you have opted for all the programs, what's the reason
A1) my background matches all the programs but my preference is pgp

Q2) what is liberal arts education, how has that helped your at work
A1) Answered with qoating one of my work project

Q3) jack of trades master of none, what do you say to that
A3) Answered

Q4) Any current affairs you are following
A4) yes, Bangladesh usa trade deal, relevance to my project

Q5) would it be benefitial if India does policy like bangladesh with usa
A5) Answered

Q6) what is the economy moving towards
A6) there is protectionisim but it has also excelerated diversification in trading partners. Quated Uk and

#THEOMI

India deal

They both looked at each other and said they have no further questions. Asked me if i have any i said none.

Interviewers did not let me finish the sentences, were cutting off every sentence. Did not give time to think. Overall was a good experience for later interviews. Did not ask about GK, Acads, work experience etc.

Q&A;:
P1 asked about upsc gap and what stages i went to
I explained
P1: where do you want to work
told social impact consulting
P1: So, companies like Sattva and Samagra, but they dont come for placement at IIMK
explained that i want to start working in general management initially to gain experience
P1: so which companies then
told BCG, AT Kearney
P1: whats BCG (told -Boston consulting group), tell me the revenue (i wasn't aware of this)
P1: do you think consulting companies are in profit
i said yes then went on explaining that they are legacy companies
P1: not all legacy companies are profitable, Nokia went in losses
I said yes, it was short term loss because they did not keep pace with market requirement
P1: does Nokia still exist and what does it do
I said yes it does exist, providing third party services but couldn't remember which services
P1: asked whats Ltd, in DRL
i was not sure of this and went on telling about privately traded shares and then he asked about difference between crowdfunded chit fund and a trade company

Then P2 took over with a page from times of India which had an Advertisement about Loreal Paris social impact advertisement and asked me to interpret the numbers and why
P2: What are the renewable energy initiatives taken by government
Told about solar and wind but missed EV which she added
P2- calculate the probability of you getting into IIMK

Overall I feel It went decent, felt bad that i couldnt answer G7/SAARC question, Profs were good, I heard one of the panel was dreadful

Q&A;:
2 Profs, 1 M, 1 F
F: Introduce yourself in brief.
F: Why you want to do MBA, Why not MTech, and do research etc
Me: Answered saying I want to move to strategy roles, and want breadth in the work(she gave a slight smile when she heard the word strategy)
F: What is strategy
Me: Tried to answer by making up something from what I know(I think I explained here what planning is)
F: What is diff bw planning and strategy
Me: (After 2 sec) I don't find diff bw two
F: Think
Me: (After 5 sec) Words seems kind of synonym, not able to find diff.
F: Who is brand ambassador of Rajasthan Tourism
Me: Don't know ma'am
F: You should know, Rajasthan is popular for tourism. Who is chief minister of Your state?
Me: Told
F: Why Jaipur is called Pink City
Me: Answered
F: History behind Pink City name
Me: Not aware ma'am

M: You mentioned Fintech, what is it?
Me: Explained it saying that financial products but offered through technology platform, then he asked, Are banks fintech, I said, yes, some Neo banks are, Then he asked what about SBI, it also has Net banking, I said that fintech is recent term and mostly not used for such banks, but I would consider SBI Net banking a fintech product as it is a digital finance product.(Prof tried to put pressure in this cross questioning I felt)
M: Lets test some maths, Explain Gaussian Distribution(I said don't know sir), what about Normal distribution, draw it? And How variance impacts it
Me: Explained it, also explained the impact of variance in a sheet given to me.
M: What is revenue, profit, headcount, office locations of company I worked for?
Me: Answered
M: Do you know about SAARC?
Me: All I know is it is a group of countries, but not sure of the purpose of this group and countries in it.
M: What about G7, G20?
Me: Now sure about it, I have some idea, may I attempt answering?
M: Sure
Me: Sir, G7 is group of developing countries like India, Brazil, Russia, china,….
M: That is BRICS
Me: Ok, I think sir G7 is the group of 7 western countries, USA, Canada, UK, Germany, Israel, France,...
M: Which one left
Me: I am not able to recall
M: Which other calls you have?
Ended.

Q&A;:
1. How are you?
2. Where do you work?
3. Which fund do you work for?
4. What type of companies does your fund invest in?
5. What is the typical deal size?
6. What exactly do you do in the fund?
7. What returns does the fund typically make?
8. Do you get carry as well?
9. What is the lifecycle of your fund?
10. What are the risks involved in the type of investments your fund makes?
11. You already have a very good profile. Why do you want to do an MBA from here?
12. Why not go to Harvard or Stanford?
13. Can you give an example where you felt you lacked business understanding despite strong technical knowledge?
14. Can’t you learn these things by continuing in your job for a few more months since it’s a small team?
15. How is the venture debt industry doing currently?
16. How is your fund different from other venture debt funds?
17. If you put a covenant requiring an equity raise and the company fails to raise equity, where will they get capital if you recall the debt?
18. What do you do apart from work?
19. You mentioned running — did you run a half marathon recently?
20. What other interview calls do you have?
21. Between PGP and PGP-Fin, which program would you prefer?
22. What is your dream company?
23. Why not KKR?

#THEOMI

24. Can you explain Standard Deviation with an example?

BSc HHA. Work ex as a chef. Two Profs both male.

Experience Notes:
felt they were trying to pressurise me and looking for points to grill me with some sarcastic remarks here and there and trying to push me a lot.

Q&A;:
P1: Introduce yourself with something that is not in your application form.

P1: You are a hotel management graduate and culinary specialist . What is umami?

P1: You mentioned liking Italian food. Do you know about [specific Italian restaurant]?

Candidate: Apologized and stated unaware of that particular restaurant.

#THEOMI

P1: What is molecular gastronomy?

P1: What about [asked about some specific sensory tests]?

Candidate: Stated unaware of that specific concept.

P1: But aren't you a culinary specialist?

Candidate: Explained that molecular gastronomy is relatively niche in India, mostly found in fine-dining/Michelin restaurants, rarely taught or practiced widely, not part of general hospitality curriculum too.

P2: I missed your introduction earlier. Where are you from and what is your background, you did not tell.

(pehle you khud ask me to introduce without application form now this ■■■)

P1: Apart from kitchen work, what else do you do?

P1: So you do not like reading news, huh?

Candidate: No sir I do read them.

P1: Tell me some news.
Candidate: Sir foremost I would start from my own industry——-

P1: Stop Stop I know LPG crisis everyone knows I do not want to know that.

(■■■■■■■■■■■)

Candidate: Sir can I still discuss about the war?

P1: Upto you.

Candidate: Discussed Iran-Israel tensions and implications for shipping routes, fertilizer imports, pharma supply chains, and submarine internet cables.

P1: But Iran is not doing anything.

Candidate: Explained strategic pressure without action, threats affecting global markets and trade logistics.

P2: I see you applied for PGP, PGP-LSM, and PG Finance. Explain your choices, dont give us fluff give us honest answers.

Candidate: Admitted PG Finance applied out of curiosity; (Both started laughing and said good that they did not select you for this then■■)

P2: So LSM you are interested in?

Candidate: Explained interest in PGP-LSM due to hospitality electives.

P2: If you convert both PGP and PGP-LSM, which will you choose?

P2: What subjects are taught in PGP Year 1?

P1: How strong are you in quantitative data analysis?

#THEOMI

P1: Mean, median, mode — where are they used?

P1: Suppose 18 rooms cost ■5,000 and 2 rooms cost ■1,00,000. Would you still use mean?

P1: How many modes can a dataset have?

Candidate: Explained concept; initially reasoned multiple modes possible, later clarified datasets may also have no mode. (Messed up ye)

P2: Who is the governor of Uttarakhand?

P2: Where is the Strait of Hormuz?

P1: Where is Kozhikode located?

Candidate: Kerala.

P1: Are you sure its kerala? Are you not reading news?

Candidate: sorry sir its Keralam now.

P1: What is the capital of Keralam?

P1: What language is spoken there?

P2: Who is the chief Justice of India?

P2: Who is the vice president of India?

P2: Who is the RBI governor?

P1: Do you know a Union Territory shared by three states?

Candidate: Attempted examples but ultimately did not know. (■■, it was Pudducherry)

P1: Who was the last Deputy Prime Minister of India?

Candidate: Admitted unaware. (Abhi tk mera hogya tha■■)

P1: That’s all from our side.

Candidate: Thanked the panel.

P2: You may take a Mintos before leaving,
“Isko khake tumhare dimaag ki batti jl jaegi” Both started laughing. (■■■wow just wow)

Candidate: Thanked them again and exited.

Certifications: Not Available

Background Notes:
9/9/8

Experience Notes:
2 panelists: 1M (Finance I think), 1F (Marketing). Both were very friendly and was a conversational interview

Q&A;:
1) [M] How are you?
2) [M] So you work at Amazon. What makes you do an MBA? You might not get a salary hike or a very marginal one, isn't there a high opportunity cost?
3) [M] What do you do at work?
4) [M] Shouldn't you consider climbing the corporate ladder to become a manager?
5) [M] What did you pursue in undergrad?
6) [M] What subjects do they teach in Aerospace? - Mentioned few subjects, no questioning on this further
7) [M] So you did not see opportunities in aerospace and became a software engineer? Now you are doing an MBA. Tomorrow you might leave this and do something else. Explain me this career path.
- Gave a rationale for each career choice, mentioned minor degree in Data Science and AI, mentioned career options both in aerospace and software and my decisions. Seemed convinced.
8) [F] But now your job will be taken over by AI?

#THEOMI

- Said some aspects would be automated, but new roles would also be created (AI reviewer).
9) [F] What new roles would be created due to AI?
10) [F] Do reviewers need to have any new skillsets?
11) [F] Can an AI not review another AI's code? Why is a human needed?
- Mentioned few examples where this would not work and outages in Amazon due to this.
12) [F] What exactly is AI used for in your work?
13) [F] Do you do vibe coding? (■)
14) [F] Why are so many software companies using AI right now?
- Explained lower turn around time (months to weeks) for software development is needed so companies are encouraging AI usage.
15) [F] What are the business divisions at Amazon?
16) [F] Are these the only ones? (Forgot to mention devices (Alexa) earlier, mentioned it later)
17) [F] What is the impact of the ongoing Iran war?
18) [F] (Cut off in between) What is the root cause of the war?
[F] That's all from our side. It was great talking to you.
Gave a chocolate.

Experience Notes:
Panelists- 2 Male, 1 in mid 30s (Operations Management Prof) and 1 easily 50+ (Finance Prof)

Overall experience - I was the first in my panel. Felt both of them were warm and comforting. The old guy had a very straight face intitally, but later he was laughing and smiling constantly which boosted my confidence further. Felt it went well although could have answered few questions better.

Q&A;:
Extempore topic- Is AI making human life efficient or is it making them lazy?
30 sec to think, 1 min to speak. Was allowed to jot down thoughts in paper.

Enters room.
B- Good afternoon! (was waiting for P2 to come and sit)
P1 and P2- Good afternoon, please sit.
P2- Tell us something about yourself.
B- Talks 5 points for 15 sec and was cut immediately after mentioning work ex.
P2- So you are working in Bangalore or Chennai?
B- I interned in Bangalore and working in Hyd.
P2- Oh ok. Can you describe what does your team do.
B- Told we offer custodian services and support market processes.
P2- What are these services? Walk us through your day in work.
B- spoke about portfolio management, reconciliation and ensure timely trade matching and settlement.
P2- How frequently do you do this position reporting.
B- Told happens everyday, posted to client report every month.
P2- every month? Isn't that too late?
B- Told how few charges hits firm from exchanges only monthly and others are posted as and when occurred.
P2- So do you speak to client directly?
B- yes, we are client facing
P2- Do your clients not shout at you for charges that are passed back?
B- Told yes sometimes they do (both smiles)but we back up with sufficient proof so that they get convinced.
P2- You have studied economics. Tell me what's elasticity of demand
B- Told
P2- what are the factors that affect elasticity
B- price, income and other external factors
P2- Are you sure, nothing else?
B- I'm able to recall only these
P2- What's cross elasticity
B- (realises what I missed) told answer for both qs
P2- What's the elasticity of demand for Onion
B- Told D less than 1 (relatively inelastic)
P2- Are you sure it less than 1 and not 0
B- 0 is when demand does not change irrespective of the factors change. In my opinion, onion is not a

necessity taking into consideration all people who do not consume onion so it won't be 0.
P2 and P1- laughs for 5 sec
P2- That's a good consideration. So you're telling us that you don't eat onion
B- No, i eat onion but I grew up with few friends who do not
P2 laughs again
P2 Ok ok. What's giffen goods. Does the normal demand graphs applicable to them?
B- Told
P2- can you give examples
B- (couldn't recall but saw one BMW passing by from the window) For example, if you own a Maruti Suzuki basic car.. P2 intrupts
P2- So car is a basic need? Give me an example of basic need
B- (thinks for sometime) I'm not able to recall a better example.
P2- It's ok. I'll let P1 take over
P1- Do you know what is PLI
B- Sorry sir but in what context
P1- Production Linked Incentive
B- I know the basic crust of it but not in depth
P1- Looks at P2 and tells -of course when we give you the full form, anyone will know basics. Do you recall reading anything about this in budget?
B- Sorry, I am not aware
P1- Ok, tell us whatever you know about PLI
B- says basic stuff
P1- Ok let me put it this way. Who gives this incentive
B- Govt
P1- Yes, to whom
B- Manufacturing sector
P1- and what are these called
B- Subsidy
P1- So on what basis do they give this?
B- based on production level
P1- so which companies might not get this?
B- maybe industries like tobacco and luxury cars.
(Part 2/3)
P1- right so now what is the budget discussion about this?
B- I don't know
P1- Fine. What other key takeaways from budget?
B- Told few schemes on manufacturing side and STT tax given my market facing role
P1 was about to ask something but P2 intrupts
P2- How is Futures different from Options? Aren't both the same?
B- tells about obligation vs right
P2- Haan but it's same na?
B- Explained with the cookie jar that was present in the table
P2- (convinced) ok. That's it from me
P1- Ok let's jump into extempore. 30 sec to think and 1 min to speak. (Gives topic and a pencil to jot down)
P2 while I'm jotting down - So you're from Chennai right, which college?
B- Told
P2- Why is it called Chennai?
B- Told how it was called madras previously
P2 intrupts again- why was it called madras?
B- Told about the port Madirasapatinam and how it was used by British to transport people and goods in and out of country.
P2- what's the fort built by Britishers called?
B has a slight blank face
P2- So Britishers usually find a port and build a fort before they start using it right, what's that fort in Chennai?
B- told Idk

#THEOMI

P2- ok continue
B finishes extempore.
P1- ok that's it from me (turns to P2)
P2- yes same. Thank you, you may leave.
B almost got up when P2 starts to speak again
B smiles and sits back. Both P1 and P2 laughs
P2- Sorry but definitely my last question. (Murmurs my QA percentile to himself) How many questions did you attempt in QA in CAT.
B- told single digit number
P2- hmm. What about LRDI
B- tells 1.5 sets , 5+3 q out of which 1 tita was wrong
P1 and P2 laughs again
P2- Oh you know what's wrong as well.
B- yes sir, i went through the answer key
P2- Oh, we thought students use answer key only to fetch marks and expected percentile
B- (smiles) No sir, i went through and was sad to see the red colour cross
P2 - (laughs) ok and what about VArc
B- tells 16 q right
P2- and how many did you say attempt in QA? (Was seeing my score in laptop)
B- X out of which 3 were wrong so totally Y correct.
P2- Only Y correct??? And you are an Engg... (Stops and realises am from commerce)
Ok sorry got it
P1 laughs and says- that explains it no?
All 3 laughs
P2- ok thank you, you can leave.
B thanks and greets have a nice day to both
(Part 3/3)
P2- thank you, have a nice day you too.

Experience Notes:
25 mins, I really can't judge how my interviews have gone, until I get the mails of offer/rejection ig.

Q&A;:
P1(Male): TMAY
Answered
P1: What research papers have you published? Explain briefly? What was your roles? What methodology?
Long answer then...
P1 was really stressing and kinda pushy and bullish.
P1: what subjects you studied in entc?
Answered
P1: what is K map? Draw example?
P1: Are you good in maths? Here it starts?
P1: graph of sin x and integral from -pi to pi?
I answered this and then.
P1: is sinx continous fn?
Yes
P1: how?
It is diffrentiable at every point, sir
P1: so you mean every continuous fn has a derivative at every point and vice versa?
I fumbled and lost so bad here, i kept saying yes stupidly.
He went sad after this.
Shifted to P2 then
P2(Female): what are social issues in your region? How is govt overcoming it?
Spoke a lot and poured all the geographical and political knowledge i had
P2: You have water scarcity but your region grows oranges and sugarcane, water intensive plants.
Told the reason
P2: What us UNSDG?
im afraid i dont know?

#THEOMI

P2: what is Sustainable development?
Answered
P2: Then now what is UNSDG?
Answered
P2: How many goals in UNSDG?
I said 7 (thala for a reason) i wasn't sure.
P2: name any three.
Didnt wanted to lie more so said, cant recall the exact but told around it how they are implementing with Samsung global goals?
P2: here's a topic How to green the EV industry?
Sopoe about it for quite some time
P2: You didn't talk about the mining industry here?
Told i did mention but didnt elaborate, then told around it.
P2: Which was the first satellite launched by India?
Couldn't recall exact name but told about it that how it was lanunched with Russians help and at their base and Vikram sarabhai roles in forming ISRO.
P1: was just silent then, although i kept my calm and good eye contact.

End of the interview, You may leave.
Best of luck. Take your bottle(I drank from the bottle)

#THEOMI

Experience Notes:
Lot of questions asked. ~35 minute interview. Covered academics, work experience, hobbies, current affairs.
Most comprehensive interview so far.

Q&A;:
Panel - 2M, both professors. P1 and P2.
They took turns to ask questions. Both very stoic, barely cracked a smile in between.

P1: How do we pronounce your first name? Are you from kerala? Which district?
P1: Tell us about what you do at Deutsche Bank.
P1: What value will an MBA add to you?
P1: What are the subjects you studied? Accounting- what are the types of accounting standards? Who sets them? What is the difference? How does a company choose?
P1: What are the various financial statements?
P1: What are SWIFT codes? What do they signify? (One follow up question I cannot remember)
P1: Are you familiar with economics news? (Clarified) The FED is planning on interest rate cuts, what is the implication on the economy, what is expected to happen ?
P1: What did you do on the project Aryabhatta?
P1: Are you familiar with politics in Kerala? Who is the current CM?
P1: What are the major tourist spots in Alappuzha?
P1: Do you know the history behind the well constructed waterways and canals of Kerala? (Did not know, said I would read about this and P1 smiled)
P1: No more questions from me.

P2: So you've applied to PGP HRM program. What do you know about it? Or did you simply apply because you were shortlisted as a backup option?
P2: What is the difference between Personnel management and HRM?
P2: What is a private limited company?
P2: What is the difference between LLC and Private limited company?
P2: You earn handsomely already (there was a typo in my salary ■ I filled thinking it was annual remuneration instead of monthly ■)
(P1&P2; laughing)
P2: Extempore- The financial situation of the lower strata of society is ignored by the Government. For or against. (30 seconds to think and 2 minutes to speak)

(Cut me off)
P2: Thank you, have a good day.
P1: All the best!

Experience Notes:
Overall: Very short interview (<10 min), I yapped a lot for the museum questions – even gave them directions to the two museums I spoke about lol.

Q&A;:
M1, M2: *read my profile aloud for like a min*
M1: So what do you do at work?
M1: What is DevOps?
M1: You play the piano? Tell me about the grades you've completed. How many are left? How many years will it take you to complete them?
M1: Famous pianists from India? What exactly are you learning in piano? Can you explain the notes to me?
M1: Anthropic has been in the news lately, do you know why? (mentioned the headlines) Tell me more about the agentic plugins.
M1: How does Anthropic make money?

M2: Tell me about your hometown. If there was one important place here that you would ask someone to visit, what would you pick?
M2: *mentioned a museum* why are museums important?
M2: *mentioned inspiration as one of my points* Do you get inspired at museums? Tell me how?
M2: How are museums made? Who sets up regulations about what should and should not be a museum?
M2: Thank you, you may leave

9/9/9, 2 members BBA fresher

Experience Notes:
Overall a very fast paced interview like all that happened within the span of ~15 minutes, did not let me finish my answers and kept cutting me off with new questions with "okay, leave it"

Q&A;:
Questions-
1) So you have a BBA in management science? What is management science
2) is it not an art?
3) what's your favourite subject (answered marketing)
4) do you know consumer behaviour, how is it measured
Cut me off when I tried to answer and then revised the question with
5) how are qualitative factors measured?
cross questioning on that, did not seem much satisfied
6) GDP of India, growth rate
7) budget and what did govt do in the tourism sector (mentioned medical tourism)
8) do you think it's good to invite foreigners for treatment when our own citizens don't get the same on time? (Somewhere along those lines)
Again did not seem satisfied and cut me off when I tried
9) what are you passionate about
I said reading, cross questioning on that

10) what other subjects you studied, I mentioned economics
11) super normal profits and its graph and why super normal profits only exist in monopoly

#THEOMI

12) MPC MPS and which one is beneficial for the company
13) I said MPC , he told me to defend the statement that MPS is better for the company and to come up with examples
14) you live in city XX, how many states you'll come across from XX to shillong
15) more questions on graphs, how it is known that profit is maximized
16) I mentioned d/dx^2<0
17) Asked me why it should be less than 0 when you are supposed to maximize it
---

Q&A;:
IIM S (5th Feb - Mumbai)

Profile - GEM Mechanical Engineer from NIT Calicut 9/9/9, 2.5 years for work experience in Consulting

GD Topic - (not exactly but that was the gist) A company wants to start its line of sustainable products- how to spread awareness, affordability, convenience for the consumers

Interview (Two panelists M1 and M2) -

M1-
TMAY
What does GEP do?
What is procurement?
Tell me something you have procured, what was the process?
So you have lived in 4 states, which state has better government? (I said all governments are equally capable, but the growth in Assam during last few years has been immense - and talked about growth in Assam in different sectors)
If you were CM of Kerala, what would you focus on? (linked it with budget and high valued crops)
What are the problems in Mumbai?

M2 -
What is sourcing?
What were your favorite subjects in UG? (I mentioned Thermodynamics and Strength of Materials - asked me all questions apart from these two subjects)
In engineering drawing what are the three types of views?
Why is 120 degree in engineering drawing fundamental?
What is casting and molding?
What are the design criteria to be used when designing fins?
What kind of materials are used in fins?
What about the melting point for the materials for fins - should be high or low?
How to calculate the exact surface area of India?

#THEOMI

What is the line of best fit?
What are the different types of variance?
What is UCL and LCL?

Take toffee and have a nice day.

15 min interview - overall not a conversational interview. Didn't answer a few mechanical engineering related questions.

Experience Notes:
Panel was sweet, smiling. A bit grilling on a few questions, but it never went to a stress interview

Q&A;:
GD - about a copper company, whose operations were shut down due to environmental hazards and some deaths as well. 5 questions based on this to discuss in the GD.

PI (2 males)
Q1. Initial discussion on multiple extra curriculars and whether I followed any of them formally, through some exams
Q2. As a CA, give inputs on checks that you would put in Tally while migrating all data from a different software
Q3. Do you follow geopolitics? Tell me about the fall of Berlin wall and Korea's relation to that
Q4. Your views on US-Greenland issue and what should India do? Some cross questioning on that
Q5. Why do we have anti dumping duty on chinese steel imports? How can a country counter anti dumping duty by country X, who doesn't have any exports of its own. Further cross questioning on that
Q6. Why shouldn't India have a war with Pakistan and take back PoK?
Q7. Asked about some government scheme, was not aware of it, can't recall the name
Q8. Depreciation accounting and how would the company get the money to fund the machine again, after few years. Some more cross questioning based on my answers
Q9. Write a 2 line rhyming poem about today's interview experience (mentioned poetry in hobbies and extra curricular awards)

M/23; 2 years work ex (6 months internship); Two Panel Members (both male)

Experience Notes:
I did answer the academic questions but they were not in depth. He was disappointed and said that you should know everything in detail. I think it's important to try and steer the interview in what you're proficient in (like work ex or profile) which I missed doing here.

Q&A;:
Why MBA? (no TMAY)
Do you follow current affairs? (I said yes)
Why does Trump want Greenland?
What exactly is happening? How is Europe reacting to it?
What topics do you follow?
What can fill a room but it'll still be empty (I said air/gases)
If I have four containers, each with a different item and 10 units of each, what is the probability that I'd get a item from the 3rd box when I mix everything? (I asked a clarifying question and said that it's been a while since I studied Probability but I think this is how I'd approach it)
Now, the second panelist started asking.
How can you say that you are not sure of probability, you're from a premier engineering college?
Then he asked about DSA, Binary Trees, B-Trees, XML vs HTML, real life applications of palindromes.

Q&A;:

#THEOMI

1. TMAY
2. Difference between 1st job role and 2nd job role
3. What is hedging?
4. How to Apply it in import/export?
5. Asked about 3 UG subjects while skimming through my marksheet even though I have 3 years workex (Could answer questions about 2)
6. Asked about Cricket as I had mentioned it and related it to India-Bangladesh Fiasco
7. Had mentioned driving so asked what cars do you have, its mileage etc.

Background Notes:
Grades-7/9/8, percentile - 99.07, Two members , Degree- B.M.S

Experience Notes:
Panel 1- was pretty chill and i answer almost all the question, But for the panel 2 - I didnt really recall the concept so i continously answer I dont know. Because they are really core questions.
Overall nice experience. Need to work upon investment banking side and as well as on academics and current affairs.

Q&A;:
1) Tell me about Key KPI of your work?
2) Explain your roles and responsibilties?
3) In which segment do you trade?
4) Let say if you want to suggest anyone to trade in future and option segment what would you suggest?
5) No no I dont want any diplomatic answer, give me a suggestion?
6) Let say i want to buy 26000 ce of nifty feb monthly expiry , what should be the price?
7) what if market expires at 26200, what should be the value of the option?
8) What all parties are involved in the transaction?
9) Let say there is a group of 100 people invest you , on an average how many of them will be on profit?
10) If thats the case why government is stopping people to invest in derivatives?
11) Why is it happening? and whats ur opinion?
12) Your hobbies is chess , what are the different types of games played in chess?
13) Top 2 rated player of india?

Now Panel 2 starts - and the disaster happened.
1) So I was going through your marksheet you seem's weak in industrial law ? are you aware about it what does the subject mean?
2) what are your favourite subject?
3) Let say a two company merged what book of account do we see?
4) What book of account do we merge while merging a company?
5) If a company is on verge on bankruptcy , which book of accounts you will see to revive a company ?
6) More question on these lines
7) tell me what is brics?
8) What is G7
9) Tell me two global news apart from tarriff and trump , how they will impact to the whole globe?
10) Tell me some domestic affairs
11) Okay explain ugc issue?

12) What other hobbies do you follow?
13) How many teams are participating in t20 world up india?
Okay so we are done take a toffee and leave.

Background Notes:
9/9/89.8, 2025 grad

Experience Notes:
Questions were in depth and technical regarding workex and ug subjects, news related to work only discussed. 15 minutes chill panel.

Q&A;:
1.Tmay
2. About job role and projects, (research team)
3. Explain attention is all you need paper.
4. What is multi head attention?
5. In what areas are transformers lagging currently?
6. What is cantilever bridges , how do they support load, any cantilever beam in this building?
7. Explain earthquake proof building design.
8.What were AI discussions in the budget
9.What are data centres , should India invest on them?
10. You mentioned chenab bridge twice why? Is it because you prepared for it before coming for interview?
11. Questions related to cricket journey (extra curriculur)
12. Draw graph of sinx, then they drew a graph of transformed function of sinx and told what function will this graph represent (had to be broken in even odd pie domains and involved modulus)
13. Are you sure you want to leave your job for mba?

Certifications: US CMA

Background Notes:
98.46%ile, 9/9/9, GNEF (BCom)

Experience Notes:
It eventually became a good environment. I was not able to answer all the questions, made attempts to answer some questions I didn't know fully well. I was initially uncomfortable with the prof with the poker face, but I ensured to be pleasant and as honest as possible. Turned out okay I hope (both of them smiled towards the end)

Q&A;:
Panel 1 - Slot 1 - 10am

GD topic: Should we take the opportunity or not? Business of Plastic Pots is struggling financially. Received a major order from a retailer, who wants longer term of credit and wants to buy lower than the cost price of the product. Set to put strain on the production process, but technically possible with some adjustments. Should it be considered or not? (3 mins to read case, 12 minutes to discuss - I made 4 to 5 entries with points in favor of the offer)

PI:
Two Profs - both M. Mid 40s (P2) and early 30s (P1). Seemed to be from Eco/Finance background.
P2 had a serious face from the get go, but eventually started to smile.

P2: (pronounced my name incorrectly while calling me in, had a fun banter around it for a minute or so)
P2: (took the files from me, and was verifying info simultaneously with the PI)
P1: (sets a timer for 20mins)
P1: TMAY
P1: so walk us through your line of work while explaining the project you worked on (in my form I mentioned a project I had worked on - there was a lot of cross questioning here - how we identified the problem, evaluated it, measures taken)
P1: what are the metrics used to evaluate a cost centre like yours?
P1: are you following any current affairs? What? (Mentioned monetary policy committee)
P1: explain some highlights from the same (repo rate, inflation)
P1: there was a significant event that conjoined this (revision of base year to 2024) what is the implication of that and significance?

P2: So when does Finance become Strategic Finance? (My degree title has this)
P2: Will short term goals also be a part of strategy? (Should've answered in depth about various types of strategies)
P2: Okay so how are legal expenses accounted for before a company begins operations? (Could not remember, apologized)
P2: Explain what is a contingent liability
P2: What is tier 1 capital? (Rambled a little here and quickly apologized because I couldn't remember the entire thing)
P2: For an investment, can we have multiple IRRs? Why? What do we do when such a scenario occurs - what's the resolution here?
P2: Do you know what Regression is? Explain. (I could not recollect at length) Okay, please tell how do you get the maximum value of a quadratic function (explained the CAT logic and he started giggling here) - so you

know the formula and not the funda, okay.
If I go to a mall, for example UB city, you know that place right? I walk in and find many tshirts in L size, not so much XL or S and other sizes. How did they come to this conclusion that they'll need to have more L size? (Explained demographics and population patterns, and statistical tools that will be used, pattern recognition through purchases: this was a clue for Regression, I could not connect it at the time)

P1: my last question to you is a probability question. (My expression changes) are you comfortable with it?
(I said no but I'm willing to try) - what is probability to you and explain with a real life example (did so in simple words and two examples) - let's do the sum anyway.
There are three children in a family, 1 is a definitely a girl, what is the probability that all 3 are girls?
(I start scribbling in the sheet in front of me, walked them through the logic)
P1 & P2: (both smiled) thank you, please take a candy.
Have a good day!

Background Notes:
9/9/8, Final year Bcom grad, 2 panelists(1 male , 1 female)

Experience Notes:
The interview was Ok. Displayed confidence but lot of technical gaps. Just told FSA as a part of management accounting and I guess things just got messed up there. Gave quite a bit wrong answers. Interview ended quite early.

Q&A;:
1. What are your hobbies?
2. What are the income tax reforms?
3. A lot of returns are still due to income tax filers, what is to be done?
4. Speak something about the India EU FTA agreement
5. What is your favourite subject?
6. What did you study under management accounting? (Didn't approve that FSA was a major component of it)
7. What is the difference between Financial Accounting and Management Accounting (Cross questioned a lot here)
8. What is the difference between prime cost and overheads?
9. How are overheads displayed in the income statement?
10. What are the GST reforms?
11. Would you consider doing Emceeing full time? (Part of my hobby)

Q&A;:
P1,P2: M around 40-50years.

GD: Rea's Car Company Go-Drive, is not making money with the current modle but the users are liking it for the convenience it offers etc...

Q: Should Rea increase the price of the Cab's before the Investors pitch?

Tip: Eye for detail is important in your respective topics check for the detail. [The devil is in the detail]

P1: What is the awards about, why did you get them? (had digital evidence, so they directly jumped to the question)

P1: Tell us about your work like you are explaining it to a 5 year old. Follow up on what is my role and contribution.

P1: What are the important components of an Agent?

P1: What is the difference between Agentic Workflow and a RAG Agent?

P1: Can they co-exist? Example?

P2: So you work in TCS, who owns TCS.

P2: What is the structural difference between Reliance and Tata group.

P2: What is the difference between LLP and Trust.

P2: Have you seen the Make In india Logo? What is it?

P2: why do we have lion and not a tiger?

P2: Following budget, what is the taxes that have been reduced? Follow up on impact and why?

P2: What is Jane street (Follow due to the previous answer), are you aware of what happened to Adani in the USA?

P2: How are the fiscal and monetary policy created (took a guess and they followed on that).

P1: Have you gone through the website? what is the vision, mission and values?

P1: So you know about Standard deviation? What is it and what does it signify.

P1: Can it be Negative? Why?

P1: Are you aware of the Sigma's (I didn't so said that it might be related to Operations)

Take a toffee.

Q&A;:
Two professors(22-25 minutes)
P1 - A Male 40 or so
P2 - A Male 30 or so

P1 - Explain where are you working currently
P1 - Explain your job role
P1 - What exactly have you done in this role
P1 - How has your computer science knowledge helped in this role
P1 - Discussion about AI
P1 - Tell 5 things that are a definite threat for AI
I asked for a minute and a pen and paper to jot down and then answered
P1 - What is your knowledge about North East, like on a scale of 1-5
I said 2.5
P1 - That's really low
I said yes sir
P1 - Tell is 5 thing government should do to promote knowledge about the places
I asked for a minute, wrote and told again
P1 - That's it
I said yes sir, these are the 5 pointers
P1 - Seems satisfied
P1 - Do you follow current affairs
I said yes sir
P1 - Tell about the strait of hormuz
Explained
P1 - Which place to where
I said I don't know sir but can take a guess
P1 - What is India stand
I said we should be neutral as we have good relationship with Israel and US
P1 - Asked about Iran
Told that it has allowed ships with Indian flag to go through it, hence, we should stay neutral as we have good relationships with both

P2 - Tell about your workex
P2 - Why not doing a tech job since you are an engineer
Answered
P2 - Will you go back to tech for job if required because of AI
I said I keep myself updated of technology and how can I utilise in my role and given my tech background I can communicate with tech team, but going back to coding job isn't something I will do
He was satisfied
P2 - Do you want to change the domain or continue in your existing one

#THEOMI

I said continue (He was tick marking all this)
P2 - How much would you rate out of 5 in your Engineering subjects
I said 3.5
P2 - Pick up any two subjects
P2 - What is a Linked List and how it is used
Answered
P2 - Can you tell a sorting algorithm and explain it
Told about the merge sort and explained with an example
P2 - Any application
I said I couldn't recall but took a guess
P2 - How would you rate yourself in maths
I said 4/5
P2 - Explain the difference between a mean, median and mode
P2 - Draw the graph of e^x and then log x
P2 - Confirmed, are you sure
Not 100% sure sir, but I checked both were correct
P2 - Where are you based at
P2 - If an outsider, say a south Indian comes to Delhi, where will you take
I said to some South Indian restaurant/cafe initially then to some historic site
And then to nearby my home location so that he can taste the real street food of Delhi

P1 - Any Hobbies
I say I write poetries
P1 - Any inspiration
Told about my poetry journey and how it started
P1 - Any sports you play
I said no sir
P1 - You don't do any outdoor activities
I said used to do skating in my school days but after school couldn't continue
P1 - What about cricket badminton
I said I play it for fun and on the weekends but not professionally
P1 - He was smiling and said okay
P1 - The interview is over. You can leave
P1 - Offered a toffee

I said thank you

Q&A;:
Place - Kolkata
Total duration: 10-12 mins
2 Panelists - 1 Male(M) and 1 Female(F)

F: Please take a seat. Tell us about yourself.
Told.
F: What is your job role
Told that no fixed role as such in family business but have done things in marketing and salary restructuring.
F: Why MBA?
Told.
F: So, you have done finance in undergrad. What is market cap and what is enterprise value. When are these used. Why is market cap more commonly used.

#THEOMI

Mentioned the formulas and said in valuation, ev/ebidta is considered superior when valuing a capital intensive company.

M: What is your business in?
Said its a retail apparel store, sell everything except sarees and lehengas
M: where is it? How do Nepali citizens buy?
Explained that its a border town, nepali people come, shop, leave.
M: Why do they buy from India, China provides much cheaper clothes.
Said that in the last few years clothes of china have gained prominence, however it is very expensive because of custom duties and our USP is big brands at affordable prices. Was starting to explain him surplus goods but he cut me off.
M: Asked that what brands do you sell.
Told.
M: How does your customer know about what products you have?
Answered that that is part of what I have been doing in marketing, using social media as a demand creation tool to drive footfall and visibility as we do not have online sales.
M: What software of technology could improve your business's profitability?
I said sir not profitability but integrating a POS software would increase operational efficiency by inventory management and integrating CRM.
M: How do you manage inventory currently?
Said its unmanaged at present. I tried to bring the POS, told the challenges faced and scheduled to integrate it next month.
M: Do you know maths
Said I studied for CAT little but the last time I studied it as a subject was in class 10.
M: Not a problem, you can go. All the best.

Q&A;:
• What does your name mean?
• Where are you from?
• Which college did you attend?
• Oh, you studied computer science. Have you studied data structures and algorithms?
• What are data structures? Why are they considered very important?
• Why are algorithms taught along with data structures?
• Have you studied AI/ML?
• What are supervised and unsupervised learning?
• What is clustering? Give examples.
• What is K-means clustering?

#THEOMI

• How are clusters formed?
• What do you know about OpenAI?
• What do you know about its CEO?
• Why didn’t Bill Gates attend the AI summit in New Delhi?
• What was the news regarding Anthropic and OpenAI?
• How is ChatGPT different from DeepSeek?
• Which one is better for which tasks?

Background Notes:
1M and 1F panelist, all three course call

Experience Notes:
Overall 6-7 minutes, smooth, no questions over "why"

Q&A;:
F: Hi, so you are from computer science background. Python is quite a popular language these days, are other languages like c/c++/java obsolete.
F: what are pointers?
F: does python have pointers?
F: why not?
F: how does python store data
F: these days there are advanced technologies like edge computing and quantum computing, what are these?
F: what are qubits
F: does the mobile phone have qubits for computing
M: Do you know machine learning algorithms, name some
M: difference between classification and association
M: how much would you rate yourself in quantitative aptitude
M: what is the difference between simple interest and compound interest
M: how many times in a day does the hour and minute hand overlap

Okay no more questions, do you have any questions for us (I said no)
Okay you may leave

#THEOMI

I felt that throughout the interview they were amazed with what I have been doing in my work. Never felt so appreciated. Being an OPs dominated college, they actually valued my achievements and work.

Q&A;:
P1 : TMAY
P2 : You are so 'evolved' why are u planning to do an MBA
I misheard and thought he said' you're so OLD' and told him that I'm only 25 ■■ and both profs started laughing and explained what they meant.
Then I told me him about my current work with Swiggy and the model.
P2 : what distribution do the items returned follow
P2 : Asked about some distributions I'd never heard of and then he asked about skewed distributions
P2 : Tell us about your paper and some discussion around how to validate the findings, a bit discussion around conjoint analysis and how expert's preference might be biased and all
P1 : how do u take care of order consolidation in your swiggy model
So in depth discussion about Reinforcement Learning and what Swiggy is doing right now and how my solution is what they need
P1 : Suppose the model is adopted and implemented on the national level, so what will u benchmark its performance
P2 : I don't see any point in you pursuing an MBA
I told him how I love solving problems and dont want my role to be limited to tech part and industry lacks such expertise
P2 : How will IIM Mumbai help you to achieve what u want
I answered and he said this is exactly what I wanted to hear ■■

Background Notes:
8/5/6, 99.35%il, 2+ year workex (own venture, that i started in 2nd year of college) || Panel: 2 Panelists - P1 Male (50s), P2 Female (30s)

Experience Notes:
No tmay, No why mba, No why bad acads.
It was mainly focused on my business.
Overall chill interview, no grilling or anything at all!

Q&A;:
P1:: You have a typo in your cv please correct it (undergrad mai 2023 ki jagah 2013 likh diya■)
Sorry sir will change that (he said don't worry change it afterww\ards)

P1:: What have you been doing after your graduation?
told

P1:: Is this a family business or your personal venture?
its not a family business, its my own personal venture

P1:: What does your father do?
told

P1:: You are an engineer—how good are you at mathematics?
i am decent in it

P1:: 2 matrix (2*2) – inverse and transpose question
told 1 but cant answer 2nd one

P1:: Why do we need derivatives for functions?
Sorry sir I don't know about it

Over to P2

P2:: Explain the credit policy mentioned in your CV (my business related).
answered

P2:: What problem were you facing in your business related to inventory or credit?
told

P2:: How did you revise credit limits for contractors?
told

P2:: What are your hobbies?
I like to play chess and follow chess tournaments and also watch game analysis on YouTube.

#THEOMI

P2:: Apart from Viswanathan Anand and Gukesh, name two Indian chess Grandmasters.
told Arjun Erigaisi and Nihal Sarin

P2:: At what level do they play?
they play at grandmaster level (also mentioned I like Arjun Erigaisi's aggressive style and the game in which he defeated Magnus Carlsen in a rapid game)

P2:: Tell us recent business news.
told about the budget that came yesterday and the India–EU FTA

P2:: What is the India–European Union trade deal?
told

P2:: Why is it called the "mother of all trade deals"?
told

P2:: What are the key specifics of this deal?
told

UG: Bsc in Hospitality and Hotel Administration
PG: Not Available
Work Ex (months): 5.0
Certifications: Not Available

Background Notes:
9/9/8 Bsc in Hospitality and Hotel Administration. 8 months work ex as a chef. 2 panelists both male.

Experience Notes:
Overall felt conversational. No grilling. 20 mins interview. Appeared very interested in the industry. Also probably one of the profs was from Stats bg.

Q&A;:
P1: please introduce yourself.

Candidate:
I introduced myself using a metaphor. I said that I see myself as a biryani, layered in nature. Each layer represents a different aspect of my personality: my professional work in kitchens, my creative hobbies like writing, and my varied interests outside work. Together, these layers come together to form who I am today.

(Both panelists smile.)

P1: So you mean you have many different emotions, interests, and layers, just like a biryani?

Candidate: Yes sir, absolutely.

P1 (smiling): Then tell me, are you a dum biryani, masala biryani, Hyderabadi biryani, or Kolkata biryani?

Candidate: I would say dum biryani, sir.

(Both panelists laugh and smile. They move on.)

#THEOMI

■

P1: are you familiar with statistics?

Candidate:
Sir, I'm not very familiar with statistics. From my CAT preparation, I know basic concepts like mean, median, and mode.

P1: Okay. You mentioned mean, median, and mode. Tell me, where would you use median over mode?

Candidate:
Sir, for example, in a class of 100 students, if we want to understand the middle performance of the class, median is more useful than mode. Mode might reflect clustered low scores if many students score similarly low, but median gives a clearer idea of where the midpoint of performance actually lies.

P1: Okay, okay, fine.

P1: Do you know what standard deviation is?

Candidate:
Sir, I'm sorry, I don't know the concept clearly. I can take a guess if you want.

P1: That's up to you.

Candidate:
Sir, I would rather not guess.

P1: Okay, fine.

■

P1: How do you ensure quality in your work?

Candidate:
Sir, quality is ensured through a structured process. First, we create standard operating procedures (SOPs). Then we train staff accordingly. We conduct regular and random checks, and in addition, we also have periodic external audits to ensure consistency and compliance.

P1: What sampling method do you use?

Candidate:
Sir, I may not know the formal name of the sampling method. However, in practice, for high-frequency or daily-moving items, we check quality every day. For relatively rare or low-rotation items, we check them weekly. External audits are conducted monthly.

P1: Okay, fine.

■

P1: How do you manage your inventory?

Candidate:
Sir, since we are a small establishment, we manage inventory using both physical verification and digital tracking systems to ensure accuracy.

P1: And how do you control inventory?

#THEOMI

Candidate:
Sir, we follow FIFO—First In, First Out.

P1: Where do you apply FIFO?

Candidate:
We apply FIFO strictly for dairy products, vegetables, meat, and other perishable items.

P1: What about beverages?

Candidate:
For soft drinks, we follow FIFO. For alcoholic beverages—except beer—FIFO is not strictly followed until the expiry or deadline approaches, because most spirits can be stored safely for long periods. Beer, however, follows strict FIFO due to shelf-life constraints.

P1: Okay, okay. Good. Good enough.

■

P1: Can you name five hotel chains in India along with their CEOs?

Candidate:
I mentioned IHCL, Oberoi Hotels, ITC Hotels, Marriott, and Accor.
I was able to name the CEOs of IHCL, Oberoi, and ITC Hotels. I could not recall the CEOs of Marriott and Accor.

P1: (Acknowledges and moves on.)

■
(Part 2/3)
P1: you will do very well in your kitchen space. Why do you want to do an MBA?

Candidate:
Sir, I want to move into a more strategic role. While working in kitchens, I've gained strong operational exposure across departments. However, I've realised that decision-making at higher levels requires structured knowledge of finance, marketing, HR, and strategy. An MBA will help me bridge this gap and enable me to contribute beyond execution.

P1: So you want to move from kitchens to management?

Candidate: Yes sir.

P1: What exactly will an MBA add if you work in a hotel after that? Give me real-life examples.

Candidate:
Sir, I understand operations well, but leadership roles require more than operational expertise. For example, even if I create a great product and customer experience, without knowing how to price, position, and market it effectively, the impact remains limited. An MBA will help me take strategic decisions related to branding, finance, and people management—areas that directly affect long-term growth.

P1: Okay, okay, fine.

■

P2:,do you have any co-curricular achievements?

#THEOMI

Candidate:
Yes sir. I am an international medalist and a national-level competition winner. I've also been recognised as one of the best under-22 chef in Uttarakhand.

P2: That's very impressive. Can you tell me something about the US–India deal currently in the news?

Candidate:
Sir, as of now, no joint official statement has been released. However, discussions suggest changes in import-export duties, with potential reductions on US imports and revised tariff structures for Indian exports. The broader focus appears to be on strengthening bilateral trade and easing barriers.

P2: Okay, fine.

■

P1 (earlier follow-up): Can you tell me about the GST structure applicable to the hotel industry?

Candidate:
Sir, in most cases, GST is around 5%. However, imported products can attract significantly higher duties—ranging from 5% to even 50%, and in some European imports, even higher. In our state, items like dairy, alcohol, vegetables, and non-vegetarian produce are exempt from GST at our level, as tax is deducted at the source. Only the remaining components attract GST.

P1: (Appears satisfied.)

■

P2: Okay, that will be all from our side. Thank you, and do well.
(Part 3/3)
Candidate: Thank you, sir. Thank you very much.

Experience Notes:
Lack of practice made me really slow. The question which I couldn't solve inside, clicked in my head a minute after I came outside.(It was so easy, heavy regret)

Q&A;:
P1- How are you doing?
Some talk about the weather happened
P1- TMAY but don't add any fluff. Just the main points.
Told where i come from. Graduation, research project, internship work (couldn't tell about my website as I was cut mid sentence)
P1- Gave me an extempore topic. Write in 1 min and speak on it for 2 min.
I spoke good points but gaps between sentences.
P1- Asked me about natural selection. Who gave the theory?
Told well
P1- Asked me to relate it to how businesses function and how employees should function.
Connected it to constant change in the market. Companies have to change according to market demands and innovate or they will be left behind. Told about automation in every sector and employees have to be up to date with new skills to get hired.
P1- asked if I was keeping up with news. Asked me to tell few.
Told about trump and tariffs and budget allocation to pharmaceuticals.
P1- Asked me about the farmers protest
I told why it was happening but couldn't say clearly what the motive behind it was and if farmers were really going to be at loss.
P2- Asked me if i was keeping up with business news.
I said I keep up with general news mostly.
P2- Do you know any companies where layoffs happened recently due to AI
I didn't know.
P1- Asked me if I had used AI and if it helped me?
I had used it during my internship in marketing for research as there was too much information on the internet and I found that AI made research easier.
P1- Asked me if I had asked AI what they ask in IIM interview.
I said yes. But it was generic advice and not at all helpful to me.
P1- What if you told AI about your background. Will it be good then?
I said no as interviews can be quite unpredictable. AI still won't be of much help.
P2- Asked me about my achievements.
I told about being Top 6 in an Agribusiness competition by IIM A.
They asked me certificate of another comp.
Gave it
P1- Asked if I had got calls from FABM
I said no, bad sectional.
P1- Asked if I knew which collages had Agribusiness programs?
I said IIM Lucknow has one. Apart from IIM A.

P2- Asked me why I did bad in quant.
I just said I couldn't do well.
P1- Did you have math till 12th?
I didn't
P2- How will you cope with MBA maths? You will have to pass exams even after getting selected for MBA.
I said I analysed what I did wrong and later corrected it in XAT and got a ~86%ile in QADI. So I will say I'm average at math. I will learn whatever additional math will be needed.
P2- Gave me an easy question. Plot 2x+1
■ It didn't click then I was quite nervous. Did wrong even after getting a hint.
P1- Work on your math now and stop focusing on other work.
Told me I could take the notepad and pen and take a red ID for exit. I could go now. Thanked them and came outside.

Experience Notes:
I felt overall positive, got to know the areas where i need to work much harder. Overall, the panelists were chill they were helping me to reach certain answers.

Q&A;:
1) Do you know XYZ global community on climate change?
- I said no
2) Tell me who introduced green bonds in the market
- I said I am not aware about the organisation - he said it was world bank

#THEOMI

3) Tmay
- ans well
4) Tell me about some extracurricular achievement where we can judge your managerial traits
- talk about my fest experience.
5) They started asking me about my reselling business - mentioned in my Tmay
6) Had some laugh and talks around them
7) You are working in derivatives. What is black Scholes model
- ans
8) Ask me about formula
- I said I am not able to recall
9) Now tell me difference between the forward and futures
- explain well
10) explain difference between spot and exercise price
11) Again, he asked explain forward futures and underlying
- explain with the help of example (took bottle from the desk and explain that)
12) Draw the payoff graph of long call option
- explain well I tried to engage both of them - explainsame with the help of bottle
13) Now draw the graph of short call
14) Again he jump on future and forward- tell me the difference
I said obligation- in forward we may expose counter party risk
15) He argued no you are wrong - in option we have rights and for forward we do have obligation
- I started explaining the same with the help of the water bottle including them in the example. He acknowledged.
16) are you aware about depreciation and amortization?
I explained in my own terms
17) NPV And Irr
What should we look while selecting a project?
18) Write down the formula for Irr
19) Are you aware about the recent news
- I explained - apart from usa and israel
- I explained about mutual fund portfolio revision
20) suddenly it shifted to geography - what is tropic of cancer? What is the tropic of capricorn
- I said it was a geographical term - I am aware about that terms but still I need to revise those concepts.
21) Cm of harayan
- I revised the name 10-15 times still forgotted
22) Why should we select you?

MBA Interview Transcript

9/8/8 98.26 gnem fresher

Duration: \~15 minutes

Panel: 2 Panelists

■

1. Introduction

Panel: Please introduce yourself.

Candidate: Answered.

■

2. Why MBA Now

Panel: Why do you want to pursue an MBA now instead of working first and then coming back for higher studies?

Candidate: Answered.

■

#THEOMI

3. Extempore Round

Panel: We will give you a topic for a short extempore. Speak for about a minute.

Topic: Zero

Candidate: Spoke for approximately one minute.

■

4. Reading Habits

Panel: Do you read newspapers regularly?

Candidate: Mentioned using the news application

Inshorts.

Panel: Asked whether candidate reads full newspapers or only short summaries.

Candidate: Answered.

■

5. Current Affairs Question

Panel: There was a recent news incident involving a drone in

Dubai. What was the news about?

Candidate: Answered.

Panel Follow-up Questions:

• What type of drone was involved?

• What was the purpose of the drone?

• Which building or area in Dubai was involved in the incident?

Candidate: Could not recall the details.

■

6. Marketing Concepts

Panel: What are the 7Ps of marketing? And plathora of follows ups

Candidate: Answered.

■

Panel: Explain the AIDA model.

Candidate: Answered.

#THEOMI

■

Panel: In what situations is the AIDA model applicable?

Candidate: Answered.

■

7. Vice President of India

Panel: Who is the Vice President of India?

Candidate: Answered.

■

Panel: Who was the previous Vice President?

Candidate: Could not answer.

■

Panel: Who was the first Vice President of India?

Candidate: Could not answer.

■

8. Teacher’s Day

Panel: When is Teacher’s Day celebrated in India?

Candidate: Answered.

■

Panel: Why is Teacher’s Day celebrated on that date?

Candidate: Answered incorrectly.(vallabhai patel, full anxiety ke karan)

■

9. Internship Discussion

Panel: Tell us about your internship.

Candidate: Answered.

■

Panel: Can you explain the business model canvas of the company where you interned?

Candidate: Could not answer (heard the term for the first time)

Remarks: Candidate was unfamiliar with the

#THEOMI

Business Model Canvas.

There were some othwr questions on my homwtown and elections and then speaker of lok sabha which i answered

One of the worst interviews ever

Online Interview. Panelists: 1M (Operations prof) , 1F (Econ prof)

Experience Notes:
Interview lasted for 15 mins, panelists were chill.

Q&A;:
M: *No greetings, he just reads my profile aloud for a minute so I wasn't really sure if I should say anything*

F: Are you there? TMAY
F: Difference between AI and Gen AI with examples.
F: 3 Takeaways from the AI Summit.
F: I know you're an engineer, but *used an economics term I'm not familiar with + I'm unable to recall* If I were to ask you questions related to this and what modern day economists have to say about what this means for India, would you be able to answer? Okay, what does the increase in capital expenditure in the budget mean for the Indian economy?
F: If I were to give you 10 crores to invest in one scientific industry, what would you pick and why? What would make the most profit? Tell me where do science and business intersect?
F: What do you think is the biggest issue that contributes to climate change? What is the issue with adopting cleaner methodologies and resources?
F: Tell me more about what you do at work. Tell me about a time at work where you've managed people and resolved conflicts.

M: How are you doing today? Where is Sirmaur? Where is Kashipur? Where is Rohtak? Which colleges have you applied to?
M: What is the difference between agile and waterfall? What would you recommend a construction business to follow? Why?
M: So what is your primary area of expertise? Do you use JIRA or Microsoft Planner?
M: Suppose you're tasked with delivering software to a company. You've projected 90 days but the customer wants it in 75 days. How would you reprioritize? What would you change first?
M: Suppose you cannot do it in 75, you can only do it in 80. Now what is the first thing you will do and what are you going to prioritize in the delivery? Is there any existing software to do this?
M: Where do you see yourself in the future?

Background Notes:
BBA. 2 panelist 1F and 1M (the male was eating his lunch, they were polite but asked random questions, F took 2-3 mins then M took 4-5 mins)

Experience Notes:
M said that it was nice interacting and he really wishes that I convert the call or if any other college that I desire to go, so I convert it and wished luck. He was chilling smiling throughout.

Q&A;:
F asked :
how are you?
What did you thought about when you woke up today?
What positive or negative thought that you had?
Have you visited Sambalpur? Do you know any recent news about Sambalpur?
So you are from commerce background So tell about logistic regression, regression and correlation. Okay, that’s all from my side.
M asked :
What role do you want to go in and which industry?
Why IIM Sambalpur?
Because I mention consulting, so he asked me any leading consulting company of India, why HR and what exposure do you have about it?
Did you read anything about HR in IIM Sambalpur?

Background Notes:
Final Year B.com grad - Christ University , 9/9/8 profile, Panel 7 - 2 female pannelists probably in their late 30s or early 40s

Experience Notes:
Interview felt very basic as they didn't care a lot about academics or any other thing majorly except my rationale to join and why IIM Sambalpur. The panel was sweet, didn't grill or put me in a fix. P1 seems quite satisfied with my answers.

Q&A;:
P1:
1. Where are you giving the interview from? What are your pursuing currently?
2. Why do an MBA as a fresher?
3. Why not do the MBA from Christ University itself?
4. Why did you got to Christ University after your 12th and why only Christ? (Had answered that I wanted to leave my comfort zone, so this question)
5. You feel that you can leverage academic strength currently however, you may fall back when people with a lot of experience come
6. Why IIM Sambalpur

P2:
1. Why pursue an MBA
2. A Company has good profits but negative cash flows. What would you as a manager do?
3. What are your hobbies?
4. Do you not play sports much? (Explained a bit abt my current position to it)

(Qns are not in order though)

988, BMS, 1Yr workex (finance), Online Interview (2 Female Panals)

Experience Notes:
For online interview:

When you join, you will see a buffering message saying the host has been notified. This is normal. There is no separate waiting room, so remain on the line and they will let you in on your turn.

Q&A;:
Questions

P1
1. Where are you from?
2. What is you undergrad?
3. Have you visited Sambalpur?

#THEOMI

4. How you liked the city?
5. Have you visited IIM sambalpur?
6. What calls you have and what unique quality about IIM Sambalpur you like?
7. Current geopolitical situations and how it's impacting the lower and middle class?
8. Situation at your place

P2
1. TMAY
2. How do you utilised you time in your gap after leaving job?
3. Do you think finance makes business strong? Yes or No and Why?

Thank you

#THEOMI

Q&A;:
P1 (~40M) P2(~45M)

P1:
1) Given 20 numbers between 1-100 with avg of 50 what is the behaviour of mean when number above 60 are capped off to 60.

Made assumptions while answering hence cross questions on assumptions.

2) If a college conducts various exams and all the 60 students get the same average and you divide the group into 4 subgroups with 15 members each have each group will have a correlation of 0.9, 0.7, 0.4, 0.1 and you will have to select 3 people to attend a quiz competition, what will be the combination of groups you will select the students from?
+Follow up questions

3) TMAY
4) Why MBA? Why now? Same company career progression etc...

P2:

1)Highest Military award?
2) Highest award for sports?
3) tell me more about your hobbies.
P2 picked up one Hobby to ask questions.

P1:
1) tell me the point Systems in basketball ball, cross questions on boundary, half line throws (Why half line throws are not given more point as it covers more distance).

2) Tell me about the border conflicts in India.

3) Why Indian maps are shown different in by different countires.(Conversation led to Trump releasing Indian map with kashmir part of india■)

P2:
1) so you think Trump makes powerful statements(agreed ■)
2)Why do you think he can create such impactful statements.

P1:

#THEOMI

1) Impacts of AI on different workfields.

P2:

1) what are impacts of data centers on environment.(said it has very -ve impact)

2) AI had negative impact on environment on employment then why do we need such negative thing?

P1:
Asked about my city, my travel and current stay and concluded the interview.

UG: B.tech(Mechanical Production Engineering) 9/9/8 Work Ex: 44 months

Experience Notes:
Overall, it was a chill interview. It went on for 20mins and revolved around AI for like 90% of the time.
It was like a conversation/debate more than grilling.

Q&A;:
Interview Transcript

IIM Udaipur - 09/02/2026

Panel - 2 Members Male(M) and Female(F) (M is a Finance prof, Was not able to find F but I think she is from Marketing)

M- TMAY
M- Why MBA now?
F- There is an increase in AI in all the fields. People are saying that MBA is going to be obsolete. What are your thoughts?(The interview went on 15mins around AI, a lot of cross questioning)
M- I don't think Empathy is that important of a trait for a manager. So how can you say that AI won't be a good manager just because of that(I had mentioned empathy and EQ for the previous question)(a few cross questioning on my views regarding this)
F - Have you used AI? What has been your experience with AI. Mention an instance of it.
F - What field do you want to go into after you complete your MBA?
M - You have strong viewpoints regarding AI, so mention a company where there will be minimal impact because of AI. (I mentioned Manufacturing industry and Ops&Supply; Chain)
F - But that is the field were AI is going to be a major powerhouse in the future. (I agreed that AI would be present but it will be mostly for the machines, people are needed for keeping it under control etc..)
M - So, lets say that you become the manager of a Supply Chain based company, Will you layoff all the employees who are working there and employ just AI? Why not?
Aren't you enough to manage the AI, why do you need extra workers?
F&M; - Okay, you have mentioned all your points, now, give us a quality or trait of yours which will make us choose you over the others.

Background Notes:
Profile: BBA Fresher – 9/9/9 Panel: Two panelists (Panelist 1 – ~40s, Panelist 2 – ~50s) Panel 1

Experience Notes:
Not very good interview overall. No academics, no HR, no “Why MBA” questions. The discussion was mainly focused on my freelancing, but the questions were very geographical and I fumbled there. Overall, it was a humbling experience.

Q&A;:
Q1. Panelist 1: Tell me about yourself.
Me: Answered.
Q2. Panelist 1: What freelancing do you do?
Me: Explained my freelancing work as a linguist and vendor.
Q3. Panelist 1: How do you handle different clients?
Me: Explained.
Q4. Panelist 1: How do you hire people?
Me: Explained.
Q5. Panelist 1: Which country has the most number of languages?
Me: Answered India (incorrect).
Q6. Panelist 1: Take a guess out of four options.
Me: Guessed all four (all incorrect).
Q7. Panelist 1: What was your thought process behind the guesses?
Me: Explained elimination logic. Correct answer was Papua New Guinea.
Q8. Panelist 1: How do volcanoes work?
Me: Answered.
Q9. Panelist 1: How do volcanoes affect people?
Me: Answered.
Q10. Panelist 1: How do volcanoes create new species?
Me: Answered.
Q11. Panelist 1: Besides evolution, what can be the reason for indigenous species growing / why do different species grow?
Me: Mentioned migration and natural factors; panel expected a specific research-based concept.
Q12. Panelist 1: How comfortable are you with statistics and probability?
Me: Said not very comfortable.
Q13. Panelist 1: What is the probability that when 5 coins are tossed, exactly one head appears?
Me: Could not answer.
Q14. Panelist 1: There are 100 mangoes, 1 is defective. What would you do to make it 98% defective?
Me: Attempted conceptually but could not structure properly.
Q15. Panelist 1: First year will be full of probability. How will you cope with it?
Me: Explained approach.
Q16. Panelist 1: Do you follow current affairs?
Me: Yes. Mentioned India–EU relations, CPI basket change, tariffs.
Q17. Panelist 1: Which sector is affected by tariffs?
Me: Answered.
Q18. Panelist 1: What is the current buzz around India–US trade?
Me: Mentioned agriculture-product related discussion.
Q19. Panelist 1: Two pros of the Budget?

#THEOMI

Me: Answered.
Q20. Panelist 1: Two cons of the Budget?
Me: Answered.
Q21. Panelist 1: What do you want to do post-MBA?
Me: Answered.
Panelist 1: That's it. Thank you.
Me: Thank you.

Experience Notes:
Overall interview was very conversational, no grilling questions as such. Gave me time to think, and basic level questions.

Q&A;:
1. TMAY; 2. What all social activities you have engaged in (had mentioned social work in introduction); 3. Asked about patents (was in details I had entered in form); 4. Do you read newspaper, what all recent news that you have read? (mentioned Rafael deal, US-India FTA, Great Nicobar project) asked some follow-up questions; 5. Why MBA?; 6. Some questions relating to UG (stress-strain curve, what all important parameters are to be considered while selecting any material, Thermodynamic laws). 7. Maths questions (1. what would be the range of third side of a triangle if the other two are 7 & 10, 2. if 2 dice are rolled, what is the probability that at least one of them is 6, 3. Graph of IxI); end,

Background Notes:
Btech Computer Engineering final year, 9/9/8, 96.62%ile, 2 pannelists 1 Female (Prof. Ria Mishra) 1 Male (Late 40s)

Experience Notes:
Overall the interviewers were very sweet and supporting, the interview was also like 15 min only. But I felt pressured as it was totally UG heavy.

Q&A;:
P1- Tell us about yourself
P1- what kind of things do you write
P2- You are a really bright engineering student, why waste the potential doing an MBA?
P2- For how much time were you the chairperson of the student branch

#THEOMI

P2- Did you do any conflict management there?
P1- what specialization you wish to pursue in mba?
P2- Product Management can be done if you move forward in your current intership, why do you even need an MBA for that?
P1- What were your favourite UG subjects
P2- let's ask questions on DBMS
P2- difference between sql and no sql, difference between 2nf and 3nf, What are ACID properties. Does nosql has acid properties?
(I answered no it has BASE properties but I can't recall them)
P1- Are you following news recently? What are some recent news in technical domain?
(Mentioned the anthropic agentic AI)
P1- Explain agentic AI
P2- Explain RAG
P2- what is embedding?
(Fumbled a lot here, didn't brush up the AI concepts)
P2- what are some agentic AI frameworks
(Answered 2, said langgraph and Autogen, he said not langgraph but langchain, i answered oh, must be langchain then, but actually it is langgraph which is based on langchain (■´■;■■■;■`■))
P2- okay no more questions you can go
(Went to the door, then she shouts how good are you at maths, i said I'm comfortable, said do you know about stats, i said yes I do)
Then she recalled me to the seat and asked about regression and logistic regression with some other questions on logistic regression.
Then I was finally free to go.

Background Notes:
Bsc. HHA. Work ex as a chef. Panel Composition: • P1: Male Professor (late 30s) • P2: Male Professor (early 40s)

Experience Notes:
Very conversational.
Initially they did try creating pressure by saying that they absolutely hate biryani.
And also tested my knowledge very practically by asking about the hotel the room etc.
Threw out creating valuable experiences quite a lot in my why mba and long term goals, hence tested on that too.

Q&A;:
P1: Tell us something about yourself.

Candidate:
Biryani TMAY.

Both panelists appeared engaged.

P2: You’re a sous chef, right? What exactly is a sous chef, and how is that different from a chef?

#THEOMI

Candidate:
I explained the culinary hierarchy in a professional kitchen.

P2: So you don't cook every day?

Answered.

P2 acknowledged positively.

P1: I hate biryani. I hope that throughout this interview you can convince me that you're a good biryani and not an awful one.

P1 (continuing): What type of biryani are you? Hyderabadi?

Candidate:
I responded, "No sir, I'm more of a Lucknowi biryani."

P1: Why? What's the difference?

Candidate:
I explained that Hyderabadi biryani is generally bold and spicy, whereas Lucknowi biryani is more aromatic, subtle, and layered. I connected this to my personality — calm, composed, balanced, and not quick-tempered.

The panel reacted positively.

P1: You're earning and managing people already. Why do you want to do this MBA?

P2: You're already a manager. Your degree is in hotel administration. Why come here?

Candidate:
I explained.

The panel acknowledged the explanation.

P2: What are your long-term career goals?
Told.

P2: But Indian hospitality is already considered very good.

Candidate:
I responded that while those who experience Indian hospitality recognize its quality, many global consumers still hold outdated perceptions. I would like to contribute toward reducing that gap by expanding awareness and exposure.

Both panelists appeared satisfied.

P1: It's Valentine's Day. My wife and I are visiting a restaurant. You keep talking about creating experiences. Design one for me.

I requested to use the notepad.

Candidate:
I structured the experience as follows:
• Warm welcome and bouquet for the spouse, from your end.
• Decorated walkway with photographer for good clicks.

#THEOMI

• Candlelit three-course curated menu, if preference was given would have listed the items, in a private dining setup.
• Specific Décor elements
• Special Valentine’s dessert/cake.
• Printed photograph in a wooden frame as a takeaway memory from our end.
• Escort service upon departure

The panel acknowledged positively.

Question 7: Current Affairs

P2: Do you follow the news?

Candidate:
Yes, sir. I read The Economic Times and The Times of India in physical format.

(The panel reacted positively to reading physical newspapers.)

P2: Tell us one recent national and one international news item.

Candidate:
For national news, I discussed expansion plans by hospitality groups and introduction of experiential brands into India.

For international news, I discussed recent U.S. policy changes regarding environmental emission standards and climate-related regulations.

The panel acknowledged both responses.

P1: What is your impression of this hotel?

Candidate:
I commented on:
• Strong restaurant activity suggesting healthy occupancy
• Conference and banquet infrastructure as a competitive advantage
• Functional room access design
• Warm lighting and décor

When asked about negatives, I clarified my assessment was based on limited exposure.

P2: What other interview calls do you have?

Finish.

BMS 988, lyear workex, interview location : Gurgaon, 2 Panalist M~50 and F~30

Experience Notes:
Chill interview, no grilling, few L2 questions trying to check understanding of concepts, panels were polite

Q&A;:
Panel: P1 and P2

P1: Asked name, (checked ug) so you have done BMS finance, have worked as well?
Me: yes

P1: where?
Me: Answered

P1: So you are traveling from Mumbai?
Me: Answered that have left my job and currently living in my home town

P1: ok!! Why you left your job?
Me: told for higher education

P2: Asked about workflows, clients
Me: Answered

P1: what kind of research were you doing ?
Me: Answered

P2: Asked do you know about agentic Ai?
Me: Answered

P2: Do you know about Claude?
Me: Answered

P2: Claude have a Wealth management agent. Do you think that can impact on your workex?
Me: Answered in q broader way and explain about the current situation in overall industry.

P2: I asked specific about your workex.
Me: Sorry sir, then Explained in that context

P1: How do you think one can make themselves ready for such threats from AI
Me: Answered

P2: Are you familiar with IPO?
Me: Sir I don't have work exposure in public markets, but I have learnt about it in my undergrad.

P2: Do you know whatt are Same IPO?
Me: Answered (Did'nt know much in depth)

P1: What other subjects you studied in college? Your second favourite than finance ..
Me: Marketing and operations

P1: What do you think a business should do first STP analysis or 4Ps strategy or any other
Me: (Was not sure) Answered badly

P1: (Cross questioned) Are you sure?
Me: (Fumbled tried correcting my answer)

#THEOMI

P1: What is difference difference between Marketing and sales? (Questioned in between)
Me: Answered

P1: Have you studied statistics?
Me: Yes

P2: Do you know what is regression?
Me: Answered

P1: Is it used in finance?
Me: Answered about calculation of Beta the systamatic risk

P1: what are the dependent and independent variables in beta regression
Me: Answered

P1: How do we check the regression model?
Me: Answered about summary analysis and R squared test

P1: Asked about R squared, suppose you model is getting R square of 0.7. What does that mean?
Me: Answered

P2: Do you know about Logistics regression?
Me: No

P2: Do you know some recent news about BlackRock?
Me: no

P1: what are the factors for rupee depreciation currently post India US and EU trade deals
Me: Answered

P1, P2 : That all from me, Thankyou
Thank you

C1, C2, C3 - CA with some finance experience
C4 - supply chain person working in Jindal
C5 - me (software developer at bank with electronics Ug)

3 panelists - two male panelists p1, p2, 1 female panelist p3
P3 - Tmay for everyone and a lot of cross questioning for each of the candidate. Basically trying to understand each and every aspect. Also they ask regarding everything they find interesting in your form.

Some of the fin questions were around valuations, ipo, startups.

Asked me about the semiconductor industry and some cross questioning

P2 (fin proff) - questioned fin candidates more
Asked me about my workex and cross questioning.

P3 - Why are gold and silver prices rising? This was asked to all 5.

G1 -2
P1 & P2
They had common questions for all the 4 candidates.

1. Leader vs teacher

2. If you have money remaining out of the fest, how will you utilise it?

3. Ethics vs revenue dilemma
Long discussions on this, proff tried to understand everyone's perspectives and cross questioned

Background Notes:
GI1 -- 2 interviewers (1M 1F) 4 panelists (P1 - CA+1.5 yrs workex for fin (@akshitalodha), P2 - CA + 2 months workex for fin, P3 - engg for mkting, P4 - engg for fin). GI2 -- 2 Interviewers (1M 1F) 3 Panelists (@akshitalodha, 2 engg - 1M and 1F, both into consulting)

Experience Notes:
GI1 was in conversational style, no grilling, no cutting off answers. P1 and P4 selected for GI2

G12 was a chill interview, involved a lot of laughing from the interviewers side!

Q&A;:
Case study given (before GI1) - person who has been in a company for 2 decades , scaled it to a huge scale, has become Regional head. But his working style is not good, late nights, weekend reviews, mocking in meetings. Subordinates not happy, 25% attrition rate. But he is a very high performer. As an HR, what would you do

GI1

- Started with TMAY + something not in the form
- Then took Indigo case study, and asked each of our views as a consultant, how would we advise the company after everything that happened recently
- Specifically asked P1 and P3 for financial and mkting solution, respectively
- Then questions to everyone about their workex and went 1-2 questions deeper on it (give many hooks, they were writing the hook words down on their notepad and then asked about it later)
- Went back to the Indigo case and asked the mkting strategies required to P3
- Then why MBA. For P1 and P2, cross questioned why after CA. For P3, why switch to mkting from engg

GI2

- Introduce yourself, without using anything written in the form. Let us know the person you are
- discussion on case study given. What would you do as an HR
- then what would you do if someone comes to you with that guy's complain and you are just a colleague, not HR
- Apply the same situation to MBA, you have a professor whose teaching style is something you feel is very outdated and not very genz ka style. What would you do?
- Why are you doing an MBA, what do you think management education is about
- describe one such incident from your workex where you felt you could have done better and why

Note - Most of the other panels also had similar discussions, just one panel was given an entirely new case study and no discussion held on the earlier one.
The case given to them - is installing vending machines for condoms within the campus okay? Is having Co-ed education/campus rooms okay? (The panelists' review was that it was sort of a stress interview for them, a lot of ethical dilemmas and cross questioning)

#THE CMI

Background Notes:
997, NIT, Computer science, CAT: 96.5, 3 yr workex, Call: BM(IM preference written)

Experience Notes:
I really enjoyed both rounds, no stress interview, Profs made sure we are comfortable speaking

Q&A;:
Among interviewees, 5 total, all engineering background, calls 1oscm, 1bm(im), 2 fin
2 prof in panel, 1M(finance prof)and 1F
Case study given to read: On a family business. Many family members in the board. Some wanted to sell the business and some wanted to continue. Need to form opinion on whether sell or continue, also how to convince other board members to align with your stand(asked in GI2).

GI1: Asked to introduce one by one in 1 min each. Then they pick each candidate and asked few questions to him based on the profile.
They wanted to check the fit for the specialisation and work experience. Regarding workex, they were checking whether we know the business side of whatever technical work we did, like revenue, competitors etc(for me they asked, not to others).
Asked to tell an incident from work where I had to navigate a tough situation and how i tackled it.
If you have call in specialisation in which you don't have background like education or workex, you have to convince them why you are interested in this.

Among 5 folks, only 4 moved to GI2.

GI2: Q1: Imagine you are in lift with prime minister and you have to introduce yourself, think for a min and tell how would you.
Discussion on case strategy given before GI1. Asked to take both sides and tell how would you convince oher board members to take your side. Each candidate was given chance to speak, 30 sec each for same question. Prof literally started timer for each person in phone.
Discussion on social media for kids, pro con type.
EU-India trade deal which happened today, takes on that.
Any questions for them. I asked what you like most about working at SPJIMR.

SP Jain Interview
28/01/2026

Case study - A family business of motors components started by grandfather has 700 crore market value. The employee count started with 20 and is now at 2000 with 2 major plants.

#TIEOMI

The third generation has 5 stakeholders
Elder brother - Chairman (26%) wants to liquidate the company and sell it
Younger sister - CFO (25%), wants to higher an external CEO and expand the business to EV
Middle sister HR (25%) is not sure what to do
Cousin 1 (12%) also wants to sell the shares as he needs money for his own logistics company
Cousin 2 (12%) will go with the majority

GI 1:
Interviewer: 2 male one from OSCM background and another from Marketing
Interviewee:
P1 (me) GEM workex in consulting for OSCM+BM,
P2 GEM workex in operations for OSCM,
P3 GNEM workex in Marketing for Marketing

Q1 - TMAY and why would you fit in this course? (to each one of us)

P2 talked about some patent and most of his questions where targeted to that
P3 was asked about his two jobs in marketing and when he was not able to give two many hooks they went to his undergrad which also he couldn't answer properly (he seemed pretty nervous)

P1 (me)
If a company wants to launch a product, what all process would you follow step by step
Make vs buy how to decide
If you want to buy a product from a supplier, what will be the steps you will follow
I had mentioned efficiency improvement for my client in my TMAY, so asked what kind of efficiency improvement, its impact, and how was it measured?
Overall very conversational for me

Result (P1 and P2 went ahead for GI2)

GI 2:
Interviewer: 1 male and 1 female
Interviewee: 4 folks (1 for IM and 3 for OSCM)

All questions were to be answered by everyone one by one
Tell me something which is not in your Form A and B
For the above case study:
Everyone pick one character and tell us what was the problem for that person
If you were the younger sister what would u do
If you were the elder brother how would u convince the younger sister
Don't you think family name is important

What does Brand mean to you? And does it matter your choice of selection?
You are all GENZ does influencer influence the things you buy?

Case Study: wafers company seeking for external VC, PE investment. there is debate in the family whether to take or not

GI 1:
1) TMAY to all
2) P1: favourite subject in chemistry, why diverse research topics and why they are not closely related to UG(research on Millets, Climate Change)
3) P2: describe how the project planning would be done for a AI customer service(he was a Business analyst), Asked about metrics to measure return on a project(UG), how to evaluate a service business(AI customer Service),
4) P3: Asked about UG, His research in UG, What is actuator? (research on iot)
5) P4: asked about his role in the startup he was working, how he contributed during a pivot in the startup, What is the app he is working on, what it does ?
6) P5: asked about Microservices(mentioned technical blogs in TMAY), how databases are integrated in Microservice, Monolith vs Microservice architecture, What is API gateway, it examples, what type of movies u watch and why

GI 2:
1) TMAY - more focus on personality
2) Asked to pick a side and explain why?
3) What do u prefer in organisations Business suits/formal or startup culture dress code? and why?

Background Notes:
2 years workex - Financial Ops, 9/9/8, 99.47 percentile

Experience Notes:
GI1 was focused on technicals and GI2 on knowing you and your thought process. Both interviews were conversational and engaging. Thoroughly enjoyed the experience as it were group interviews (more engaging) (could also be because I could answer well and the interviewers seemed convinced with the answers).

Apologies for the late transcript. Should help in the next season.

Q&A;:
GI 1
3 Professors - 1F, 2M

#THEOM

Rajdeep Sharma
Disha Bahnot
Sajeev Abraham George

5 Panelists - All from a finance background
M1- 2 years workex, TresVista, CFA L3
M2- Fresher, IPM Ranchi BBA, CFA L1
M3- 2.5 years workex, PwC, CFA L2
M4- 2 years workex, PwC
M5- 2 years workex, Goldman Sachs (me)

Q. TMAY for all + Why MBA

To M1
Q. Why PGDM in Finance despite completing CFA - answered but professor did not seem convinced
Q. Convince the other two CFA candidates on why they should not pursue MBA and continue with CFA journey - answered
Q. What do you want to do after MBA? Which vertical in Fin? Explain difference between PE and VC?
Q. What is an SFB? How is it different from a normal bank? What are other QUANTIFIABLE metrics that you'll look at for company analysis.

To M2, M3
Q. Asked the two CFA candidates whether they were convinced, if not, share their POV on why they should move forward with an MBA

To M3, M4
Q. What's the role of AI on your industry? (directed to all panelists eventually)
Q. What are the future prospects of Consulting?

To M4
Q. What is your favourite data visualisation tool? Then questions related to Data Visualization related to the work on PowerBI during his job. Question on Heatmap.

To M5
Q. Why BM course? What specialisation would you go for in BM? Which role in Finance?
Q. How would you decide whether to invest in a 2 year old startup?
Q. (From SFB question)- What is ESG?

Last question for all - What is the most important domain for functioning of a business? (You cannot say finance)
Please note, a lot of times questions were redirected or called to volunteer to answer.

Verdict- All 5 made to GI2 (the feeling of making through as a team is unparalleled).

Case Study:

AI generated summary: The case involves a prominent family-owned business group in India, valued at approximately ■2,500 crores, where roughly 80% of the value derives from its core cement logistics operations- a mature, experience-driven sector- and the remaining 20% comes from newer ventures in wellness and healthcare, including boutique gyms and similar premium health-focused businesses. The group holds ■450 crores in highly liquid assets (such as bonds and fixed deposits).

The patriarch, seeking to divide the business equitably among his three sons, plans to allocate the established cement logistics arm primarily to the eldest son, who has decades of hands-on expertise in the field, while assigning the wellness and healthcare segment jointly to the other two sons. However, the 29-year-old grandson (son of one of the sons), a recent MBA graduate, strongly believes that India's rising

#THEOM

disposable incomes and growing health consciousness—mirroring the earlier housing boom—will drive explosive future demand in wellness, positioning it as a high-growth opportunity far outpacing the stable but slower cement sector. He proposes trading part of his entitled share in the group's common/shared assets (or core business inheritance) for a stake in the wellness vertical managed by his uncles, despite his own father's skepticism that many boutique wellness setups are Instagram-driven hype with limited real revenue or profitability.
(Part 2/2)
The grandfather remains neutral on the specifics, focused only on a fair division among his three sons, leaving room to potentially use the liquid assets for pilots, carve-outs, or compromises—while family dynamics, risk tolerance, execution challenges, and the uncles' potential reluctance to dilute control remain key unresolved factors in determining whether to preserve the traditional structure or allow diversification into the higher-upside but riskier wellness space.

GI2
2 Professors- 1M, 1 F

Surya Tahora
Vineeta Dwivedi

6 Panelists- 3F, 3M

Primarily only 4 questions and multiple diversions and discussions around them:

Q. Tell us who you are as a person.
Q. What is the main theme of the case study? What is the biggest mistake the family might make?
Q. Have you guys joined a coaching? What is the biggest advice/ value add from their end? Also asked if we had read the news in the morning before coming for the interview. Only I raised my hand. They questioned others on why they hadn't if they knew it was very important.
Q. Give us one of your weaknesses. Asked each person to select any other person and advise how to work and improve on the weakness.

Q&A;:
G1: Total duration: 55 mins
2 Panelists - 1 Male(P1M) and 1 Female(P2F)
5 candidates - 3 were for PGDM Finance(including me)(F1 F2 F3), 2 Marketing (M1 M2)
Asked to introduce one by one. I was the last - told about my achievements in acads and family business.
P2F - Asked me if I had done any internships or professional work other than family business. Asked what my family business is.
Then said to exlplain more on family business and my specific involvement in it.

#THEOMI

Then asked what is one thing you like and one thing you dislike about your family business.
F1(me) - Answered. Somewhere I mentioned inventory management.
P2F - Do you know LIFO FIFO? Asked F2 to explain what it is and what should I follow
P2F - Same question to F3. Then asked me which one would you follow?
F1 - Answered that both methods are irrelevant to the business and that inventory moves as per demand as their is a high risk of inventory obsolescence in the apparel business.
P2F - Asked F2 and F3 for which industries these methods are relevant. Asked the same question to me.
F1 - I said majorly manufacturing sectors that involve raw materials. Not sure about the answer but she seemed satisfied.
P2F - F2 had mentioned profitability so asked what it is? Asked the difference between profit and profitability
P2F - Asked F2 what is more important suppliers or employees as he had mentioned something about cutting down on labour costs. Asked F3 the same and then me.
F1 - Answered diplomatically that both serve different purpose.
P2F - What is biggest hindrance to your business in terms of structurally scaling (had mentioned it as something I dislike)
F1 - Said availability of skilled labour and justified. She was not very convinced at first but after justification she was ki theek hai makes sense.
P2F - Asked if anyone has a demat account. Asked M1 what a demat account is.
Everyone said they have but dont invest (played safe). I said I invest. So asked me how do you pick stocks?
F1 - Said I majorly invest for long term in large cap stocks only and i look at the fundamentals.
P2F - What do you look while analysing fundamentals.
F1 - Was answering revenue, promoter shareholding but she cut me off saying where do you search for revenue. The intent was to ask about where i get financial statements from but i answered i compare and filter stocks from stockedge, screener etc. She was not aware of it so explained a bit on that.
P2F - Asked sir to take over.
P1M - Asked M2 of his work experience in healthcare insurance.
Then asked what is branding, types of branding
P1M - Asked M1 the types of branding, is company level branding better or product level. An example where product level branding would not make sense.
Said to M2 that I dont believe in healthcare. Convince me to get an insurance(That was his job btw)
P1M - Asked M1 about his work experience which involved something very technical about recycling and some credit trade between recyclers and MNCs mandated by govt.
P1M - Asked me to explain about the credits.
F1(me) - Told very superficially (honestly kuch samajh nahi aaya tha)
P1M - Went into a long discussion with F2 and F3, mainly F2 on statistics asking significance, confidence interval, sampling, real life applications (again, zada kuch samajh ni aaya)
Asked me real life application of homogenous sampling. Then said do you know the terms. I said no toh he moved to F3.
(Part 2/3)
So, sir asked me only 2 questions, couldnt answer any.

Verdict: F1,F2,M1 proceed to G2

G2: Total Duration - 1 hour
2 Panellists - Two Male - one professor of organization and leadership studies and another professor in strategy.
4 candidates - C1, C2, C3, C4
We were asked to introduce then discussions followed on the case study originally given to us (I will include gist of the case study at the end) and then the strategy professor was introducing twists in the case countering every possible solution anyone of us could come up with. After discussing contently on this case, they gave us another one.

“You are the chairperson of a building society. It has 3000 sq ft. flats. About 50000 or 100000 per sq. ft.

There are a total of 6 lifts - 5 are for residents and one is a service lift - it led to delays in order delivery and house help arriving in time so the members did a voting to scrap any such thing as a service lift. It was a tie and decision is on you. The question is whether you want to segregate the residents and service people or not segregate."

We had to first answer our stance in one word then later justify. The 3 candidates went before me and said not segregate so i said segregate to stand out. What followed was a 3 versus 1 discussion where everyone first justified their points then i was asked to counter their points then they were asked to counter mine and the case was evolving alongside wth new inputs from the panelists if they did not like a point. For example C3 said something about heavy equipments so they said that leave that it can be used for that only between 2 to 5. I felt i could defend well. Towards the end, the other prof who was quiet all along asked me some questions trying to make me change my stance. I steered well, I could tell he was satisfied with the answers.
After this we were asked that the economic survey projects good growth but the income gap is widening. What would you do to solve this. First we all had to answer in one line the solution then justify. I went down a rabbit hole in this one, did not answer well.
That was it. At the end they asked if anyone has any questions. C2 asked what is one skill a student should learn before getting into a b school. One prof answered it saying 'think for youself'. The strategy prof continued it with how critical thinking is missing in students with AI and everything. Students' knowledge is limited and they lack depth. Told us to inclucate reading habits as that can prove to be a differentiating factor. Then C4 asked that everyone today says to be a generalist instead of specialist. What are your opinions? He talked 2-3 mins on that too and explained well.

Case study that was given to us originally -
(Part 3/3)
"Saanjh ethnic is a woman ethnic wear brand owner by siblings - meera and arjun. They sell their products through WhatsApp groups, facebook messaging and instagram reels. Peak season sales are 60-70 lakh. They enjoy minimal advertising strong unit margin and repeat orders. Customers love their product. Sales have been stagnating and social commerce options becoming flat. Despite the same creative effort They are not seeing results. Anand who is meera's fiance is an angel investor and feels that they have hit a ceiling and now need to list on a large e commerce platform. Meera however has her reservations as she recalls the case of a small apparel seller doing $800000 a month Sales on a global e commerce platform. Overnight the platform had tweaked the algorithm to promote in house products and this seller got into a pricing war, burdened with commissions and paid promotion. When this seller tried to move customers to his own website, the platform froze his payouts, delisted citing policy regulation and eventually the company shut down. If they decide to scale on their own via offline channels, it would take 60 lakhs approx and it would not be a guarantee to increase sales or footfall. Arjun thinks that they should take a hybrid approach, go on one e commerce platform for exposure. Meera still has her reservations. A mentor who is a former CEO of some apparel brand summarised it as " you have built a brand with people trust. would you risk trust for scale or stagnation for control?" What should meera do?"

Q&A;:
Interview Timeline
Slot Time: 10:45
Case Study Discussion: 11:00 to 11:20 (20 minutes)
GI 1: 12:00 to 12:45 (45 minutes)
GI 2: 15:00 to 15:45 (45 minutes)

Case Study (Broadly)
A traditional family business was founded by Mr. Deshmukh in the 1950s. Over time, it has grown into a large business group. Currently, around 80 percent of the group's operations are in traditional sectors such as construction, transportation, and logistics, while the remaining 20 percent is invested in a relatively new venture in the health and wellness sector. In addition, the group holds reserves and surplus amounting to INR 450 crore, along with significant real estate investments.
Mr. Deshmukh was a patriarchal figure and chose to distribute the family wealth only among his sons. He has three sons. The traditional businesses were transferred to the eldest son, Vikas, while the health and wellness segment was given to the two younger sons. The remaining wealth and reserves were distributed equally among all three.
Vikas has a 25 year old son, Arjun, who has completed his MBA from Singapore. After returning to India, Arjun suggested that his father acquire the health and wellness business from his uncles. He believes this segment has strong growth potential due to increasing health consciousness among consumers. Arjun anticipates that the health and wellness sector will outperform the traditional businesses within the next decade.
Vikas disagrees with his son's viewpoint. He feels that such businesses look attractive on social media but do not generate sustainable revenues. He also cites the example of the Ambani family, where one branch focused on traditional businesses and succeeded, while another ventured into new businesses and faced setbacks.
The key question was whether Arjun should join the traditional business and modernize it from within or continue convincing his father to acquire the health and wellness business from his uncles.

Group Interview 1
Panel
Two panelists
P1 Male Finance background
P2 Female IM background

Opening
TMAY was asked from everyone. The panel actively looked for strong hook points and probed deeply wherever something concrete was mentioned. The focus was on what candidates had actually done rather than superficial claims.
Questions Directed to Me (Finance)
Q1. What was your actual role at work?
Answered.
Q2. Which sector did you work in specifically?
Answered.
Q3. What valuation methods did you use?
Answered.
Q4. How do you discount future cash flows?
Answered.
Q5. What is WACC?
Answered.
Q6. Which WACC do you use, the acquirer's or the target company's?
I got confused here. I answered but could not clearly justify my response. I fumbled and lacked proper support.
The same question was asked to the other finance candidate.
Q7. What type of companies have you valued, public or private?

Answered.
Q8. How do you source reports and data?
Answered.
Q9. What is better, a debt heavy or an equity heavy capital structure?
Answered.
Q10. Is it easier for a debt heavy company to become equity heavy or vice versa?
Asked for a minute to think.
The panel asked the same question to the other finance candidate meanwhile.
I answered, but could not explain my reasoning clearly and appeared nervous.

No further questions were asked to me after this.

Questions to Other Candidates
(Part 2/3)
The panel then focused on the other finance candidate, discussing his work experience, a startup he was involved with, product economics such as cost, pricing, and margins, reasons for choosing finance, and recent finance related news. He spoke about the surge in gold and silver prices.
P2 then questioned the three IM candidates, focusing on their core roles, responsibilities, and engagements.

Overall the environment was chill. It felt like a typical technical round. There were no questions from Form A or Form B.

Result
One finance candidate (me) and two IM candidates were shortlisted for GI 2.

Group Interview 2
Panel
Two very senior professors
P1 Male Professor of Ethics
P2 Female Senior Faculty

##
All questions were open to the group. No individual was pointed out. Anyone could volunteer, build on others' points, or counter arguments.
##

Questions
Q1. A brief introduction was asked, with explicit instruction to talk about yourself as a person and not repeat your CV.
P2 appreciated all five interviewees for smiling and mentioned that the previous panel had also commented positively on this.
Q2. The panel asked for views on the case study given earlier.
Q3. Each candidate was asked to counter one argument made by a peer that they disagreed with.
Q4. A variation of the case was introduced and candidates were asked to respond from the father's perspective.
Q5. The case was changed again. Suppose you are running a protein supplements business and there is news suggesting long term harmful effects, though not conclusively proven. What would you do? Would you discontinue the product?
Q6. What if the government introduces a regulation requiring high sugar products to carry a bold warning on the packaging stating "Contains high sugar, harmful for health." As a businessperson, would you support this regulation or oppose it?
Q7. Quickly mention two things you like about India and two things you dislike.
(Part 3/3)
Overall the discussion was deep and reflective. The panel focused on ethics, values, and personal judgment. They often revisited the same question and allowed candidates to change their stance. The atmosphere was calm,

#THEOMI

engaging, and conversational. No questions form form A or B.

Experience Notes:
Chill and comfortable process (gave us a mug at the end)

Q&A;:
Case study: Blusmart and revolving around EV, fleet vs aggregator model ie reliability vs scalability (20 mins)

GI 1: 3 people in one panel ,IIT Dharwad (bsc maths fresher), IIT KGP (2.5 Years work ex) and me
3 panelists, started with tmay and intros, went on to workex, what kind of work you do, for the fresher questions were more on pors and how bsc maths would help in finance, it's real life applications, is there anything like non maths finance. She mentioned hostel affairs por, what's the most bizzare hostel issue you faced , mentioned moulds, what are moulds bacteria fugus etc. For me it was mostly on llms (non techinal) and normal conversation , do you think ai can take coding and PM jobs, why do you want to become a PM? gave all steps followed by PM, said it is a glorified version of PM. Why mba to everyone. Chill and conversational interview. (35 min)

Gi 2: 2 moved ahead
Mostly on behavioral side, intro , case study was discussed 2 interviewers, 4 interviewees. Something about extra curriculurs mentioned in intro. I was asked what is one thing that cricket taught me which music couldn't, mentioned teamwork, further reframed ; in a single person sport what it could be, said resilience. Mostly questions were on extra curriculurs and your thought process (30 min)

Experience Notes:
It was great and chill

Q&A;:
2 panelist one male one female prof
5 candidates 3 freshers 2 with workex and all from finance specialisation

The panel was quite chill and welcoming like when he entered the asked. Did you talk to any of the people? Then like candidates of them said that no

P1M- why
So candidates collectively said it is unethical, but then they laughed that you use GPT and coaching for Cat that is also unethical.

Me- I I talked to one of them because I knew the person from coaching

P1M asked wht did they say

Me- they said it was good and asked about cashflows
Thats wht they told

P1M it is the only thing they must remember so now u must have prepared that

Then they asked all of us to introduce with a timer of two minutes, including finance

P1M-asked us about our cash flow for next four years, including two years of MBA and two years of job, net cash flow that we have cash outflow and in flow from salaries , your fee payments, your expenses, and had a discussion on it

Why did u chose salary assumption to be low or high discussion on ctc and ppl missed on tax as expenses

P1M- one thing you would like to change about SPJMR to be answered in the end

P2F-asked me about economics because she was an econ prof lemon economy, moral Hazard

Me- havent studied these concepts

P2F-how will immigrant students come to India for study? Will it appreciate or depreciate

Me- answered

P2F it can govt regulate it or is it fixed exchange rate

me- answered

P2F- how govt control fiscal deficit without affecting inflation

me- answered with reference to recent news

Asked other candidates about their internship project, case comp example, certain research paper they mentioned in the intro

In the end we answered one thing we would like to change abt SPJIMR

4 got shortlisted for round 2 including myself

2 female panelist

Introduction in 30 seconds

Discussion abt case

Snj jewellers is a comapny gold ornaments 60 years old in chennai kerela has limited reach ppl switching to

#THEOM

chained brands father says to expand using franchise in teir 2 tier 3 and local areas daughter says digital expansion prem customers home visit the finance person shridahr points only 5% online sales so which aproach should annaya chose

Why is each one of you competent to consult on this ?

Everyone answered
P1- but u do not have real exposure how do u know ur case case comp was actually effective
Me- told some diff strategies apart from case for revenue stream and told abt thinkung is analytical like gold accumulation plan to attract ppl

P1- asked everyone to build upon idea and how it is good or bad

P1- anything else you would like to throw light upon add on this case.

Good 30 mins discussion

P1-now, you all seem to be why you want to do an MBA after this?

P2-ask everyone, why do you want to do the particular specialisation they chose
Dream company

Me- answered

P2-are you ready to come on working hours?
Me- answered

Q&A;:
Case: RBI recommends to explore alternatives to SMS-based OTP. One suggested method is user pin + rotating pin on apps (like how zerodha uses) + biometric. No one has implemented this before in payments sector. As a payment startup, in a dilemma if to be the first mover in the space or let the big companies solve the complexity, navigate the compliance and then get in when things are stable. The case study was detailed in background, so that too helps you in thinking on various aspects

GI 1: 3 profs in the panel, 5 interviewees (2 BM + 3 IM & BM) - all people with workex

1. TMAY and Why MBA under 2 mins
2. Explain what you do at your job and a bit of cross questioning on it. (I was asked about the metric to measure success in my job, and the initiatives I worked on)
3. Recent news on tech stocks crashing and reasons behind it. (Asked everyone)
4. What is Agentic AI? (Asked everyone)
5. Since you have 2.5 years of workex, why not go for PGPM? Or why leave your job by losing opportunity cost?

Opinion: They had an eye for details and were testing if you know the stuff you mention. One prof grilled a bit on technicals, but that was to see the understanding of the subject.

GI 2: 2 profs, Diverse Panel

1. How are you feeling about the process till now, and one word to describe the feeling.
2. Tell about yourself which you were not able to mention in the form.
3. If you had a magic wand, what is one thing you would want to change in your life?
4. Case discussion, summarize and give your opinion - Everyone spoke once, no cross questioning
5. Asked some people about a point or two in their Form B. More like only if they were curious about something in your Form B.
6. Any questions for us?

Opinion: Very chill panel, made everyone comfortable, were joking a bit in between. No grilling, pure conversation!

#1 IEOM

Experience Notes:
GI1 was all about academics and some abstract questions. No Workex/GK questions to anyone. M1, M2, M3 selected for GI2.

GI2 was relatively chill, no questions from Form B to anyone. Only discussion on case study for 40 min.

Q&A;:
Case Study: About IKEA wanting to expand to kitchen apart from Sofas and beds in India, because footfall is declining and market cap is increasing for the kitchen segment. Ritu, a consultant has suggested to entirely revamp the kitchen product to fit the Indian homes better: Small units, stainless steel parts to avoid rust, etc. She is in a conundrum about whether she should roll out the kitchen model in India immediately, but that would require heavy investments, product testing and launches, adding after-service facilities, or take a slower, phased out approach. There are also problems of competitors, who would make the same products at half price, and personalization.

GI 1:

P1: TMAY + Something not in the form, with 1 minute hardstop
P2 (to M1): Why MBA right after college?
P1 to M4: If operations spec is first pref, then why finance?
P1 followed up: Asked about role of operations in Uber app
P1 directed the same question to M1
P2 to Me: You've selected Information Management as your second preference, what do you think is more relevant in the Uber case, Ops or IM?
P3 to Me: Difference between ROI and ROE?
P1 to M2: Why Finance after Chemical Eng.?
P1 followed up: What do you wish to do after MBA, grilled him on what an investment banker does, Buy-side, sell-side etc
P1 to me: What after MBA, which roles and dream company, meaning of mid-market, hedge funds, difference between GP and LP, would you enjoy working in IB/Equ. Resrch
P1 to M2: What do you know about Financial statements? If the company has raised no debt or equity, what would the WACC be?
P1 diverted the same question to M1
P1 to me: In WACC, Is BV or MV used for costs and weights?
P3 to M4: What is NPV and IRR, which is better
P1 to M4: Can multiple IRRs be there in the same project?
Same ques to F1
Same ques to Me: Handed me a notepad which had 10 years cashflow written, said calculate the no. of IRRs
P2 to M4: Some questions about entrepreneurship
P1 to M4: Tell me some alumni of SPJIMR
P2 to F1: Some questions on her creative writing
P2 to all, last question: If AI takes over everything and every job in 2 years, what will you do?

Verdict: M1,M2,M3 selected for GI2

GI 2

P2: TMAY
P1 Started with case discussion, asked what approach we would take between the 2, or if we would scrap the plan entirely
P1 was a questioning further on the claims we made, asking for more clarity
P1 asked what changes would you make to the product
P2 How would you tackle the issue of vendors making the products at 50% price
Discussion went on for about 40min, ended

Q&A;:
GI-1

2 panelists (Marketing and Finance Professor)

Candidates (3 for Finance, 2 for Marketing)

1. Give an intro (your name, state if you're a fresher or have work-ex, graduation degree, why will you be best suited for the chosen spec. - what skill will you bring to the cohort)
2. Marketing Professor started asking questions to the both Marketing students
3. Then Finance professor came to me and started questions from me about my work ex
4. Asked me about the model I must have built, how and what WACC did the company take?, how did we calculate terminal value, what assumptions did we take before building the model, what all risk factors did we need to factor in, about reliance debt zero - what do they mean, if a company has 3:1 D/E ratio and it has interest coverage ratio of 8x, can the company raise more debt? and if yes, then what is the caveat?
5. why should we reject you?
6. any question for the interviewer?

GI-2

1. How was your GI-1 interview? Did you enjoy it?
2. Give us an intro about yourself (Degree, work-ex/ fresher, tell us something about you which is not mentioned in your forms)
3. started with case discussion
4. asked us what is one thing we found interesting in the case and asked our stand
5. cross questioning from whatever we had written in Form-B (you should defend well all your points mentioned in Form-B)

Case: A mid-sized cough syrup manufacturing company operates in a highly competitive pharmaceutical market. Recently, international regulatory bodies introduced stricter quality and compliance standards for pharmaceutical manufacturers following several safety incidents across the industry (not specific to this company).

Although the company has not faced any compliance violations so far and continues to operate within existing domestic regulations, it now faces a strategic dilemma:

Adopting the new international standards would require:
Significant capital expenditure
Upgradation of manufacturing processes
Increased compliance and documentation costs

#THEIIMI

Higher working capital requirements

Management is concerned that implementing these standards could:
Increase operating costs
Reduce competitiveness against rivals who may delay compliance

However, failing to comply could expose the company to:
Regulatory scrutiny in the future
Potential product bans
Reputational damage
Loss of export opportunities
Long-term brand erosion

Background Notes:
(All Marketing calls with two having BM too) Panel Composition: Two panelists • P1: Male • P2: Female ■ Candidate Profiles Interviewee I1 • Gender: Male • Academic Background: BBA, IIM Rohtak • Work / Exposure: • Family-owned departmental store / retail chain • Conducted research on quick commerce vs kirana stores • Areas of Interest: Retail, consumer behavior, market structure ■ Interviewee I2 • Gender: Male • Academic Background: B.Com, Ramjas College (University of Delhi) • Work Experience: • Auditor at Deloitte • Freelance screenwriter and advertising copywriter • Areas of Interest: Branding, advertising, storytelling ■ Interviewee I3 • Gender: Female • Academic Background: BBA, IIFT Kakinada • Achievements: • Winner/participant in multiple case and consulting competitions • Internship Experience: • Worked with dashboards and supply-related analytics • Areas of Interest: Consulting, supply chain management ■ Interviewee I4 • Gender: Female • Academic Background: Mass Media (IPCW) • Work Experience: • Screenplay writer • Advertising and content writer • Worked on brand campaigns and influencer marketing • Areas of Interest: Media, branding, influencer strategy ■ Interviewee I5 (Candidate) • Gender: Male • Academic Background: B.Sc. Hospitality & Hotel Administration • Work Experience: • Chef • Culinary Consultant • Achievements: • Represented India in international culinary competitions • Areas of Interest: Food branding, customer experience, operations

Experience Notes:
Overall, my experience during the interview was that the panel appeared to be evaluating answers at a more conceptual and terminology-driven level, particularly in marketing and brand strategy. While my responses were based on practical, execution-level experience from hospitality, there seemed to be a mismatch between how I articulated my thinking and the conceptual framing the panel was expecting. This highlighted a gap in expression, where my operational understanding may not have translated clearly into the formal strategic language prioritised in the interview. There were instances where they asked all the candidates to give the terms, single word, name of strategy etc.

Q&A;:
I only remember mine so am only uploading those as for others it personalised and also little technical.
Interview Transcript

Opening Round – Introductions

P1: We’ll start with brief introductions. Please tell us about yourself.

Candidate (I5):
I am a graduate in Hospitality and Hotel Administration. I have worked professionally as a chef and culinary consultant, and I have also represented India in international culinary competitions. My interests extend beyond kitchen operations into Ghazal, reading and writing.

P1: You mentioned an international competition. What did you make there?

Candidate (I5):
Sir, we travelled to Croatia and prepared a starter, a main course, and a dessert. The main course received significant appreciation. If you would like, I can explain the dish.

P1: No, that's fine. We don't need the details.

(Moves on)

■

Question 1: Promoting Indian Cuisine Globally

P2: If India wants to promote Indian cuisine in global markets, what strategies would you suggest?

Candidate (I5):
I believe storytelling would be central — creating an emotional connection by explaining the origin of dishes, their cultural relevance, and how they are prepared. This helps people relate to the cuisine beyond just taste. (gave an example of what the global perception for indian cuisine is, and how made litti chokha to win the medal, and showcase cuclture and storytelling)
(Part 2/3)
Secondly, during service better ways could be done so that brand positioning happens in unique way for eg Rajasthani food in thali, South indian on banana lead etc.

P2: No, no — this sounds more like execution. Tell me strategy. Brand strategy.

Candidate (I5):
In that case, I would focus on repositioning Indian cuisine by correcting perception gaps — emphasizing standardization, quality assurance, and consistency, while communicating that Indian cuisine is diverse and structured rather than informal or unregulated.

P2: Okay, fine. Leave it.

■

Question 2: Role as a Culinary Consultant

P2: You mentioned you work as a culinary consultant. What exactly do you do?

Candidate (I5):
I work on menu development and ensure that the operations team can execute the menu efficiently. I am also involved in promotional activities such as campaign planning, food shoots, reels, and social media content for the brand.

P2: Can you name a project you worked on?

Candidate (I5):
We recently launched a Turkish kebab menu, which involved menu design, operational alignment, and promotional planning.

#THEOMI

■

Question 3: Single-Cuisine Restaurant Challenges

P2: Suppose you run a single-cuisine restaurant. What challenges would such a restaurant face?

Candidate (I5):
One challenge would be customer perception. A single-cuisine restaurant may be seen as limited, which can reduce trial among customers looking for variety.

P2: Something from an operational or financial perspective?

Candidate (I5):
Operationally, single-cuisine restaurants are usually streamlined, but risks can arise if the cuisine depends on imported or specialized ingredients. If procurement is disrupted, operations are affected.

From a financial perspective, high ingredient costs or import dependency can increase food costs and pressure pricing decisions.

P2: Okay, okay.

Candidate (I5):
Just to add context — when I joined this role, I simplified the menu to focus on Mediterranean cuisine to reduce operational complexity and improve consistency.

P2: Okay.

■

Question 4: Menu Design Logic

P1: How do you decide which dishes to include when working with a regional cuisine like Mediterranean, where there are many sub-regions?

Candidate (I5):
When working with niche cuisines such as Turkish or Persian, we focus on well-known, familiar dishes — such as kebabs, pita bread, hummus — because customers are more comfortable ordering items they recognize.

However, for more mainstream cuisines, we can experiment with regional or niche offerings, since customers already trust the cuisine and are more open to trying variations.

P1: Okay, fine.

■

Question 5: Geopolitical Risk & Brand Perception

P1: Suppose you own a Turkish restaurant, and tomorrow there is a geopolitical situation where Turkey supports Pakistan against India. People start boycotting Turkish brands. What would you do?

Candidate (I5):
I would clarify publicly that the restaurant is an Indian establishment inspired by Turkish cuisine, and that it does not represent or support any political stance. I would communicate empathy and solidarity with national sentiment while distancing the brand from geopolitical positions.

(P1 interrupts and turns the question to another candidate.)

#THEOMI

■

Conclusion
(Part 3/3)
Rejected in R1.

Background Notes:
BSc HHA. Work ex as a chef. Panelists: • P1 male (organisation behaviour) • P2 male (operations) • P3 male (ethics and organisation)

Experience Notes:
XLRI HRM.25-30 mins.
Very conversational and personalised.
Questioning on whatever you were saying.
Panelists were also very accommodating.

Q&A;:
Have removed the answers else it would have been too long.
Nothing was abrupt or random. Everything was cross questioned on whatever I answered.

P3: Is everything alright after the GD?

P2: You're working currently?

P2: Do you use any particular software?

P2: What technique do you use for inventory?

P2: What are the disadvantages of FIFO?

P2: These are the disadvantages? How did you come up with that?

Panel acknowledged positively.

P3: Suppose you are a vineyard manager. How would you supply to hotels?

P3: You're missing something.

Candidate: Sir if you could give a hint.

P3: Laughs and says I am here to question not give hints but still goes on to say think country.

P3: In Europe, why are some expensive wines available in supermarkets while some relatively less expensive wines are not?

P3: The second point you mentioned is an fnb strategy, useful for a restaurant manager but you are vineyard manager for you sales matter more. So if a €100 wine is available in a supermarket and a €20 wine is only in F&B;, why?

Panel moved on.

#THEOMI

P1: If employee satisfaction is so important, why is work culture in hospitality often toxic?

P3:
You sound like you're complaining. Why do hotels do this?

P1: In the GD, someone said customer satisfaction is more important than employee satisfaction. What do you think?

P3:You mentioned a conflict with a senior. What did you learn? (SOP qs)

P1: You're first. Do you want to critique other GD participants? We understand if you do so, because you know there were some interesting characters and seats are limited too so if you want to you can. Its completely natural.

P2: What did you prepare for this interview?

P3: What is your preference?

Candidate: HRM.

P3: Why?

P3: Have you gone through our curriculum?

P3: What about BM curriculum?

Panel laughed lightly and advised to review before BM interview.

P3: you can leave and take a toffee if you wish.

I thanked the panel, took the toffee, mentioned the cookies at taj were good, and exited.

Experience Notes:
while coming out of that room i started feeling the breath i was taking, i felt the sweat on my forehead in ac, it was a intimidating experience
the first candidate was grilled a little and baki sbme se kisiko grill nhi kiya sbko ache qsns puche(i was

#THEOMI

the only fresher out of the 6 ppl, i was the only person who felt that amount of pressure and grilling)
but hmko 95% ug acads se hi puche, no hr, no nothing, sirf p1 asked me 1-2 qsns alg se baaki sb phys and ug se hi pucha gaya
although i was able to answer most of it but still not sure about the results

Q&A;:
2 male P1 and P2 1 female P3
P2 roasted me(I felt the pressure, it was his way of interaction)
Started with grads ended with grads
I was 2nd to be interviewed
P2 starts
Suppose you are marketing....creating value....how will you capture...
I was not able to understand a word and i lost him, I asked him sorry sir
He tells me , you are here to market your self na?
Market yourself
I regained my calmness and answered
He asks me, everybody have these traits everybody did graduation then why you?
I answered and he said fair enough
While i was answering mam was going through my certificates but he sees my grad marksheet
Asks me which subjects did you study in 1sem
I said classical mechanics
What is the equation of time of pendulum
Write on the paper
Derive it
What else is written on the paper(some eqns were written)
Idk
Take another paper
Now he has a look at all my certificates
What did you studied in semester 2(he started asking one by one subjects from all my sems)
I named two subjects
He says only two subjects?
I: we had two major subjects and others as optionals
P2: what were the optionals
I told him the optionals
So you didn't attended your optional classes?
P2: did you said optics?
Yes
What is a fresnel lens?
How is it different from other lenses?
Can it be used to make optical glasses?
He looks at my marksheet and says
Who was Dr Shyama Prasad Mukherjee(My university name)?
I told him who he was, his works, his proficiency domains
He asks what else?
I told him that's all about him
He asks how did he died?
Was he taken to Andaman and Nicobar?
Was he shot dead?
Did he had a natural death?
Sorry sir I'm not aware
He started scolding me in hindiTum 365 days 3 saal tk apne college ke gate se andr bahar hue roz apne collg ke founder ka naam dekha but you don't even know how did he died, tumhare collg me unke founder ke baare me nahi batate?
he continues
how many years of grad you had
i said 3

#THEOMI

tumne 3 saal apne waste kiye, you wasted your 3 years
I was silent but had little smilei said dr shyama prasad...was not the founder of my college and was named after him, i also mentioned the collg name changed to veer bbudhu due to political reasons
he interrupted and said political wolitical hatao yrrr...ye kya dharm shiksha me participate kare the tum
what was the topic?(mere certificates se)
i said there was no topic, it was a exam which tests our morality and was objective mcq based, it was a test of some marks
he tells P1 male to continue, looking my other certificates
i think P1 felt the pressure i was in and chose to help me calm,although i was calm and smiling thoroughout the interview
p1 asks have you prepared for anything in this interview?
i told him not specifically but i had a look into sports geopolitics and stuffs happening currently around the worldhe tells me to say everything i know happening around the world
i mentioned usa tariffs, wars in middle east etc but when i mentioned strait of hormouz which is blocked and ships are not able to pass
p1 interupts, asks what is boyancy
why ships doesnt sink
in what circumstance can a ship sink?
(Part 2/2)
okay continue the answer
i completed my answer to p1
p1 asks how will everything affect india
I mentioned everything then p1 asks what else?
i mention 2 more points and wrapped up saying it can somewhat affect our economy.
p1 sees my sop and asks what i have written in the 1st qsn of business chaallange
now over to p3 mam
she asks did you had statistics or maths?
i said i had mathematical physics
what is the difference between the maths and mathematical physics?
i answered mathematical physics helps in derivations like time rate and others
p1 interrupts, you had differnce eqns do you remember?
i said i had differential eqns
p3 tells me to give example of use of mathematical phy
i gave example of maxwells eqns
she then asks me to draw the graph of 1/cosec theta
i wasn't able to do that
she then tells me to draw the graph of cos theta
i did that
p3 asks p2 and p1 do you want to ask anything?
p1 says no p2 says nhi nhi mreko kuch puchna wuchna nhi hai isse jao jao
p3 tells me to take a toffee and leave
i smiled, greeted and left

Bsc Hha. Work ex as a chef.XLRI BM. 3 panelists all male. (P2 was finance prof)

Experience Notes:
Don't know.
Felt thoda grilling thoda conversational.
Fumbled a lot tariff part.
Could have gone way better vrna. T_T

Q&A;:
P1: Chef, from kitchen to boardroom — why the switch?
P1: But aren't you already managing the kitchen?
P2: Have you heard of Dalma?
P2: What about Chhena Poda?
P2: Different types of Rasgullas?
P2: What is nolen gur?
P2: You clearly enjoy cooking. Why do an MBA now? You do not like the guidelines being imposed but want to do the same yourself??

P2: Now I will ask you a single question which will either give you a convert or a rejection. How have tariffs impacted the hotel industry?in the past 4-6 months lot of news has been going on na.

Candidate:
Tariff reductions could reduce costs of imported hospitality inputs such as wines and spirits, which affects restaurant procurement costs.(gave EU FTA and Us deal considerations)

P2: But have these tariffs been applied?

Candidate:
As far as I know they are still under discussion.

P2: Then how can you say they impacted the industry?

Candidate:
In that case, current high tariffs continue to keep imported items expensive.

P2: You clearly dont know you are trying to build something via incomplete knowledge. Let's leave it at that.
(P2 ended the topic.)

P3: How comfortable are you with mathematics?
P3: Which statistical concepts?

#THEOMI

P3: If you calculate mean, median and mode of a dataset, what is that called?

Candidate :
Apologised and said I was not able to understand the qs.
(It was measures of central tendency I realised so late am so dumb itna basic ■■■■)

P3: Anything else you studied?
P1: Did you take coaching?
P1: Difference between equation and identity?
P3: Where would you use x+y=15 in real life?
P1: You should check out IITTM Gwalior.

P2: Is there anything else you want us to know, which might have a positive impact for the first time in this interview (■■■■■■kms) for us judging you.

P1: What other calls do you have?
Told.

Panel: Thank you, please take a toffe.

Overall chill interview

Q&A;:
P1: Tell us about you
P1: Walk me through your job profile
P1: Tell me one good thing and one bad thing about your job (mentioned occasional late-night calls).
P1: How can this be resolved? What steps should be taken (talked about right to disconnect bill)
P1: What is your CAT percentile?
P1: You must have all the calls; why are you coming to IIFT?

P2: How's NIT Kurukshetra doing nowadays? PS: He was an alumnus :)
P2: Tell me, what do you like about Kurukshetra as a city?
P2: Then he reminisced his own experiences there

P3: In your CV, you have mentioned you have an interest in the sneaker industry. That's interesting. tell me something about this (talked about occasional reselling)
P3: Why is the reselling industry so big and popular?
P3: Can you tell me about some reselling companies in India recently?
P3: Why India being such a big market, not receiving exclusive sneaker releases?
P3: Ok, last question, you are working as a software engineer and doing good in your current job. Why do you want to take a gap of 2 years to do MBA?
P3: After MBA, which field you want to go into?

Background Notes:
BSc HHA. Work ex as a chef. Panel: • P1 – Female Professor • P2 – Female Professor • P3 – Male Professor

Experience Notes:
15-20mins. Overall felt very conversational interview. Messed up here and there but did not grill.

Q&A;:
P2:Could you please introduce yourself?

#THEOMI

P2: From hospitality to international business — how does that transition make sense?

P2: How many Michelin-star restaurants are there in India?

P2: Where did Michelin originate and what is the concept?

P2: Do you know coding?

Candidate:No

P2: What about data?

P1: How has technology affected hospitality?

P1: Suppose a guest is unhappy. What would you do?

P3: Suppose a Jain family is mistakenly served meat as there was a current news. What will you do?

P3: Suppose a foreign dignitary like Trump asks for beef in Delhi, which is banned. What would you do?

P3: Where do you see yourself between hospitality and international business?

P3: Under which law can capital equipment be imported with tax exemptions?

Candidate:
Mentioned having read about such exemptions but could not recall the exact law.

P3: Which ministry regulates foreign trade?

Candidate:
Guessed Ministry of Commerce.

P3: Is the rupee strengthening or weakening?

Candidate:
Said it is weakening and explained why.

P3:Last question. Is a weakening rupee good for Indian exports? Yes or No?

Candidate: No

P2: What other calls do you have?

Candidate:
Shared other interview calls.

P2: Whichever college you join, strengthen your business fundamentals and data skills before MBA, it would help you a lot.

Candidate:
Thanked the panel.

Experience Notes:
Very lively, conversational panel. All the 3 panelists were extremely present and were actively responding to my answers with smiling faces.
~20mins

Q&A;:
Panel - 2M, 1F - all three seemed like profs. P1, P2 - 2M, P3 - F

P1: So good afternoon
P2: Did you eat your lunch? (Some more pleasantries exchanged)

P1: You've studied in SJCC and are now in Deutsche for 1.5 years now. What do you at DB?
P2: What is SEPA?
(Continued with my role)
P1: What are some of your achievements at your workplace? (P2 nodded along, seemed very impressed and chimed in to compliment my Toastmasters journey at work)
P1: What are some corporate ethics that DB follows? (Some follow up questions on mandatory trainings conducted)
P1: What is your opinion on Moonlighting?
P1: What are the CSR activities conducted by DB? (He cracked some joke here)
P1: I am good to go, thank you.

P2: So, tell me this, your parents work in the private sector - why don't you start a business with your family? (I didn't understand why he asked this but had a back and forth conversation on this)
P2: So why MBA now? (Little push back here on how far I'll study just to make good networks xD)
P2: How is Deutsche Bank as a bank different from it's American counterparts? Both from a business model perspective and employee perspective?
P2: Who is the current CEO? (Answered this)
Do you know that there was an India co-CEO? (Did not know this)
P2: Okay, tell me about EU. Have you heard of GCC? Why were they organized? (Wasn't sure so took an educated guess) What countries come under this cooperation?
P2: What do you think about the Iran crisis? When will it end? (I said I wish it to be over immediately if I had the control, he asked why? And I told about the ripple effect it is having in Indian households quite immediately... said LPG and stopped me and asked>>) what is the full form of LPG? (Continued with my answer)
P2: Have you heard of Petro dollar? (Said no)
P2: What are the other calls your received?
P2: Okay thank you!

P3: I still don't understand why you want to do an MBA.. (lotttt of back and forth here until I said "I value learning from my network and growing a well connected one for way beyond bschool")
P3: Your role says "Analyst" - what do you analyze - (my answer.... some pushbacks) - does it follow a poisson or normal distribution, what kind of probability does it have? (Explained that there's no set pattern)

P1, P2, P3 - Thank you, all the best!

IDK if I'll convert or not because I did mess up on some Q's but overall they were genuinely interested in listening to me and hearing me out. It was not at alll a grilling interview, rather a very comfortable one.

Q&A;:
TMAY. Your hometown? Family? Do you have any siblings?
Where do you work? What's your role?
What does your company do?
Why would other businesses use your product? What sets it apart?
What is the pricing model? (I work in SaaS)
What is the revenue of your company?
Can you convert the revenue in INR? (approximately as I had told it in USD)
Why MBA?
What are your plans after MBA?
Do you follow current affairs? (said yes)
Which papers do you read?
Do you think the UN is still relevant?
What is your political alignment? (told me it's ohkay if I am not comfortable sharing)
Can you share any controversial/lesser held beliefs that you have?
Why SJMSOM?
Would you chose SOM over IIM ABC? (said I don't have ABC calls. If I did, I'd analyse the situation then decide)
Do you have any Q's for us?

IIT Bombay SJMSOM Interview Transcript
GEM 998 19 months workex till December

(14-15 minutes)
Three professors
P1- TMAY
I literally fumbled they ask me to calm down, I then continued
P1 asked for CV and P2 asked to tell one interesting story
P2 - Hobbies and interests
P2 and I had a long discussion on workex there were a lot of cross questioning
P3 came in between of the interview and then joined
P1 - Which sector you want to get into
P1 - why switching from this sector
P1 - Can you name and number the professors in Sales and Marketing
P1 - What are your hobbies
P3 - Why gap in your resume
P1 - It was nice to talk to you and know about your interest in joining SJMSOM

I said thank you

Experience Notes:
No physics, no profile question, nothing about my achievements. Don't know what to make of this

Q&A;:
Tell us how this transition from Physics to OR

#THEOMI

I told about my journey and my publications and current industry consultant work with a food delivery app

Then asked in depth about ML and one prof wasn't understanding it at all, literally said all this is too technical for me ■

Then some OR questions

Other calls: I mentioned IIM mumbai OSCM but they said I will definitely join iim and not them. Had to defend this a bit

Then why MBA as it will be a downgrade for me. Answered saying I just don't want to propose solutions rather want to implement them too

As I was leaving one of the profs asked me to mail him when my current project is finished as he wants to work with me.
I said sure Sir but if you offer me an admission we'll be able to collaborate for the next 2 years ■■■■

Felt more like a conversation they were laughing and talking in Hindi
Overall would call it stress less interview and don’t know how to feel about it ■

Q&A;:
TMAY
Why MBA ?
So many candidates want to do MBA to get PM role you already are a PM so reasoning behind MBA ?
What do you want to get out of MBA ?
One feature that you made which was not asked by the customer but helped them ?
Why not try for a switch instead of MBA?
What all companies you interviewed ?

Can't decode the expression of the panel. Very stone cold, stoic faced. From a questions pov, it flowed like a conversation without any grilling.
~20mins
Could answer 80-85% of the questions

Q&A;:
3M - 2 Profs (P1, P2), 3rd one could be Alum or Prof (A)

P2: (asked about my name)
P1: TMAY
(Cut me off)
P1: So the degree itself is called Strategic Finance? What's that about?
P1: So what do you do as part of your role?
(Clarifications here and there)
P1: Okay so tell me how banks are evaluated? Important ratios used
(Had a back and forth conversation on this - deposit-credit ratio, meaning, other ratios, net interest margin etc)

P2: so tell me are there other alternatives to SWIFT? what is it if any?
(Back and forth on this - Bitcoin, CBDCs, Stablecoins and popular methods)
P2: How does banking sanctions work o Russia and Iran? (2-3 follow up questions on this)

A: is there any difference in the way debit and credit card transactions are settled, if any what is it?
(Some more to-and-fro questions, answers -> was not entirely sure, made a guess after asking in the difference)
A: at what point in the credit card PoS transaction does MDR get cut? Does it get cut at all?

Okay, we're done. All the best. Have a good day!

Was a pressure interview overall, conversational, laughing yet my neck was in their grip ■

Q&A;:
M1- Hi, How are you
(I said I'm fine how about you)
M1- Me? That depends on how you answer my questions today
M1- TMAY
M1- what genre do you read, have you read sidney sheldon.(I said no he said then how do you even call yourself a reader)
M1- Tell us about your internship, college placements, your role
M1- You are doing fine then why do you want to do an MBA.
M1- what is a leader, are you a leader or a team player. Should a leader always be a team player.
M1- What is the leadership style of steve jobs.
M1- difference between leader and manager, was mahatma Gandhi a good manager.
M2- who is your idol AI leader
F1- if not AI then any business leader
M1- any business news you came accross
M1- I'm still not convinced why do you want mba, you can just do fine where you are
M2- do you still think after all this that you want mba
(I said I'm hell bent on doing mba)
All laughed
M1- then convince us
(Went on and on, they still didn't seem convinced)
Show us your certificates
You may go

Overall a pretty chill and conversational interview. No grilling as such.

#THEOMI

Q&A;:
P2: that’s a great tie.

P2:What is your name?

P2: Where are you from?

P2: Why is Dehradun Famous?

P2: Walk us through your background.

P3: Why do you want to do an MBA?

P3: Difference between home-cooked food and hotel food?

P3: What roles are you looking at post MBA?

P2: How is the hotel industry doing?

P2: Why?

P2: Difference between a good and bad hotel of the same company ?

P2: Difference between Taj and Four Points?

P3: Do you know about the Oberoi Management Program?

P2: What other calls do you have?

P1: Please give your certificates
(Everyone went quite while she was reviewing)

Candidate:
Mentioned that the tie complimented earlier was a family heirloom passed down from grandfather to father to him. Thanked for complimenting.

(The panel smiled and atmosphere became lighter.)

P3: What do you like to eat most?

Candidate:
Biryani or ramen, but ultimately biryani as comfort food.

P2: Which biryani?

Candidate:
Lucknowi biryani, though I also like Kolkata biryani.

P3: What do you like cooking most?

Candidate:
Fresh handmade pasta — explained dough preparation, sauces, and emulsification.

P2 to P3: You asked a bad question the only good thing is we already had lunch else you would have to cook.
(All started laughing)

#THEOMI

Then they started talking among themselves how they had ordered a pasta some time back and how good it was.

Once certificates were reviewed.

P2: Thank you. You may leave now.

Candidate:Thank you have a great day!

Q&A;:
JAP transcript

F: So, you have been working at [....] for more than 3 years, have you continued with the same role throughout, or did you get additional responsibilities?
F: Could you explain to me in simple terms what you do/what your work entails?
F: What do you think about [.....]? What are some problem/are there any problems that [.....] is facing right now? (I mentioned about increasing competition in the industry)
F: Could you name a few of these competitions?
F: [....] are known for a lot of good things which they do for Research and development, do you know anything related to that?(I got confused here, but she was kind enough to nudge me towards the right direction)
M: What are your hobbies?
M: Tell us about your Family.
M: Do you know what Six sigma is? Do you know what sigma in six sigma is/why do they have that sigma? (I mentioned the process cycle itself instead of giving a definition)
M: What is deviation? How do you calculate it? (I started with the mathematical expression, but he stopped me and asked me to explain it in words)
M: Give us an example of where you would use deviation.(I could only think of CAT scaled score calculation, so said that, I Kindof blanked out by then, so my answers also lost clarity)

F: Thats it from our side. Thank you, you may leave.

Background Notes:
Bsc HHA. Work ex as a chef. Panel Composition: • P1: Male Professor (early 40s) • P2: Male Professor (early 40s)

Experience Notes:
Overall conversational interview. Wanted to understand my decisions. Both looked like hospitality enthusiasts while one was an avid follower of the industry.

Q&A;:
P1: Please introduce yourself.

After I finished, both professors went silent for around 30–35 seconds while reviewing my file.

P2: When I hear your introduction and see your file, it seems your life has been very rosy. You've won competitions and graduated at the top of your batch. Why do you still want to do an MBA?

He added humorously:
"In our mess, we don't even make dum biryani because people start saying this is South Indian, this is North Indian, this is East Indian. So tell me again — why MBA?"

P2: Do you follow MBA Social?

Candidate: Yes, sir.

P2: Still you want to do an MBA? That entire page shows how difficult and degrading MBA life is.

Candidate:
I said that I view it differently. It shows that MBA life is not all sunshine and rainbows, and that there are trade-offs and challenges involved. I believe it helps set realistic expectations rather than idealistic ones.

P2: So if people expect difficulty, they become docile and accept injustice?

Candidate:
I responded that there is a difference between expecting and accepting. One can expect challenges, but that does not mean one should accept unfair treatment. It is always appropriate to raise concerns through proper channels.

There was a brief philosophical exchange on expectations vs acceptance, after which both professors smiled and moved ahead.

P1: You're a chef. You could create Michelin-star restaurants. That's the dream for a chef. Why MBA?

P1: What do you mean by larger scale?

■

P1: Do you know about [specific hotel chain mentioned]? (Hennesy?)

Candidate: I responded that I was not aware.

He mentioned a specific champagne brand and asked what the company is doing currently. (Kurg?)

#THEOMI

Candidate:
I said I was unaware of its current business positioning but explained what champagne is.

P1: We are businessmen; we look deeper.

He then asked:

P1: Do you know Savoy Hotels?

P1: Do they own or operate? How do they function?

Candidate:
I said I was unsure about their exact ownership model.

P1: What about FDI rules in Indian hospitality?

The panel acknowledged and moved ahead.

P1: What is your hobby? cooking, right? Has to be as you are a chef. Write the recipe of a fruitcake.

He provided paper and pen and asked me to write it down.

While I was writing, P1 intentionally interrupted:
• “You’re taking time.”
• “Bakery requires precision.”
• “I expect very precise measurements from an award-winning chef.”

Both professors smiled during this.

I completed the recipe in approximately one minute.

P1: Now tell me the recipe.

P1 acknowledged and seemed satisfied.

P2: Do you know Caesar Ritz and its origin story?

Candidate:
I associated him with Ritz-Carlton and mentioned its presence in India but said I was unaware of the specific origin story.

P2: That’s fine, it’s trivia.

P2: What is the difference between ‘Chonk’ and ‘Dhunkaar’ (tempering techniques)?

P2 acknowledged the explanation positively.

■

Conclusion

P2: Thank you. That’s all from our side. You can take a toffee.

I thanked both panelists and exited.

Q&A;:
IIM JAP – Personal Interview Transcript

Panel:
Two panelists, both senior (approximately 45–50+ years old).
Overall tone: calm, conversational, and relaxed.

■

P1: So, what are your hobbies?
Me: I enjoy writing a lot. I’ve participated in more than 10 open competitions across debates, writing, and public speaking.

#THEOMI

P1: What kind of writing do you do?
Me: I write poetry, songs, and short reflective pieces.

P2: Do you know the difference between ghazals and antaras?
Me: I am more into the writing and creative expression part rather than the technical reading or structural aspects, so I'm not very sure about the exact difference.

■

P1: What's your other hobby?
Me: I follow cricket quite closely.

P1: How did you get into cricket?
Me: My father was a Ranji player. He also played in the Syed Mushtaq Ali Trophy.

P2: Oh, that's interesting. In which years did he play?
Me: Around 1985 to 1988.

P1: Which players did he play with?
Me: I mentioned two to three names.

■

P2: Tell us about cricket balls—what are the different colors, and how do they differ?
Me: I explained the differences between red, white, and pink balls, and how different countries use different brands like SG, Dukes, and Kookaburra.

P1: What is your favorite part of cricket?
Me: Fast bowling.

(Conversation around cricket continued in a relaxed manner for around 6–7 minutes.)

■

P2: Your specialization is marketing, right? Let's say Coca-Cola and PepsiCo are the two leaders in the industry. Why do they still spend so much on advertising?
Me: Because in such markets, if a brand goes out of sight, it quickly goes out of mind. Also, it's an oligopolistic market where even small changes in market share can lead to huge financial differences.

P1: What is an oligopoly?
Me: I explained the definition and characteristics of an oligopolistic market.

(Further discussion followed on how even a 0.01% market share change can lead to huge financial losses.)

Me: I also mentioned how incidents like the Cristiano Ronaldo soft drink incident affected stock prices, and how large players often acquire rising local competitors to maintain dominance.

■

P1: Alright, that will be all. Good day.
Me: Thank you, sir.

■

Overall Reflection

#THEOMI

• Interview duration: ~15–20 minutes
• Tone: relaxed, conversational, not grilling
• Focus areas: hobbies (writing, cricket) and basic marketing concepts
• No academic or current affairs questions asked
• Only slight discomfort: technical question about ghazal vs antra

Self-rating: Around 7–7.5/10 — a decent, smooth interaction overall.

Q&A;:
Tmay
Why dont you consider working for another year and then do mba
What are some negative qualities about your manager?

You had a subject fundamentals of computer programming in your first year? What is data structure?
What is random forest?
Do you follow current affairs?
What is orange economy in budget?
What is the meaning of orange? Or why the colour orange?

You had a subject professional ethics and management in your ug. Which is one course we offer in mba.

Give me an extempore of 1 min on topic ethics cannot be legislative

y=a^x
What is dy/da?

Similarly what is the integral of the answer i just gave.

What are certain problems you have observed that if the organization focus on it can help in overall workflow?

What other calls you have lined up?

What outcome you want after 2 years of mba? In one line?

Experience Notes:
Good interview, the panel was very friendly, the pi lasted for about 12-15 min
No current affairs, no GK etc..
A bit of conversation in hindi as well.

Q&A;:
Q&A;:
TMAY- One panelist was listening , the other one was asking to show certificates for extra curriculars etc..so had to manage both.

Some questions on Cryptocurrency and Blockchain.

What all subjects did you study in UG-mentioned 6-7 subjects, mentioned digital communication as my favourite so had 2-3 questions on that

Why MBA as a fresher- answered
One panelist said ki you should pursue core engineering only, you are technically sound
To this the other panelist was smiling and saying ki the real reason is market down h, job mil nhi rhi h

Was asked about Fourier Transform

Hobbies and Interests- Mentioned F1 so had a good discussion on that.
Then also mentioned cooking so asked about something that I cooked recently- Answered

Then I mentioned economics so then had a discussion on CPI, GDP, inflation
Current inflation, current GDP

What other calls do you have - Told
What is your Cat percentile- Told

Any ques for us - No sir
Was offered a toffee- Took one - isme bhi panelist joked and said “Ek hi lena baaki log ko bhi dena h ”

Q&A;:
Two Male professiors -P1 (in 40-50s) , P2(30-40s), A (me)
P1 - So you look very different from your Photo attached in CAT form.
A - Sorry, it was during my B.tech time
P1 - Can you show your aadhar id
A - Yes sir sure.
P1- So why gap after Grad
A - Explained due to my personal reasons
P1 - Why didn't you mention about your extracurriculars, and do you have any?
A - Yes sir, sorry. I have shown them.
P1- Asked about few questions about how during B.tech you did project related to AI
A - Explained it.
P1 - What exactly do you do in work.
A - Explained my job role with example
P2 - Why did you not pursue job in your core field which is ECE?
A- Explained that in the long run I want to be in a role that is involved in broader projects involving problem solving, people interaction, etc
P2- In technicals job it is there but fine, do you know about any jet engines made in India.
A - not sure about it.
P2 - What should Indian Government do to improve jobs in electronics and semiconductors as such?
A - Told that we our governments should approach major corporations worldwide through important events happening globally
P1- Do you know about AI meet happening in India? What's the major Focus?
A - Told about how India is trying to implement AI in wash that increases sustainability
Some other cross questions in between which I couldn't remember, overall I didn't even feel like I was an IIM Interview at all and they were interactive and kind.

UG: BMS
PG: Not Available
Work Ex (months): 12.0
Certifications: Not Available

Background Notes:
BMS 988, 1year workex, interview location : Kolkata, 2 Panalist both male

Experience Notes:
Overall was very comforting interview, only basic questions asked, no in-depth questions, no why? Questions, no grilling

Q&A;:
Pretty chill, All basics, no L2 L3 questions

P1 Are you working currently?
M- No sir, I used to work, but not currently

P1 Why you left your job?
M - For getting higher education

P1 ok, what was you job?
M- Explained (no follow up)

#THEOM

P1 Profit vs Growth, what should be preferred in business
M - Explained (took reference of BCG Matrix and product life cycle)

P1 Take this paper write. Gave cash flows for 4 years and discount rate. Asked to write expression for calculating NPV.
M- done

P1 Asked How will you calculate IRR for the same cash flows
M - answered

P1 Do you know what is retained earnings?
M - Answered

P1 can it be used for Capex?
M - Answered

P2 took over

P2 can you draw graph of y=x, then y=x2 (what is this graph called?)
M - Answered

P2 Gave a quadratic equation and asked to differentiate
M - Answered

P2 Can you tell me what is price elasticity ?
M- Answered

P2 What is the normal reaction?
M - Started explaining using income and substitution effect.

P2 Stopped. Asked what is the normal impact on demand if price is lowered?
M- Answered

P2 Does this always follows?
M- Answered

P2 What are such products called?
M- I said Inferior goods (got a little confused)

P2 no
M- sorry sir, Giffen goods

P2 Explain give example
M- Answered

P2 Can you draw price demand curve?
M- Answered

P2 What recent news you have gone through, other than AI impact summit?
M - Answered (Adani investment news in data centre infra, UGC)

P2 More related to business ?
M- told few

#THEOMI

P2 Do you watch Netflix?
M - yes sir

P2 Any news related to Netflix?
M - (i remembered about the Netflix WB acquisition from a couple of months ago) mentioned that

P2 How did you utilised your time since you left your job.
M - Answered around Cat prep, CFA prep for deepening knowledge (felt they were looking something more like Internship or ngo service.. not sure)

P2 Thank you that all from us (seemed happy)
M - thank you

Background Notes:
9/9/7 , Engineering Physics- IITM Fresher, 99.4% , 2 Male profs

Experience Notes:
It was a bit conversational, they didn't grill much. Couldn't convince them on Why we shld take u. Overall it was under 10 mins, they felt like they didn't want to ask much(idk why)

Q&A;:
1) What are u doing rn?
2) Why engineering physics?
3) Why do u want to switch to MBA?
4) Convince me Why we shld take u over other grads like BBA, CS
5) What is quantum computing? How is it faster than traditional computing? (Follow up qns)
6) What is solid state physics? Applications? (It was in my marksheet)
7) Theme of AI summit? Where is it happening? Where in Delhi?
8) Galgotias uni controversy
9) Do u follow geopolitics? Capital of Ukraine, Venezuela, Iceland?
10) What is Trade surplus vs deficit? Tariffs?

Q&A;:
Two professors male
There wasn't much cross questioning. And the process finished pretty fast, than i imagined .

Overall mood: A bit of jovial , one Prof has a non-chalant face while the other was smiling most of the time.

P1 : ok tell me , Introduce yourself and tell us why u chose to pursue this stream

Me: Told abt my job, my UG, my native and stuff, and my interest towards being a part of planning and ideation rather than implementing and following commands.

P1: So getting to a Decisive role is the factor?
Me : Yes, In a way . I wish to move to place where I have visibility and impact.

P1: But even if you move to such a position, you can often find yourself in the recieving end of such actions.

Me : Anywhere we go there will be their own sets of merits and demerits, It just we need to take a choice.

P1: Ok so what is life for you, give a holistic idea

Me : blabbered something Abt being a daily lesson , a fuel for curiosity etc.

P2 : So you are a electrical engineer in UG. Tell me abt Synchronous Motor.

Me : thought for a moment and said I can't recollect much

P2: Ok that's fine. You work as a software Engineer, tell us what exactly you do ?

Me: told abt my role and the type of stuff we deal with.

P2: ok let's say you are at a position where are stuck between a client and your parent company. The client is a very important relation for you, since they generate a lot of revenue for your firm. But they are not paying you, how will you deal with such situation?

Me : told abt setting deadlines, grace periods, and eventual penalties. And communicating with the parent company.

P2: tell me a subject u like from your UG, or wait u have this Machine Learning course, what is machine learning.

< i said something, but sounded a bit nervous and somehow I was sweating ■ I didn't notice.
He asked me to take a minute, and offered he water >

Then I explained what I think ML is.

P2: great, thank you

P1: thank you , you can leave. Take a toffee

UG: BBA, General
PG: Not Available
Work Ex (months): Not Available
Certifications: Not Available

Background Notes:
BBA,9/9/9, Fresher

Experience Notes:
They were very accommodating and smiling throughout the interview. There was no cross-questioning, they were accepting of whatever I told them. Everyone on my panel had a similar experience. Duration: 15-20 mins

Q&A;:
1. What’s the meaning of your name?

2. You are from this place right? What is it known for?

3. In BBA, what all did you study? What was your favourite subject?

4. In marketing, tell me about one theory in simple terms with a real-life example.

5. Are you aware of OB and HR? Tell us a little about them.

6. Can you explain any theory of leadership?

7. Tell me about something that fascinates you in HR and its adaptation in the workplace. Any theory or concept?

8. What is the difference between marketing and branding?

9. What are the 4 Ps of marketing?

10. Why IIM?

11. What are your strengths and weaknesses?

12. Among the candidates, how are you better than them?

#THEOMI

13. Tell us about your family.

14. Do you know what situational leadership is?

15. Do you follow business news? Tell us some recent updates.

16. How would you rate your mathematical skills? Please explain.

Okay, that’s it. Thank you. Please take a coffee.

Background Notes:
98m46%ile, GNEF

Experience Notes:
20 mins overall.
Very conversational. They wanted to ask questions about a topic only if you were comfortable/remember it. I blacked out a little bit with portfolio theories in SAPM, I should've been able to answer these but overall decent

Q&A;:
(Initial banter around name)
F: TMAY
F: You've mentioned a professional certification, what is it?
F: okay tell me about the types of risk
F: what are the specific classifications of risks for banks? (I couldn't remember the classification, but named all the risks)
F: Let’s move to corporate finance (she was too pumped for this), tell me what you remember from corp fin
F: tell me about capital structure decisions
F: what is MMT? Why is it important?
(I couldn't remember the abbreviation, asked for if could be expanded, then answered)
F: what is Markowitz Portfolio Theory? (Didn't recall at that moment xD temporary blackout)

M: where do you work again? What is your role?
M: explain a day in your work life
M: why do you want to do an MBA now? (A little bit of cross questioning here ~5mins)

F: Tell me something you remember from the budget, especially on your sector (asked if I could answer from other povs because not a lot of major stuff happened for banking, she nodded yes)

Work Ex (months): 15.0
Certifications: Not Available

Background Notes:
BE (CSE), 15 months worked, Two panel members (1M, 1F)

Experience Notes:
Not Available

Q&A;:
F- I can see that you've played a TT tournament in 2013, can you tell us about that.
F - Any national medals?
M- Which was the most recent?
F- You work as a software engineer, tell us about your role.
M- Why MBA? Your father and grandfather don't have one and are running the business successfully
M- So after mba you want to join the business?
F- Do You know about *named a similar business*
F- Is that all you know?
F- Who are your competitors?
F- There is entrepreneurship development institute of india, you can get to know everything there. Why not that?
M- Do you know statistics?
M- How can you apply statistics to your business?
F-Do you know about cryptography?
F- Have you studied OOPs?
F- How can you apply OOPs to your business?
F- What's encryption?
F-Difference between encryption and encapsulation?
